 Elephants are possibly the most well-known members of the animal kingdom. The enormous size, unusual anatomy, and longevity of elephants have fascinated humans for millenia. *Biology, Medicine, and Surgery of Elephants* serves as a comprehensive text on elephant medicine and surgery. Based on the expertise of 36 scientists and clinical veterinarians, this volume covers biology, husbandry, veterinary medicine and surgery of the elephant as known today. Written by the foremost experts in the field. Comprehensively covers both Asian and African elephants Complete with

taxonomy, behavioral, geographical and systemic information Well-illustrated and organized for easy reference
Equids--zebras, Asses, and Horses
 Hampton Press (NJ)
 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon*
 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times* Book Review • *Time* • NPR • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are

possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (*The Guardian*) and “this generation’s *Silent Spring*” (*The Washington Post*), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. **ONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** “*The Uninhabitable Earth*

is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."—Farhad Manjoo, *The New York Times* "Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."—*The Economist* "Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, *The New York Times* "The book has potential to be this generation's *Silent Spring*."—*The Washington Post* "The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."—Alan Weisman, *The New York Review of Books*

Julius Zebra - Raufen mit den Römern Basic Books

In 1953, 27-year-old Henry Gustave Molaison underwent an experimental "psychosurgical" procedure -- a targeted lobotomy -- in an effort to alleviate his debilitating epilepsy. The outcome was unexpected -- when Henry awoke, he could no longer form new memories, and for the rest of his life would be trapped in the moment. But Henry's tragedy would prove a gift to humanity. As renowned neuroscientist Suzanne Corkin explains in *Permanent Present Tense*, she and her colleagues brought to light the sharp contrast between Henry's crippling memory impairment and his preserved intellect. This new insight that the capacity for remembering is housed in a specific brain area revolutionized the science of memory. The case of Henry -- known only by his initials H. M. until his death in 2008 -- stands as one of the most consequential and widely referenced in the spiraling field of neuroscience. Corkin and her collaborators worked closely with Henry for nearly fifty years, and in *Permanent Present Tense* she tells the incredible story of the life and legacy of this intelligent, quiet, and remarkably good-humored man. Henry never remembered Corkin from one meeting to the next and had only a dim conception of the importance of the work they were doing together, yet he was consistently happy to see her and always willing to participate in her research. His case afforded untold advances in the study of memory, including the discovery that even profound amnesia spares some kinds of learning, and that different

memory processes are localized to separate circuits in the human brain. Henry taught us that learning can occur without conscious awareness, that short-term and long-term memory are distinct capacities, and that the effects of aging-related disease are detectable in an already damaged brain. Undergirded by rich details about the functions of the human brain, *Permanent Present Tense* pulls back the curtain on the man whose misfortune propelled a half-century of exciting research. With great clarity, sensitivity, and grace, Corkin brings readers to the cutting edge of neuroscience in this deeply felt elegy for her patient and friend.

Think you know Julius Zebra? Think again! The handsome, fast-talking gladiatorial champion is sent on a zany new adventure -- to Britannia! Before Julius Zebra can have his freedom, Emperor Hadrian sends him on one last mission. As the newly-named People's Champion, Julius and his friends must travel to a distant land to remind its people of the might of the Roman Empire: Britannia. It'll be just like a vacation! But when the motley menagerie of gladiators arrive in the cold, wet new land, they don't quite receive the welcome they were expecting. In fact, the Britons seem to hate the Romans. But the longer Julius and his friends stay in Britannia, the more they realize that they have a lot more in common with the Britons than they thought. After all, they're all under Hadrian's rule. But what can a ragtag group of fighting animals do about it?

The Optical Unconscious IUCN

An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. "An important, firsthand document for readers who wish to understand this seminal writer and thinker." —Booklist In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. *Memories, Dreams, Reflections* is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII *Sermones ad Mortuos*.

The Terrible Tales of the Teenytinysaurs! Vintage

A day in the life of Derek the Sheep is no forage in the field. Oh no. It's flippin' hard

work, what with all those other pesky animals on the farm! Wherever Derek might be or whatever he might be up to, you can be sure there's something for him to get his wool in a twist about. But the cantankerous Derek is also not one to miss an opportunity - especially if it means more juicy grass - and here is a collection of some of Derek's most heroically daft adventures to be enjoyed time and again. [Grave Misfortune: The USS Indianapolis Tragedy](#) Pearson Education India Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

The Un-private House Eburon Uitgeverij B.V.

The acclaimed, bestselling rock-and-roll biographer delivers the first complete, unexpurgated history of the world's greatest band. The saga of the Rolling Stones is the central epic in rock mythology. From their debut as the intermission band at London's Marquee Club in 1962 through their latest record—setting *Bridges to Babylon* world tour, the Rolling Stones have defined a musical genre and experienced godlike adulation, quarrels, addiction, legal traumas, and descents into madness and death_ while steadfastly refusing to fade away. Now Stephen Davis, the *New York Times* bestselling author of *Hammer of the Gods* and *Walk This Way*, who has followed the Stones for three decades, presents their whole story, replete with vivid details of the Stones' musical successes_and personal excesses. Born

into the wartime England of air-raid sirens, bombing raids, and strict rationing, the Rolling Stones came of age in the 1950s, as American blues and pop arrived in Europe. Among London's most ardent blues fans in the early 1960s was a short blond teenage guitar player named Brian Jones, who hooked up with a lorry driver's only son, Charlie Watts, a jazz drummer. At the same time, popular and studious Michael Philip Jagger—who, as a boy, bawled out a phonetic version of "La Bamba" with an eye-popping intensity that scared his parents—began sharing blues records with a primary school classmate, Keith "Ricky" Richards, a shy underachiever, whose idol was Chuck Berry. In 1962 the four young men, joined by Bill Perks (later Wyman) on bass, formed a band rhythm and blues band, which Brian Jones named the "the Rollin' Stones" in honor of the Muddy Waters blues classic. Using the biography of the Rolling Stones as a narrative spine, *Old God Almost Dead* builds a new, multilayered version of the Stones' story, locating the band beyond the musical world they dominated and showing how they influenced, and were influenced by, the other artistic movements of their era: the blues revival, Swinging London, the Beats, Bob Dylan's Stones-inspired shift from protest to pop, Pop Art and Andy Warhol's New York, the "Underground" politics of the 1960s, Moroccan energy and European orientalism, Jamaican reggae, the Glam and Punk subcultures, and the technologic advances of the video and digital revolution. At the same time, *Old Gods Almost Dead* documents the intense backstage lives of the Stones: the feuds, the drugs, the marriages, and the affairs that inspired and informed their songs; and the business of making records and putting on shows. The first new biography of the Rolling Stones since the early 1980s, *Old Gods Almost Dead* is the most comprehensive book to date, and one of the few to cover all the band's members. Illustrated throughout with photos of pivotal moments, it is a celebration of the Rolling Stones as an often courageous, often foolish gang of artists who not only showed us new worlds, but new ways of living in them. It is a saga as raunchily, vibrantly entertaining as the Stones themselves.

Julius Zebra steigt in den Olymp der irrwitzigen Helden auf Heiliger Zaziki!
Julius Zebra und seine Freunde hätten niemals damit gerechnet, einem waschechten Gott gegenüberzustehen. Und nun bittet der griechische Halbgott Heracles sie sogar um ihre Hilfe! Gegen

eine reiche Belohnung natürlich. Doch Julius und seine unfreiwillige Heldentruppe fragen sich schon bald, worauf sie sich da nur eingelassen haben. Denn ihre Aufgabe führt sie in das gefährliche Labyrinth des Minotaurus, die Höhle eines hundertköpfigen Drachen – und dann sollen sie auch noch in die Unterwelt hinabsteigen! Ob sie dem Reich der Toten ohne göttliche Hilfe wohl wieder entkommen können?

Julius Zebra: Entangled with the Egyptians! Addison-Wesley Professional
Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Biology, Medicine, and Surgery of Elephants Routledge

Julius Zebra is in ancient Egypt on his third madcap adventure. Will he and his friends make it out alive, or will they all end up entombed in a pyramid forever? After being shipwrecked on the shores of Egypt, Julius Zebra can't believe his luck: he's been mistaken for a Horse God and given the royal treatment. Preened and pampered, Julius and his friends are treated to a lavish party and ferried down the River Nile. But when hapless antelope Felix accidentally stumbles upon the Tomb

of Cleopatra, he steals a gem for his rock collection, unknowingly bringing a pharaoh's curse down upon the group. With the Egyptians beginning to realize that Julius is not quite what they thought he was, the zebra gladiator and his friends are soon fighting for their lives in a series of hilarious hijinks.

Diary Of Dorkius Maximus Candlewick Press

The new Equid Action Plan provides current knowledge on the biology, ecology and conservation status of wild zebras, asses, and horses. It specifies what information is lacking, and prioritizes needed conservation actions. The Action Plan also provides chapters on equid taxonomy, genetics, reproductive biology, and population dynamics. These chapters highlight unsolved issues of taxonomy and genetics. They also provide information and insight into the special demographic and genetic challenges of managing small populations. The chapter on disease provides a review of documented equine disease and epidemiology and focuses on priorities for equid conservation health. The final chapter deals with the importance of developing an assessment methodology that explicitly considers the role of equids in ecosystems and the ecological processes that are necessary for ecosystem viability. The approach of combining ecological field studies and ecosystem modeling should prove useful for the scientific management and conservation of wild equids worldwide. These chapters provide research and conservation practitioners with new information and paradigms.

Julius Zebra - Gerangel mit den Griechen Basic Books

Quantum mechanics, the subfield of physics that describes the behavior of very small (quantum) particles, provides the basis for a new paradigm of computing. First proposed in the 1980s as a way to improve computational modeling of quantum systems, the field of quantum computing has recently garnered significant attention due to progress in building small-scale devices. However, significant technical advances will be required before a large-scale, practical quantum computer can be achieved. *Quantum Computing: Progress and Prospects* provides an introduction to the field, including the unique characteristics and constraints of the technology, and assesses the feasibility and implications of creating a functional quantum computer capable of addressing real-world problems. This report considers hardware and software requirements, quantum algorithms, drivers of advances in

quantum computing and quantum devices, benchmarks associated with relevant use cases, the time and resources required, and how to assess the probability of success.

Gary's Garden Springer Nature

Ein neues aufregendes Abenteuer wartet auf den tapferen Gladiator Julius und seine Freunde. Sie werden von Rom nach Britannien geschickt, um dort die gelangweilten Einwohner zu unterhalten. Dort angekommen stellen sie fest, dass die Briten nicht gelangweilt, sondern stinksauer sind. Die halten nämlich nicht viel von den römischen Besatzern. Julius und seine Freunde schlagen sich auf die Seite der Briten, was ihnen wiederum den Unmut der Römer zuzieht. Als Julius dann auch noch in der Arena einem Gegner gegenübersteht, den er niemals erwartet hätte, wird es richtig turbulent ...

Blown to Bits Candlewick Press

The Optical Unconscious is a pointed protest against the official story of modernism and against the critical tradition that attempted to define modern art according to certain sacred commandments and self-fulfilling truths. The account of modernism presented here challenges the vaunted principle of "vision itself." And it is a very different story than we have ever read, not only because its insurgent plot and characters rise from below the calm surface of the known and law-like field of modernist painting, but because the voice is unlike anything we have heard before. Just as the artists of the optical unconscious assaulted the idea of autonomy and visual mastery, Rosalind Krauss abandons the historian's voice of objective detachment and forges a new style of writing in this book: art history

that insinuates diary and art theory, and that has the gait and tone of fiction. The Optical Unconscious will be deeply vexing to modernism's standard-bearers, and to readers who have accepted the foundational principles on which their aesthetic is based. Krauss also gives us the story that Alfred Barr, Meyer Shapiro, and Clement Greenberg repressed, the story of a small, disparate group of artists who defied modernism's most cherished self-descriptions, giving rise to an unruly, disruptive force that persistently haunted the field of modernism from the 1920s to the 1950s and continues to disrupt it today. In order to understand why modernism had to repress the optical unconscious, Krauss eavesdrops on Roger Fry in the salons of Bloomsbury, and spies on the toddler John Ruskin as he amuses himself with the patterns of a rug; we find her in the living room of Clement Greenberg as he complains about "smart Jewish girls with their typewriters" in the 1960s, and in colloquy with Michael Fried about Frank Stella's love of baseball. Along the way, there are also narrative encounters with Freud, Jacques Lacan, Georges Bataille, Roger Caillois, Gilles Deleuze, and Jean-François Lyotard. To embody this optical unconscious, Krauss turns to the pages of Max Ernst's collage novels, to Marcel Duchamp's hypnotic Rotoreliefs, to Eva Hesse's luminous sculptures, and to Cy Twombly's, Andy Warhol's, and Robert Morris's scandalous decoding of Jackson Pollock's drip pictures as "Anti-Form." These artists introduced a new set of values into the field of twentieth-century art, offering ready-made images of obsessional fantasy in place of modernism's intentionality and unexamined compulsions.

Consciousness and the Brain cbj Verlag
Charming, hilarious and super-inventive comic strip adventures from Gary Northfield, creator of Derek the Sheep. Is it possible to fly to the moon in a bubble of snot? Can you really have an argument with a cloud? Are there bogey monsters at the bottom of the garden? All these questions and more are explored in an hysterical and charming collection of comic strip adventures, following a teeny tiny gang of dinosaurs as they wind each other up and muddle their way through the myths and mysteries of prehistoric life.
