A Finalist for the Spirited Award for Best New Book on Drinks Culture, History or Spirits “At last, the feminist history of booze we’ve been waiting for!” —Amy Stewart, author of *The Drunken Botanist*
The James Beard Award-winning history of women drinking through the ages
Strawberry daiquiris. Skinny martinis. Vodka sodas with lime. These are the cocktails that come in sleek-stemmed glasses, bright colors and fruity flavors—these are the *Girlly Drinks*. From the earliest days of civilization, alcohol has been at the center of social rituals and cultures worldwide. But when exactly did drinking become a gendered act? And why have bars long been

considered “places for men” when, without women, they might not even exist? With whip-smart insight and boundless curiosity, *Girlly Drinks* unveils an entire untold history of the female distillers, drinkers and brewers who have played a vital role in the creation and consumption of alcohol, from ancient Sumerian beer goddess Ninkasi to iconic 1920s bartender Ada Coleman. Filling a crucial gap in culinary history, O’Meara dismantles the long-standing patriarchal traditions at the heart of these very drinking cultures, in the hope that readers everywhere can look to each celebrated woman in this book—and proudly have what she’s having.

Eugénie Grandet is a novel first published in 1833 by French author

Honoré de Balzac. While he was writing it he conceived his ambitious project, *La Comédie humaine*, and almost immediately prepared a second edition, revising the names of some of the characters so that Eugénie Grandet then fitted into the section: *Scenes from provincial life (Scènes de la vie de province)* in the *Comédie*. He dedicated the edition to Maria Du Fresnay, who was then his lover and was the mother of his daughter, Marie-Caroline Du Fresnay. Eugénie Grandet is set in the town of Saumur, which should have been familiar to Balzac since he grew up in Tours about 35 miles away. The two towns are both on the Loire, with châteaux, and of similar size. Tours was much more important historically and politically, which may explain why Balzac

allows the impression in the opening that the Grandet residence was Saumur's most important building. Though Balzac grew up in the aftermath of the Revolution, he came to adulthood in Paris under the restored Bourbon monarchy (Louis XVIII & Charles X) and wrote most of what we know under the July Monarchy (1830-1848) of Louis Philippe, which came to power when the revolution of 1830 deposed the Bourbon monarchy. It is worth noting that though the Republic had replaced the Livre with the Franc (of equal value), both continued to circulate, as did the Louis. (wikipedia.org) About the author: Honoré de Balzac born Honoré Balzac; (20 May 1799 - 18 August 1850) was a French novelist and playwright. The novel sequence *La Comédie humaine*, which

presents a panorama of post-Napoleonic French life, is generally viewed as his magnum opus. Owing to his keen observation of detail and unfiltered representation of society, Balzac is regarded as one of the founders of realism in European literature. He is renowned for his multi-faceted characters; even his lesser characters are complex, morally ambiguous and fully human. Inanimate objects are imbued with character as well; the city of Paris, a backdrop for much of his writing, takes on many human qualities. His writing influenced many famous writers, including the novelists Émile Zola, Charles Dickens, Marcel Proust, Gustave Flaubert, and Henry James, and filmmakers François Truffaut and Jacques Rivette. Many of Balzac's works

have been made into films and continue to inspire other writers. James called him "really the father of us all." An enthusiastic reader and independent thinker as a child, Balzac had trouble adapting to the teaching style of his grammar school. His willful nature caused trouble throughout his life and frustrated his ambitions to succeed in the world of business. When he finished school, Balzac was apprenticed in a law office, but he turned his back on the study of law after wearying of its inhumanity and banal routine. Before and during his career as a writer, he attempted to be a publisher, printer, businessman, critic, and politician; he failed in all of these efforts. *La Comédie Humaine* reflects his real-life difficulties, and includes scenes from his own

experience. Balzac suffered from health problems throughout his life, possibly owing to his intense writing schedule. His relationship with his family was often strained by financial and personal drama, and he lost more than one friend over critical reviews. In 1850, Balzac married Ewelina Hańska (née Contessa Rzewuska), a Polish aristocrat and his longtime love. He died in Paris six months later. (wikipedia.org)

Wars have been fought over it, revolutions have been spurred by it, national diets have been based on it, economies have depended on it, and the settlement of North America was driven by it. Cod, it turns out, is the reason Europeans set sail across the Atlantic,

and it is the only reason they could. What did the Vikings eat in icy Greenland and on the five expeditions to America recorded in the Icelandic sagas? Cod -- frozen and dried in the frosty air, then broken into pieces and eaten like hardtack. What was the staple of the medieval diet? Cod again, sold salted by the Basques, an enigmatic people with a mysterious, unlimited supply of cod. Cod is a charming tour of history with all its economic forces laid bare and a fish story embellished with great gastronomic detail. It is also a tragic tale of environmental failure, of depleted fishing stocks where once the cod's numbers were legendary. In this deceptively whimsical biography of a fish, Mark Kurlansky brings a thousand years of human civilization into

captivating focus.

The Drew Barrymore Show! A

remarkable portrait of American food before World War II, presented by the New York Times-bestselling author of *Cod and Salt*. Award-winning New York Times-bestselling author Mark Kurlansky takes us back to the food and eating habits of a younger America: Before the national highway system brought the country closer together; before chain restaurants imposed uniformity and low quality; and before the Frigidaire meant frozen food in mass quantities, the nation's food was seasonal, regional, and traditional. It helped form the distinct

character, attitudes, and customs of those who ate it. In the 1930s, with the country gripped by the Great Depression and millions of Americans struggling to get by, FDR created the Federal Writers' Project under the New Deal as a make-work program for artists and authors. A number of writers, including Zora Neale Hurston, Eudora Welty, and Nelson Algren, were dispatched all across America to chronicle the eating habits, traditions, and struggles of local people. The project, called "America Eats," was abandoned in the early 1940s because of the World War and never completed. *The Food of a Younger Land* unearths this forgotten literary and historical treasure and brings it to exuberant life. Mark Kurlansky's brilliant book captures these remarkable stories, and combined

with authentic recipes, anecdotes, photos, and his own musings and analysis, evokes a bygone era when Americans had never heard of fast food and the grocery superstore was a thing of the future. Kurlansky serves as a guide to this hearty and poignant look at the country's roots. From New York automats to Georgia Coca-Cola parties, from Arkansas possum-eating clubs to Puget Sound salmon feasts, from Choctaw funerals to South Carolina barbecues, the WPA writers found Americans in their regional niches and eating an enormous diversity of meals. From Mississippi chittlins to Indiana persimmon puddings, Maine lobsters, and Montana beavertails, they recorded the curiosities, commonalities, and communities of American food.

The “political cookbook that has the food world buzzing” (Forbes, Editors’ Pick) features 50+ recipes, short essays, interviews, and quotes from some of the best bakers, activists, and outspoken women in our country today. The 2016 election. The January 6th insurrection. Impeachment, twice. The overturning of Roe v. Wade. For many women, baking now has a new meaning. It’s an outlet for expressing our feelings about the current state of American politics and culture. It’s a way to deal with our stress and anxiety, and, yes, rage and fury. Rage Baking offers more than 50 cookie, cake, tart, and pie recipes—with beautiful photography by Jerelle Guy—to help vent these emotions. And it goes

further. Inside you'll find inspirational essays, reflections, and interviews with well-known bakers and impassioned feminists and activists to help motivate you to act and organize in your communities. Be inspired with recipes, such as: -Oatmeal Cookies from Ruth Reichl -Lemon Bars from Vallery Lomas - Swedish Visiting Cake from Dorie Greenspan -Rum Raisin Brownies from Julia Turshen -Root Beer Cake with Chocolate-Root Beer Glaze from Carla Hall -Classic Southern Pecan Pie from Cecile Richards -Almond and Chocolate Leche Cake from Pati Jinich -Chocolate Cherry Biscotti from Grace Young -And essays, interviews, and poetry by Ani DiFranco, Jennifer Finney Boylan, Elle Simone, Hali Bey Ramdene, and Von Diaz, among others. "Timely" (The New

York Times), fun, and creative, this cookbook speaks to a wide range of bakers who are looking for new ways to use their sweetest skills to combine food and activism. Rage Baking brings women together with humor and passion to defend, resist, and protest. PROCEEDS OF THIS BOOK GO TO EMILY'S LIST TO SUPPORT WOMEN CANDIDATES.

Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

 French Kids Eat Everything is a wonderfully wry account of how Karen Le Billon was able to alter her children's deep-rooted, decidedly unhealthy North American eating habits while they were all living in France. At once a memoir, a cookbook, a how-to handbook, and a delightful exploration of how the French manage to feed children without endless battles and struggles with pickiness, French Kids Eat Everything features recipes, practical tips, and ten easy-to-follow rules for raising happy and healthy young eaters—a sort of French Women Don't Get Fat meets Food Rules.

 Brad Schiller's text, The Macro Economy Today, 12e, is noted for three great strengths: readability, policy orientation, and pedagogy. His accessible writing style engages students and brings some of the excitement of domestic and global economic news into the classroom. Schiller emphasizes how policymakers must choose between government intervention and market reliance to resolve the core issues of what, how, and for whom to produce. This strategic

choice is highlighted throughout the full range of micro, macro, and international issues, and every chapter ends with a policy issue that emphasizes the markets vs. government dilemma. Schiller teaches economics in a relevant context, filling his chapters with the real facts and applications of economic life. Schiller is also the only principles text that presents all macro theory in the single consistent context of the AS/AD framework.

"Ismail Kadare's readers are astonished every year when the Nobel committee overlooks him. . . . A Girl in Exile, published in Albanian in 2009, may rekindle the worldwide hopes." —The New York Times Book Review
During the bureaucratic machinery of Albania's 1945–1991 dictatorship, playwright Rudian Stefa is called in for questioning by the Party Committee. A girl—Linda

B.—has been found dead, with a signed copy of his latest book in her possession. He soon learns that Linda’s family, considered suspect, was exiled to a small town far from the capital. Under the influence of a paranoid regime, Rudian finds himself swept along on a surreal quest to discover what really happened to Linda B. “At a time when parts of the world are indulging nostalgia for communism, Kadare’s novel confronts the infuriating impossibility of art in an autocratic, anti-individualist system.” —The Washington Post “A Girl in Exile confirms Kadare to be the best writer at work today who remembers—almost aggressively so, refusing to forget—European totalitarianism.” —The New Republic

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the

spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

There is hardly any book that aims at solving problems typically encountered in the laser field, and this book intends to fill the void. Following some initial exercises related to general aspects in laser physics (Chapt. 1), the subsequent problems are organized along the following topics: (i) Interaction of radiation with matter either made of atoms or ions, weakly interacting with surrounding species, or made of more complicated elements such as molecules

or semiconductors (Chapters 2 and 3). (ii) Wave propagation in optical media and optical resonators (Chapters 4 and 5). (iii) Optical and electrical pumping processes and systems (Chapter 6): (iv) Continuous wave and transient laser behaviors (Chapters 7 and 8). (v) Solid-state, dye, semiconductor, gas and X-ray lasers (Chapters 9 and 10). (vi) Properties of the output beam and beam transformation by amplification, frequency conversion and pulse compression or expansion (Chapters 11 and 12). Problems are proposed here and solved following the contents of Orazio Svelto's *Principles of Lasers* (fourth edition; Plenum Press, New York, 1998). Whenever needed, equations and figures of the book mentioned above are currently used with an appropriate

reference [e. g. , Eq. (1. LI) of the book is referred to as Eq. (LI. 1) of PL]. One can observe, however, that the types of problems proposed and discussed are of general validity and many of these problems have actually been suggested by our own long-time experience in performing theoretical and experimental researches in the field.

When a young Algerian named Meursault kills a man, his subsequent imprisonment and trial are puzzling and absurd. The apparently amoral Meursault--who puts little stock in ideas like love and God--seems to be on trial less for his murderous actions, and more for what the authorities believe is his deficient character.

Smith/Hashemi's Foundations of Materials Science and Engineering, 5/e provides an eminently readable and understandable overview of engineering materials for undergraduate students. This edition offers a fully revised

chemistry chapter and a new chapter on biomaterials as well as a new taxonomy for homework problems that will help students and instructors gauge and set goals for student learning. Through concise explanations, numerous worked-out examples, a wealth of illustrations & photos, and a brand new set of online resources, the new edition provides the most student-friendly introduction to the science & engineering of materials. The extensive media package available with the text provides Virtual Labs, tutorials, and animations, as well as image files, case studies, FE Exam review questions, and a solutions manual and lecture PowerPoint files for instructors.
