*I & T Shop Service* Springer Science & Business Media  
Includes annual cumulative index of inventors and patentees.  
*Toxic Substances Control Act (TSCA) chemical substance inventory* Trade & Technical Press  
Agriculture has benefited considerably from the wide-scale use of tractors and associated implements. Tractors have developed along two, at times contradictory, design paths. The first of these has resulted in functional improvements to the vehicle, making it capable of improved performance in the often harsh environmental conditions in which it is required to operate. For example, agricultural tires have improved the versatility of tractors by allowing them to operate at relatively high speeds on a variety of terrains, and hydraulics have provided for flexibility in controlling and operating implements. It can also be seen that these particular functional design improvements have contributed significantly to the second design pathway, that of ergonomics, and the human-machine interface. Recent stress on the working

environment for the tractor operator has led to design improvements relative to tractor cabs, the placement and labeling of controls, etc. This text discusses those factors relevant to the design, selection, and operation of tractor-implement systems. The audience for which it is intended is undergraduate and graduate students of agricultural engineering studying power and machinery. However, the text is sufficiently applied to have relevance for those extension personnel involved with advising farmers on the selection and operation of tractor implement combinations. The tractor cannot be regarded in isolation from the implement, nor from the environment in which both the tractor and implement are in x Preface working.

*Index of Patents Issued from the United States Patent and Trademark Office*

The Jan. 1956 issue includes Fluid power engineering index, 1931-55.

### Applied Mechanics Reviews

Vols. 30-54 (1932-46) issued in 2 separately paged sections: General editorial section and a Transactions section. Beginning in 1947, the Transactions section is continued as SAE quarterly transactions.

### Fluid Power Incorporating Compressed Air & Hydraulics
