The beloved New York Times bestselling author reflects on home, family, friendships and writing in this deeply personal collection of essays. "The elegance of Patchett's prose is seductive and inviting: with Patchett as a guide, readers will really get to grips with the power of struggles, failures, and triumphs alike."
—Publisher's Weekly "Any story that starts will also end." As a

writer, Ann Patchett knows what the outcome of her fiction will be. Life, however, often takes turns we do not see coming. Patchett ponders this truth in these wise essays that afford a fresh and intimate look into her mind and heart. At the center of *These Precious Days* is the title essay, a surprising and moving meditation on an unexpected friendship that explores

"what it means to be seen, to find someone with whom you can be your best and most complete self." When Patchett chose an early galley of actor and producer Tom Hanks' short story collection to read one night before bed, she had no idea that this single choice would be life changing. It would introduce her to a remarkable woman—Tom's brilliant assistant Sooki—with whom she

would form a profound bond that held monumental consequences for them both. A literary alchemist, Patchett plumbs the depths of her experiences to create gold: engaging and moving pieces that are both self-portrait and landscape, each vibrant with emotion and rich in insight. Turning her writer's eye on her own experiences, she transforms the private into the universal, providing us

all a way to look at our own worlds anew, and reminds how fleeting and enigmatic life can be. From the enchantments of Kate DiCamillo's children's books (author of *The Beatryce Prophecy*) to youthful memories of Paris; the cherished life gifts given by her three fathers to the unexpected influence of Charles Schultz's Snoopy; the expansive vision of Eudora Welty

to the importance of knitting, Patchett connects life and art as she illuminates what matters most. Infused with the author's grace, wit, and warmth, the pieces in *These Precious Days* resonate deep in the soul, leaving an indelible mark—and demonstrate why Ann Patchett is one of the most celebrated writers of our time. *History of the Towns of New Milford and*

 University Press of Kentucky
 Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: The Onion's

compendium of all things known. Replete with an astonishing assemblage of facts, illustrations, maps, charts, threats, blood, and additional fees to edify even the most simple-minded book-buyer, The Onion Book of Known Knowledge is packed with valuable information -- such as the life stages of an Aunt; places to kill one's self in Utica, New York; and the dimensions of a female bucket, or "pail." With

hundreds of entries for all 27 letters of the alphabet, The Onion Book of Known Knowledge must be purchased immediately to avoid the sting of eternal ignorance.

Cars, Conduits and Kampongs offers a wide panorama of the modernization of Indonesian cities between 1920 and 1960. In examining the multiple responses to innovations introduced by Western colonialism, the contributors demonstrate how modernization, urbanization, and decolonization were intrinsically linked. A full text Open Access version will also

become available. *The Challenge of Crime in a Free Society* Government Printing Office tion addressed by this analysis centers on the reciprocal relation between 1 household domestic and market work efforts. It should be obvious by now that this chapter is not concerned explicitly with the contributions of individual members to household or market activity, nor does it

examine the mechanisms by which work tasks or time is apportioned among them. To reiterate, households per se are the unit of analysis; the division of labor within, with respect to either household or market activities, is ignored. In this chapter, one must pretend that the social relations within the household productive unit, which critically shape both the nature of work and its

allocation, are hidden from view. To return to the earlier metaphor, households establish a total household "pie," made up of all the market and domestic chores that they will undertake and the time required for them. Only after that "pie" is created can it be sliced and the pieces doled out to individual members. 2 The household and market pie defined and described here can be

roughly conceptualized as the total productive capacity of the household, or as the result of a pooling of individual talents and resources. Indeed, were a measure of the time available for leisure incorporated into the measure of the pie, the household's full income (budget) constraint (i. e. , the total productive potential of the household) could be described.

Environmental Technologies to Treat Nitrogen Pollution
Harper Collins
The shocking account of how a unit of average middle-aged Germans became the cold-blooded murderers of tens of thousands of Jews.
Rural Financial Markets in Developing Countries
BRILL
Suelette Dreyfus and her co-author, WikiLeaks founder Julian Assange, tell the extraordinary true story of

the computer underground, and the bizarre lives and crimes of an elite ring of international hackers who took on the establishment. Spanning three continents and a decade of high level infiltration, they created chaos amongst some of the world's biggest and most powerful organisations, including NASA and the US military. Brilliant and obsessed, many of them found themselves addicted to

hacking and phreaking. Some descended into drugs and madness, others ended up in jail. As riveting as the finest detective novel and meticulously researched, Underground follows the hackers through their crimes, their betrayals, the hunt, raids and investigations. It is a gripping tale of the digital underground. **New Guinea Vegetation** Harper Perennial Until recently

the use of agricultural credit as a developmenta l tool seemed clear and straightforward. Most concerned people believed that increases in the volume of cheap credit were necessary to boost agricultural production, and that the rural poor could be brought into the mainstream of development through supervised credit programs. It seemed that certain ideal

types of rural credit institutions offered the promise of meeting farmers' credit needs, and that experience in the industrialized countries with cooperatives and specialized agricultural finance institutions could be effectively transplanted to low-income countries. This collection of readings highlights facets of rural financial markets that have often been neglected in discussions of agricultural credit in developing countries. It moves beyond a narrow concern with the simple provision of credit to a broad consideration of the performance of rural financial markets and of ways to improve the quality and range of financial services for low-income farmers. It reflects new thinking on the design, administration, evaluation and policy framework of rural finance and credit programs in developing countries.

Chicago Review Press
Pulitzer Prize Finalist | New York Times Bestseller | A Read with Jenna Today Show Book Club Pick | A New York Times Book Review Notable Book | TIME Magazine's 100 Must-Read Books of the Year
Named one of the Best Books of the Year by NPR, The

Washington Post; O: The Oprah Magazine, Real Simple, Good Housekeeping, Vogue, Refinery29, and BuzzFeed From Ann Patchett, the #1 New York Times bestselling author of Commonwealth, comes a powerful, richly moving story that explores the indelible bond between two siblings, the house of their childhood, and a past that will not let them go. The Dutch House is the story of a

paradise lost, a tour de force that digs deeply into questions of inheritance, love and forgiveness, of how we want to see ourselves and of who we really are. At the end of the Second World War, Cyril Conroy combines luck and a single canny investment to begin an enormous real estate empire, propelling his family from poverty to enormous wealth. His first order of business is to buy the Dutch

House, a lavish estate in the suburbs outside of Philadelphia. Meant as a surprise for his wife, the house sets in motion the undoing of everyone he loves. The story is told by Cyril's son Danny, as he and his older sister, the brilliantly acerbic and self-assured Maeve, are exiled from the house where they grew up by their stepmother. The two wealthy siblings are thrown back

into the poverty their parents had escaped from and find that all they have to count on is one another. It is this unshakeable bond between them that both saves their lives and thwarts their futures. Set over the course of five decades, *The Dutch House* is a dark fairy tale about two smart people who cannot overcome their past. Despite every outward sign of success, Danny and Maeve are only truly

comfortable when they're together. Throughout their lives they return to the well-worn story of what they've lost with humor and rage. But when at last they're forced to confront the people who left them behind, the relationship between an indulged brother and his ever-protective sister is finally tested.

The Homestead

XRX Books
The books in the Florida and the Caribbean

Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the

tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers

the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment

for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program. *Critical Thinking* HarperCollins Integrating electronics into clothing is a major new concept, which opens up a whole array of multi-functional, wearable electro-textiles for sensing/monitoring body functions, delivering communication facilities, data transfer,

individual environment control, and many other applications. With revolutionary advancements occurring at an unprecedented rate in many fields of science and electronics the possibilities offered by wearable technologies are tremendous and widespread. These advancements will transform the world and will soon begin to permeate into commercial products. The

first section of the book discusses the materials and devices used in the field, including electrostatically generated nanofibres, electroceramic fibres and composites and electroactive fabrics. It summarizes recent developments in electrically conductive fabric structures and puts together a few theoretical treatments of the electro-mechanical properties of various fabric

structures. The next section reviews topics related to wearable photonics such as fibre optic sensors and integrated smart textile structures, the developments in various flexible photonic display technologies as well as looking at current communication apparel and optical fibre fabric displays. Next the book focuses on integrated structures and system architectures.

Finally the issues facing a fashion designer working with wearables are explored. Wearable electronics and photonics covers many aspects of the cutting-edge research and development into this exciting field and provides a window through which only a small portion of the exciting emerging technology can be seen. With contributions from a panel of international experts in the

field this is an essential guide for all electrical, textile and biomedical engineers as well as academics and fashion designers. - Stay one step ahead of the industry on this hot topic - Evaluates the major new concept of integrating electronics into clothing - Explores future trends for fashion and specialist clothing
The Wonder Book of Knowledge
Elsevier
Science & Technology

Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge." -- Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern ** This heavily illustrated crash course in art history is revised and updated. This

second edition of Carol Strickland's The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible—even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

The Damnation of Theron Ware or Illumination
Legare Street Press
NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT-- OVERSTOCK SALE --
Significantly reduced list price This edition of North Korea: A Country Study replaces the previous edition, published in 1994. Like its predecessor, this study attempts to review the history and treat in a concise

manner the dominant social, political, economic, and military aspects of contemporary North Korea. Sources of information included books, scholarly journals, foreign and domestic newspapers, official reports of governments and international organizations, and numerous periodicals and Web sites on Korean and East Asian affairs. A word of caution is necessary,

however. Even though more information is forthcoming from and about North Korea since it became a member of the United Nations in 1991, the government of a closed society such as that of North Korea controls information for internal and external consumption, limiting both the scope of coverage and its dissemination. A chronology of major historical events is provided at

the front of the book (see table A). Chapter bibliographies appear at the end of the book, and brief comments on some of the more valuable and enduring sources recommended for further reading appear at the end of each chapter. A glossary also is included. Spellings of place-names in the book are in most cases those approved by the U.S. Board on Geographic Names (BGN); spellings of

some of the names, however, cannot be verified, as the BGN itself notes. Readers of this book are alerted that because the BGN recognizes the Sea of Japan as the formal name of the body of water to the east of the Korean Peninsula, this book also uses that term.. Similarly, the Yellow Sea is identified as the West Sea. The McCune–Reisc hauer system of transliteration has been

employed except for the names of some prominent national and historical figures. Thus, Kim Il-song is rendered as Kim Il Sung, and Kim Chong-il is rendered as Kim Jong Il. The names of Korean authors writing in English are spelled as given in the original publication. Measurements are given in the metric system. A conversion table (see table B) is provided to

assist readers who are unfamiliar with metric measurements. Other related items: Foreign Countries collection can be found here: <https://bookstore.gpo.gov/catalog/international-foreign-affairs/foreign-country-studies> The body of the text reflects information available as of August 1, 2007. Certain other parts of the text, however, have been updated: the Chronology and Introduction

discuss significant events that have occurred since the completion of research, and the Country Profile and portions of some chapters include updated information as available. *The Art of Prehistoric Textile Making* Harvard University Press Report presents a series of analyses and recommendations for fostering the role of culture for sustainable development. Drawing on a

global survey implemented with nine regional partners and insights from scholars, NGOs and urban thinkers, the report offers a global overview of urban heritage safeguarding, conservation and management, as well as the promotion of cultural and creative industries, highlighting their role as resources for sustainable urban development. Report is intended as a policy

framework document to support governments in the implementation of the 2030 Agenda for Sustainable Urban Development and the New Urban Agenda. Ordinary Men International and Area Studies University of California B El This timely revision will feature the latest Internet issues and provide an updated comprehensive look at social and ethical issues in computing

from a computer science perspective.

UNESCO Publishing
8 knitting patterns and 10 musings that celebrate the knitter. This book includes knitted colorwork patterns using common knitting terms and abbreviations for the design elements. The words: knit, purl and yarn are some of the words used in these sport- and

worsted-weight patterns which include a cowl, hat, pillow, sweater, skirt, tote bag, lanyard and poncho. All colorwork patterns are charted and patterns have multiple sizes and variations. This is the pattern book for a lover of all things knitting. A little kitschy, a little colorful but always fun!
Culture: urban future
University of North Georgia
For Irish Americans as well as for

Chicago's other ethnic groups, the local parish once formed the nucleus of daily life. Focusing on the parish of St. Sabina's in the southwest Chicago neighborhood of Auburn-Gresham, Eileen McMahon takes a penetrating look at the response of Catholic ethnics to life in twentieth-century America. She reveals the role the parish church played in achieving a cohesive and vital ethnic

neighborhood and shows how ethno-religious distinctions gave way to racial differences as a central point of identity and conflict. For most of this century the parish served as an important mechanism for helping Irish Catholics cope with a dominant Protestant-American culture. Anti-Catholicism in the society at large contributed to dependency on parishes and to a desire for

separateness from the American mainstream. As much as Catholics may have wanted to insulate themselves in their parish communities, however, Chicago demographics and the fluid nature of the larger society made this ultimately impossible. Despite efforts at integration attempted by St. Sabina's liberal clergy, white parishioners viewed black migration into their neighborhood as a threat to

their way of life and resisted it even as they relocated to the suburbs. The transition from white to black neighborhoods and parishes is a major theme of twentieth-century urban history. The experience of St. Sabina's, which changed from a predominantly Irish parish to a vibrant African-American Catholic community, provides insights into this social trend and

suggests how the interplay between faith and ethnicity contributes to a resistance to change.
