book has now been re-issued in revised and updated paperback form. Racing with Heroes Veloce Publishing Ltd
This colorful and entertaining book, the first comprehensive history of drag racing in the UK, is a must for all fans of this exciting sport. Dramatically illustrated, it traces the roots of drag racing from its UK sprinting and American speed trial and hot-rodding origins in the early 1900s, moving on to the landmark opening of Santa Pod in 1966,

through the boom periods of the 1970s and 1980s, and finishing with the sport's rejuvenation in recent years. Meticulously researched, this book features many historic photographs and a wealth of first-hand memories from the leading protagonists. *American 1/2-ton Pickup Trucks of the 1950s* SAE International

With over 200 new images, the new edition of *We Were the Ramchargers* is perfect for drag racing enthusiasts. This book takes readers behind the

scenes with the group of Chrysler engineers who, from the 1950s through the 1970s, became one of the most successful and influential drag racing teams of all time. The only team of engineers from an automobile manufacturer to drag race successfully, the Ramchargers broke the most time barriers in drag racing history and earned the most National Hot Rod Association (NHRA) Super Stock titles during the sport's golden era of factory competition. Author Dave Rockwell, a

Ramcharger himself, interviewed more than 40 team members, competitors, and track operators for *We Were the Ramchargers*, making it the first and only book to provide inside details on all elements of the Ramchargers story. In addition to chronicling the races they won and legendary cars they developed (including the High and Mighty, 426 Hemi, and first Funny Car), Rockwell opens corporate and personal files to take readers behind the doors at

Chrysler (showing, among other things, how the Ramchargers helped pioneer the platform team concept), while revealing the personalities of the men who made it all happen. This book chronicles the life of Keith Duckworth OBE, the remarkable engineer famous for being co-founder of Cosworth

Engineering and creating the most successful F1 engine of all time, the DFV. Although the company's engines are given due prominence, this isn't an intricate technical examination of their design, but a more rounded look at the life and work of their designer – work which included significant contributions to aviation, motorcycling, and powerboating. *British Café Racers*

Motorcycle GP Racing in the 1960s

Veloce Publishing Ltd

This is my innocent and humorous recollection of the disasters and successes I have encountered in the male dominated sport of Drag Racing, when it was in it's infancy, back in the 1970's in the UK. I became only the second woman in the UK to race a Top Fuel dragster. How I

survived a 200mph crash and came back to win the European Championship two years in a row. Yes, I beat the men at their own game!

Mercedes-Benz Trucks
Veloce Publishing Ltd
This book includes some of the greats of the scrambling world – Dave Bickers, John Banks, Rob Taylor – and others not, perhaps, quite so well known. From the hard-riding Devon farmer John Tribble, Gloucester ace Tommy Barker, and Six Days trials star Eric Chilton, to the last ever

interview with Olga Kevelos, a true star. *Diggers, Funnies, Gassers and Altered*s IH Racing In typically hapless fashion, Turner jumps on his motorbike and sets out in search of adventure. Heading north, he aims his heavily laden Kawasaki towards the massive Øresund bridge, and passes from Copenhagen into Sweden, then onto the majestic waterfalls of Norway. Turner then determines to visit St. Petersburg, a mere 1700km east, before heading back home to

London, via most of Poland and a good deal of Germany. *Motor Racing at Thruxton in the 1980s* Veloce Publishing Ltd Legendary drag racer and fiction writer Grady Bryant has released his latest book, *Drag Race Fever*. It was only a matter of time before Grady shared his adventures of the early days of drag racing in a story that all sports and drag racers will enjoy. The story involves a young man getting started in drag racing in the early 1960's when the factory

experimental race cars were the top calling cards of all drag race promoters. These cars were the first Funny Cars of today. Read how these racers evolved into the cars we see today and learn how driver Johnny Rock and his mechanic Clutch Roberts toured the states pulling their race car to the next match race, continuously sacrificing so their car would have the parts to race again. Although the story is fiction any drag race fan can fit different names to the drivers and

relate to all the accounts of living on the road and racing every Saturday and Sunday at different tracks

across the nation.
