Topics include: GPS, RVSM airspace, featureless terrain navigation, celestial concepts important to pilots, ICAO aircraft registry information, and how to get your flight department ready to fly internationally. Fully illustrated in B/W, and includes glossary and index.

Private Pilot Syllabus Aviation Supplies & Academics

Traces the history of flight inspection, instrument flight procedures, and aeronautical charting from the early days of aviation to 2002.

FAR/AIM 2003 Ingram

The essential tools of the instrument pilot's trade, the charts and approach plates that make flight in today's instrument environment possible.

Meteorological Report Thiago Lopes Brenner

Colonel Kwiatkowski details air operations challenges in Africa, and she discusses how the USAF currently meets or avoids these challenges. She contends that Africa is like the "western frontier" of America's history-undeveloped, brimming with opportunity as well as danger, and that it is a place where standard assumptions often do not apply. A portion of Colonel Kwiatkowski's study is dedicated to illustrating how USAF air transport is really done in Africa on a daily basis. She recommends ways to improve our ability to conduct expeditionary air operations on the continent.

Until recently, the only option for instrument rating training in Europe was a full course requiring up to 200 hours of theoretical knowledge instruction, but the Enroute and Competency-Based Instrument ratings (for aeroplanes only) are a part of a new approach that is supposed to make instrument flying more accessible, because the original courses were designed as part of a commercial course and were necessarily intense. This book is for people who already hold an ICAO IR, and who can simply convert to the EASA version by completing the skill test and demonstrating to the examiner (during the skill test) an adequate knowledge of air law, meteorology and flight planning. It contains all the information needed to answer the examiner's questions, plus tip and tricks not usually taught on such a basic course.
