Globalisation has caused an increase in the amount of cultural mingling. For some people diversity is seen as richness but for others there have been problems of identity and hence conflict. This world survey looks at the current debates, cultural policies, national identity and methods of measuring culture. It is backed up by statistical tables and cultural indicators and includes a CD-ROM of cultural resources on the Web.

This book explores how the European Union has been responding to the challenge of diversity. In doing so, it considers the EU as a complex polity that has found novel ways for accommodating diversity. Much of the literature on the EU seeks to identify it as a unique case of cooperation between states that moves past classic international cooperation. This volume argues that in order to understand the EU's effort in managing the diversity among its members and citizens it is more effective to look at the EU as a state. While acknowledging that the EU lacks key aspects of statehood, the authors show that looking at the EU efforts to balance diversity and unity through the lens of state policy is a fruitful way to understand the Union. Instead of conceptualising the EU as being incomparable and unique which is neither an international organisation nor a state, the book argues that EU can be understood as a polity that shares many approaches and strategies with complex and diverse states. As such, its effort to build political structures to accommodate diversity offers lessons to other such polities. The experience of the EU contributes to the understanding of how states and other polities can respond to challenges of diversity, including both the diversity of constituent units or of sub-national groups and identities.

Two second-graders share a special friendship and a superpower that they use together to make the world a better place-for all kids. A heartfelt new picture book combines delightful storytelling with an important message of diversity, acceptance, and

friendship, a perfect offering in today's landscape. Jacob is a second-grader who loves his new family. His biological mom and dad went away when they couldn't take care of him anymore. He's the new kid at school and sometimes mean classmates call him a "stray dog," but his new best friend Jacob tells him it's cool that he's adopted. Author Nneka J. Howell explores the many differences in families, cultures, and friendships in her debut picture book, *The Color of Play*. Jacob and Andrew may not look alike, but together they share a special superpower: they can camouflage. That means to blend in. They camouflage together a lot. And they have each other's backs. That means they stick up for each other. But when a fifth-grader brings a toy water gun to school and invites Jacob to play with it, Andrew stays away. When his friend doesn't want to play with him anymore, Jacob is confused. And he worries that they will no longer be able to use their superpowers together to make the world a better place by scaring away fears and all the bad things. Now Jacob will have to do it all by himself, and he's sad. Andrew explains that playing with toy guns isn't safe for a boy who looks like him. He could get into big trouble. When Jacob's parents find out, he is worried that he has disappointed them and there's no way to camouflage his way out of this one. But instead, they explain to him why his decision was reckless, especially for his friend Andrew. "My parents told me that there are some very mean and selfish people in the world. Sometimes people don't like other people just because they are different. Some people don't like other people because of their skin color. Some people hate others because they think they are better and more powerful. They also told me that it's not cool for anyone to hate another person that they don't even know. My dad tells me all the time that loving people for who they are is important." Nneka J. Howell masterfully weaves an important story for all children and families that acknowledges realistic cultural differences and challenges the concept of color blindness in terms of race, while communicating that love and acceptance wins. She hopes that her storybook provokes healthy conversations in homes, classrooms, and libraries to bridge the divisive gap that exists in today's landscape regarding racial and cultural awareness. *The Color of Play* is her

fourth published book and her debut children's book in a planned four-book series.

While comparative literature is a well-recognized field of study, the notion of comparative arts remains unfamiliar to many. In this fascinating book, Daniel Albright addresses the fundamental question of comparative arts: Are there many different arts, or is there one art which takes different forms? He considers various artistic media, especially literature, music, and painting, to discover which aspects of each medium are unique and which can be translated from one to another. Can a poem turn into a symphony, or a symphony into a painting? Albright explores how different media interact, as in a drama, when speech, stage decor, and music are co-present, or in a musical composition that employs the collage method of the visual arts. Tracing arguments and questions about the relations among the arts from Aristotle's *Poetics* to the present day, he illuminates the understudied discipline of comparative arts and urges new attention to its riches.

The so-called nation states have created ethnic minorities. Also due to migration, cultural diversity is the reality. The multicultural society is strongly reproduced in the schools all over Europe. Cultural diversity in the classroom is increasingly recognized as a potential which should not be neglected. The educational system has, above all, to provide all children with equal opportunities. Experts from Finland, the UK, Hungary, Spain, Greece, Cyprus, and other European states, mostly responsible for teacher education, have contributed to this volume with critical, but constructive remarks on the classroom reality in their countries. This book is valuable reading for academics and practitioners in educational sciences.

"A third of all children in our schools are from racially minoritised

backgrounds. Yet the data on attainment, exclusion, progression and representation indicates that our education system is structurally racist. *Unity in Diversity* explores the unconscious biases at play in our schools and demonstrates how educators can address this by improving representation in the curriculum, staffroom and on the governing/trust board. Drawing on case studies from leaders, this book demonstrates what schools are already doing to create an impactful anti-racist ethos and how these strategies may be applied in practice. Written by an experienced headteacher who has supported a diverse range of schools in improving their race equity, each chapter addresses a different aspect of race inequality and provides practical strategies for overcoming it. This book empowers readers: To acknowledge that systemic race inequality exists in schools and that this necessitates an anti-racist approach To become comfortable talking about race and to create safe spaces for staff and students to engage in discussions about race To address unconscious biases and white fragility and to examine the inequality and underrepresentation of ethnic groups To audit all aspects of educational provision to determine what needs to change and to action and implement this change with lasting impact Schools and teachers can play a major role in eliminating systemic racism in society. This book is an essential read for any teacher, leader, governor or trustee who is restless to address race inequity in our education system, creating a more equal and represented school community"--
