history and use*

Dalcassian Publishing
Company

This is a summary of the
known facts about the
minerals that make up the
rocks, soils, and ore
deposits of Colorado.

Compilation and
abridgment of the
literature from 1858,
when gold was
discovered, through 1957
(with a few additions for
1958 and 1959) is
supplemented by
information from
unpublished sources.

Designed to be of use to
both professional and
amateur mineralogists,
the main part of the
report describes the chief
occurrences of 445
mineral species, 42 of
them first found in
Colorado, together with
many subspecies,

varieties, and discredited
"type" species. Directions
for finding these localities
are also given in the text.
The bibliography contains
more than 800 selected
references to the most
significant literature on
the subject
