Brings together the work of leading classicists and philosophers in order to show the vitality and development of Epicureanism after Epicurus, and especially the dynamic interplay between tradition and innovation.

\*Figures of Speech Used in the Bible\* is an extensive reference book and study guide for serious Bible scholars. Written by famous theologian E.W. Bullinger, this dictionary of phrases classifies them into three distinct divisions: figures involving omission, addition, and change. He further

breaks down whether figures affect the words themselves, the sense, meaning, order, or application of words. It includes both Greek and English translations of the figures in question, examples and illustrations, a detailed table of contents, appendices, and several indexes, including indexes of figures in both Greek and English, of subjects, structures, and texts, and of Hebrew and Greek words explained. This comprehensive study tool should be considered necessary for any serious Bible scholar or theologian. British clergyman ETHELBERT WILLIAM BULLINGER (1837-1913) was one of the most respected Bible scholars of the 19th century. He is author of numerous works including \*Commentary on Revelation\*, \*Great Cloud of Witnesses\*, and \*How to Enjoy the Bible\*.

In a series of enlightening and wide-ranging discussions, all published here for the first time, Chomsky radically reinterprets the events of the past three decades, covering topics from foreign policy during Vietnam to the decline of welfare under the Clinton administration. And as he elucidates the connection between America's imperialistic foreign policy and the decline of domestic social services, Chomsky also discerns the necessary steps to take toward social change. With an eye to political activism and the media's role in popular struggle, as well as U.S. foreign and domestic policy, *Understanding Power* offers a sweeping critique of the world around us and is definitive Chomsky. Characterized by Chomsky's accessible and informative style, this is the ideal book for those new

to his work as well as for those who have been listening for years.

For more than 50 years, Giacomo Debenedetti's October 16, 1943 has been considered one of the best accounts of the shockingly brief roundup of 1000 Roman Jews from the oldest Jewish community in Europe for the gas chambers of Auschwitz. Completed a year after the event, Debenedetti's intimate details and vivid glimpses into the lives of the victims are especially poignant because Debenedetti himself was there to witness the event, which forced him and his entire family into hiding. This collection also includes Eight Jews, the companion piece to October 16, 1943, which was written in response to testimony about the Ardeatine Cave Massacres of March 24, 1944. In this essay, Debenedetti offers insights into the grisly horror and into assumptions about racial equality. Both of these works appear together, giving American readers a glimpse into the extraordinary mind of the man who was Italy's foremost critic of 20th century literature.

By the end of World War II, religion appeared to be on the decline throughout the United States and Europe. Recent world events had cast doubt on the relevance of religious belief, and modernizing trends made religious rituals look out of place. It was in this atmosphere that the careers of Scholem, Eliade, and Corbin--the twentieth century's legendary scholars in the respective fields of Judaism, History of Religions, and Islam--converged and ultimately revolutionized how people thought about religion. Between 1949 and 1978, all three lectured to Carl Jung's famous Eranos circle in Ascona, Switzerland, where each in his own way came to identify the symbolism of mystical experience as a central element of his monotheistic tradition. In this, the first book ever to compare the paths taken by these thinkers, Steven Wasserstrom explores how they overturned traditional approaches to studying religion by de-emphasizing law, ritual, and social history and by extolling the role of myth and mysticism. The most controversial aspect of their theory of religion, Wasserstrom argues, is that it minimized the binding character of moral law associated with monotheism. The author focuses on the lectures delivered by Scholem, Eliade, and Corbin to the Eranos participants, but also shows how

these scholars generated broader interest in their ideas through radio talks, poetry, novels, short stories, autobiographies, and interviews. He analyzes their conception of religion from a broadly integrated, comparative perspective, sets their distinctive thinking into historical and intellectual context, and interprets the striking success of their approaches.

This volume proposes a fresh strategy for ecumenical engagement - 'Receptive Ecumenism' - that is fitted to the challenges of the contemporary context and has already been internationally recognised as making a distinctive and important new contribution to ecumenical thought and practice. Beyond this, the volume tests and illustrates this proposal by examining what Roman Catholicism in particular might fruitfully learn from its ecumenical others. Challenging the tendency for ecumenical studies to ask, whether explicitly or implicitly, 'What do our others need to learn from us?', this volume presents a radical challenge to see ecumenism move forward into action by highlighting the opposite question 'What can we learn with integrity from our others?' This approach is not simply ecumenism as shared mission, or ecumenism as problem-solving and incremental agreement but ecumenism as a vital long-term programme of individual, communal and structural conversion driven, like the Gospel that inspires it, by the promise of conversion into greater life and flourishing. The aim is for the Christian traditions to become more, not less, than they currently are by learning from, or receiving of, each other's gifts. The 32 original essays that have been written for this unique volume explore these issues from a wide variety of denominational and disciplinary perspectives, drawing together ecclesiologists, professional ecumenists, sociologists, psychologists, and organizational experts.

Collects aphorisms, essays, stories, and anecdotes, and enacts the author's interest in showing how attention to "traces" can serve as a mode of philosophizing. In an example of how the literary can become a privileged medium for philosophy, his chief philosophical invention is to begin with what gives an observer pause.

La religiosità nel mondo nel suo complesso è in aumento. Non in Occidente, dove la

fede si personalizza e spesso è vissuta anche come non appartenenza a una Chiesa, ma a una identità, a una tradizione da proteggere contro le «invasioni». La ricerca di ciò che unisce, del dialogo fra credenti di varie religioni e non credenti, del confronto sui valori comuni può portare alla condivisione di un'etica universale per costruire insieme una via di salvezza spirituale e materiale del pianeta. Questo libro dà voce a chi crede che questa via sia percorribile, senza chiudersi dentro dogmi o pregiudizi secolari, sia esso cristiano, musulmano, ebreo, di altre fedi o di culture non religiose. La reciproca conoscenza può solo aiutare tutti- credenti e non credenti, laici e uomini di religione - a stabilire una convivenza democratica arricchita dall'apporto di comprensione, volontà di pace, apertura al futuro. Queste pagine, esplorazione corale del sacro nel mondo, vogliono essere un passo in questa direzione.

This is a study of Greek mythology in relation to its original contexts. Part one deals with the contexts in which myths were narrated: the home, public festivals, the lesche. Part two, the heart of the book, examines the relation between the realities of Greek life and the fantasies of mythology: the landscape, the family and religion are taken as case-studies. Part three focuses on the function of myth-telling, both as seen by the Greeks themselves and as perceived by later observers. The author sees his role as that of a cultural historian trying to recover the contexts and horizons of expectation which simultaneously make possible and limit meaning. He seeks to demonstrate how the seemingly endless variations of Greek mythology are a product of a particular community, situated in a particular landscape, and with these particular institutions.

Conceiving of Christianity as a "worldview" has been one of the most significant events in the church in the last 150 years. In this new book David Naugle provides the best discussion yet of the history and contemporary use of worldview as a totalizing approach to faith and life. This informative volume first locates the origin of worldview in the writings of Immanuel Kant and surveys the rapid proliferation of

its use throughout the English-speaking world. Naugle then provides the first study ever undertaken of the insights of major Western philosophers on the subject of worldview and offers an original examination of the role this concept has played in the natural and social sciences. Finally, Naugle gives the concept biblical and theological grounding, exploring the unique ways that worldview has been used in the Evangelical, Orthodox, and Catholic traditions. This clear presentation of the concept of worldview will be valuable to a wide range of readers.

'The natural sympathy and understanding of people everywhere must be the soil in which the new humanism can thrive.' For Daisaku Ikeda, whose words these are, education has long been one of the fundamental priorities of his work and teaching. His emphasis on the intellectual legacy bequeathed to humanity by the great teachers of civilization is in this volume encapsulated by the notion of a 'new humanism': a significant residue of wisdom that in the right circumstances may be passed on to future generations, expanding horizons, making connections between different cultures and encouraging fresh insights and new discoveries across the globe. These circumstances are perhaps most fully realised in the context of universities. In promoting his core values of education and peace, the author has delivered lectures and speeches at more than twenty-five academies, colleges and research institutes worldwide. This stimulating collection, which includes the author's most recent lectures, ranges widely across topics as diverse as art, religion, culture and time, and draws creatively on the sages of ancient India, China and Japan as well as on visionary thinkers from every nation, including Tolstoy, Victor Hugo and Gandhi.

More than simply a book about mysticism, Christophany offers the attentive reader a way to experience the mystical depths of life. To know Jesus is to experience Jesus mystical life, in particular to share in divinity, and to know God as "Abba." What happened in the life of Christ will happen in us and, in our transformed lives, God lives in us without us losing our own being.

Benjamin G. Kohl (1938-2010) taught at Vassar College from 1966 till his retirement as Andrew W. Mellon Professor of the Humanities in 2001. His doctoral research at The Johns Hopkins University was directed by Frederic C. Lane, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405* (1998), and *Culture and Politics in Early Renaissance Padua* (2001), and the online database *The Rulers of Venice, 1332-1524* (2009). The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars. *Traces* Cambridge University Press  
Described as the most conspicuous voice in Italian poetry after Eugenio Montale, Mario Luzi created for himself an unmistakably individual rhythm, idiom, and ethos ...Particular to Luzi's poetry is the quality of lyricism, and tone of

conversational intimacy, of which For the Baptism of Our Fragments represents the crowing achievement of a long poetic career which began with his first book of poems in 1935.

**The Shroud at the Court** analyses, through various essays characterized by a multidisciplinary and diachronic perspective, the strict ties created between the Shroud and the Savoy court from the fifteenth to twentieth centuries. Presented as proof of the divine legitimacy of Savoy lineage, the Shroud (of which the Savoy dynasty came into possession in 1453, keeping it first in Chambéry and then from 1578 in Turin) was central to their propagandistic strategies. The court - its spaces, protagonists, and rituals - became the natural setting for a relationship reinforced over time through customs, ceremonies, and images intended to celebrate the excellence of the Savoy, both within their own state and in Europe's "society of princes". Contributors are Paola Caretta, Paolo Cornaglia, Paolo Cozzo, Davide De Franco, Bernard Dompnier, Laura Gaffuri, Pierangelo Gentile, Luisella Giachino, Andrea Merlotti, Frédéric Meyer, Andrea Nicolotti, Almudena Pérez de Tudela, Laurent Ripart, Alessandro Serra and Franca Varallo. *On the Problem of Empathy* Cambridge University Press

In this groundbreaking work, Carlo Sini, one of Italy's leading contemporary philosophers, brings American pragmatism to the Milan school of phenomenology. Appearing in English for the first time, this book explores the constitutive role of alphabetic writing in the emergence of dominant forms of knowledge in the Western world (philosophy, mathematics, science, and historiography). Taking stock of the contingent nature of what are held as logical truths, he offers an ethical framework for considering different ways of thinking about writing, focusing on possibilities involving "practice" as a basis for a renewal of theoretical philosophy. Such a framework, Sini argues, opens the door for more productive and ethical communication with non-Western cultures, and indeed for a reconsideration of forms of knowledge beyond mere writing.
