 Im Jahr 1883 will Leonhard Mahler im weit entfernten Java sein Glück finden - wie viele andere Europäer sucht er den schnellen Reichtum. Leonhards Onkel lebt bereits in der niederländischen Kolonie, doch er ist nicht der ehrbare Geschäftsmann, für den sein Neffe ihn hält. Dagegen versucht Femke, die Tochter eines niederländischen Kolonialbeamten, fortzukommen von diesem Ort und löst dabei einen Skandal in der Gesellschaft von Javas Hauptstadt Batavia aus. Und dann ist da noch Bimo, ein junger javanischer Taschendieb, der davon träumt, irgendwie nach Europa zu gelangen. Doch all ihre Pläne, Wünsche und Hoffnungen rücken plötzlich in den Hintergrund, als eine Katastrophe über sie und ihre Welt hereinbricht. Jetzt geht es nun nur noch um eines: überleben! Eine packende Geschichte, vor dem Hintergrund der größten Naturkatastrophe des letzten Jahrtausends. Ein Roman über ein Ereignis, das die Welt veränderte.

 The question of how theology shapes a Christian historian's reading of the past has been debated thoroughly in various academic periodicals. Should historians recognise the role of providence in their accounts of past events? Should they sympathise with their subject's theology? Can objectivity be lost due to theological bias? And, last but not least, is there a compromise of faith if one writes "natural" instead of "supernatural" history? Such questions are important for understanding the historian's profession. Arnold Dallimore, who trained and specialised in pastoral ministry in Canada, wrote an influential biography of the revivalist George Whitefield, as well as others on Charles and Susanna Wesley, Edward Irving, and Charles Spurgeon. How did his Reformed theological perspective impact his historiography? How does his work fit into larger historiographical debates concerning the nature of Christian history? While other books look at Christian historiography using abstract and methodological approaches, this book examines the subject precisely by looking at the life and work of an individual historian. It does so by placing Dallimore in the context of being a minister in twentieth-century Canada as well as his role in the development of Reformed Theology in the Anglosphere. It also examines the quality of his various biographies focusing on key issues such as the nature of religious revival, the problem of Christianity and slavery, and the question of charismatic religious

experience. His study concludes by examining the relationship between the discipline and profession of church history and asking what is required for one to be considered a church historian.

Alexander the Great (356-323 B.C.) precipitated immense historical change in the Mediterranean and Near Eastern worlds. But the resonance his legend achieved over the next two millennia stretched even farther—across foreign cultures, religious traditions, and distant nations. This engaging and handsomely illustrated book for the first time gathers together hundreds of the colorful Alexander legends that have been told and retold around the globe. Richard Stoneman, a foremost expert on the Alexander myths, introduces us first to the historical Alexander and then to the Alexander of legend, an unparalleled mythic icon who came to represent the heroic ideal in cultures from Egypt to Iceland, from Britain to Malaya. Alexander came to embody the concerns of Hellenistic man; he fueled Roman ideas on tyranny and kingship; he was a talisman for fourth-century pagans and a hero of chivalry in the early Middle Ages. He appears in Jewish, Christian, and Islamic writings, frequently as a prophet of God. Whether battling winged foxes or meeting with the Amazons, descending to the underworld or inventing the world's first diving bell, Alexander inspired as a hero, even a god. Stoneman traces Alexander's influence in ancient literature and folklore and in later literatures of east and west. His book provides the definitive account of the legends of Alexander the Great—a powerful leader in life and an even more powerful figure in the history of literature and ideas.

In olden times there was a mighty king named Sakuni, who was a beloved associate of the king of the gods, Indra. In spite of this he became absorbed in meditation, leaning his head upon his hand, reflecting that, inasmuch as he had neither a son nor a daughter, he would have to die, in spite of his riches and his power, without leaving behind him a son or a daughter, and that his family would become extinct. As he sat meditating in this wise, the king of the gods, Indra, saw him and said, "O friend, wherefore do you lean your head upon your hand, and wherefore do you sit there meditating in that manner?" He replied, "O Kausika, if I die without leaving a son or daughter, my family will become extinct, in spite of my possessing such wealth and power." Indra said, "O friend, I will send you a medicine. Let your wives drink of it, and thereby you will obtain sons and daughters." The king of the gods, Indra, betook himself to Mount Gandhamadana, brought away the medicine with him, and sent it to the king. The king sent it to his wives, with directions for them to drink it. The king's chief wife had just gone to sleep, but the other wives drank the medicine without waking her, and all of them became pregnant. When the queen awoke and perceived that they were pregnant, she said, "What have ye done to become pregnant?" They replied, "The king gave us a medicine to drink."

Lucky. The one adjective used to describe my entire hockey career. I prefer to call it hard work, at least I did until my game went to complete crap. I haven't scored in eight games and the team owner is talking about trading me. I've never believed in superstitions. Never needed one. I suppose I was "lucky" in that way. But now the best way to refer to me is desperate. I'd wear the same socks for an entire year just to be the high-scoring center I used to be. Imagine my surprise when after spending New Year's Eve with a woman, I score a hat trick in the next game—that's three goals in one game for you non-hockey lovers. Now, I have to track her down and bribe her to do it again before every game. Get your mind out of the gutter, I'm not talking about it. I find her and when I get to know her better, I end up spending more time thinking about her than my game, but she's made it clear she wants no part of me. She's going to learn that I didn't become a professional hockey player without having to fight for what I want.

Alexander the Great of Macedon was no stranger to controversy in his own time. Conqueror of the Greek states, of Egypt and of the Persian Empire as well as many of the principalities of the Indus Valley, he nevertheless became revered as well as vilified. Was he simply a destroyer of the ancient civilizations and religions of these regions, or was he a hero of the Persian dynasties and of Islam? The conflicting views that were taken of him in the Middle East in his own time and the centuries that followed are still reflected in the tensions that exist between east and west today. The story of Alexander became the subject of legend in the medieval west, but was perhaps even more pervasive in the east. The Alexander Romance was translated into Syriac in the sixth century and may have become current in Persia as early as the third century AD. From these beginnings it reached into the Persian national epic, the Shahnameh, into Jewish traditions, and into the Quran and subsequent Arab romance. The papers in this volume all have the aim of deepening our understanding of this complex development. If we can understand better why Alexander is such an important figure in both east and west, we shall be a little closer to understanding what unites two often antipathetic worlds. This volume collects the papers delivered at the conference of the same title held at the University of Exeter from July 26-29 2010. More than half the papers were by invited speakers and were designed to provide a systematic view of the subject; the remainder were selected for their ability to carry research forward in an integrated way. *Khwadāynāmag The Middle Persian Book of Kings* Ichara LLC We all know that Augustine was a teacher of rhetoric before he became a highly influential Church leader. We know that he never stopped using rhetoric as a bishop. What we do not always know is what we mean by Augustine's rhetoric. Is it the style, the figures of speech, encrypted in strange names like hendiadys or homoioteleuton? We also know that Augustine wrote letters throughout his ecclesiastical career, some of them highly polemical. The scholars tend to see the ancient correspondence as a part of a celebrated ritual of friendship. But has Augustine really used the letters written in the heat of the Donatist controversy within this cultural context? For decades the works of Augustine have been of interest mostly for Church historians and theologians, and rightly so. It is worth noticing, however, that the people who read or listened to them at the time of their composition were alumni of rhetorical and law schools, where they had to read Cicero's speeches and learn from rhetorical handbooks (some authored by himself, other written under his influence). The aim of this study is to prove that Augustine's polemical correspondence is teeming with examples of rhetorical tricks commonly used in courtroom argumentation. I argue that the backbone of Augustine's anti-Donatist letters, that is his patterns of argumentation and strategies of persuasion, is largely formed by the techniques of forensic rhetoric. My aim here is to offer an insight into how Augustine used rhetorical tools inherited from classical theory in building and developing polemical strategies in his anti-Donatist letters. This study should expand our knowledge on such various topics as history of rhetoric, ancient epistolography, polemical literature and Augustine's art as a polemicist.

The division of land and consolidation of territory that created the Greek polis also divided sacred from productive space, sharpened distinctions between purity and pollution, and created a ritual system premised on gender difference. Regional sanctuaries ameliorated competition between city-states, publicized the results of competitive rituals for males, and encouraged judicial alternatives to violence. Female ritual efforts, focused on reproduction and the health of the family, are less visible, but, as this provocative study shows, no less significant. Taking a fresh look at the epigraphical evidence for Greek ritual practice in the context of recent studies of landscape and political organization, Susan Guettel Cole illuminates the profoundly gendered nature of Greek cult practice and explains the connections between female rituals and the integrity of the community. In a rich integration of ancient sources and current theory, Cole brings together the complex evidence for Greek ritual practice. She discusses relevant medical and philosophical theories about the female body; considers Greek ideas about purity, pollution, and ritual purification; and examines the cult of Artemis in detail. Her nuanced study demonstrates the social contribution of women's rituals to the sustenance of the polis and the identity of its people.

"England 1642: a nation divided. King Charles and Parliament each gather soldiers to their banners. Across the land men prepare to fight for their religious and political ideals. A family ripped asunder. The Rivers are landed gentry, and their allegiance is to the Crown. Edmund, the eldest son, will do his duty to his king, but his brother Tom will turn his back on all he once believed in. As the men go to fight, so the women are left to defend their home. A war that will change everything. From the raising of the King's Standard at Nottingham Castle to the butchery of Edgehill, Edmund and Tom Rivers will each learn of honour, sacrifice, hatred and betrayal as they follow their chosen paths through the bloody chaos of civil war."--Back cover. **Landscapes, Gender, and Ritual Space** Piper Rayne, Inc.

In the quiet suburb of Harting Farms, the weekly crime blotter usually consists of graffiti or the occasional bout of mailbox baseball. But in the fall of 1993, children begin vanishing and one is found dead. Newspapers call him the Piper because he has come to take the children away. But there are darker names for him, too . . . Vowing to stop the Piper's reign of terror, five boys take up the search. Their teenage pledge turns into a journey of self-discovery . . . and a journey into the darkness of their own hometown. On the twilight streets of Harting Farms, everyone is a suspect. And any of the boys might be the Piper's next victim.

This volume presents a line of original experimental studies on the bodily self, investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts. So far, it was not well known whether people locate themselves in one or more specific regions of their bodies. On the other hand, some systematic distortions in indicating bodily locations were already documented. In the present studies, participants were therefore asked to indicate their self-locations, as well as the locations of several of their body parts, using a self-directed, first-person perspective pointing paradigm in various virtual reality (VR) setups (different head-mounted displays and a large-screen immersive display). Overall, participants were found to locate themselves mainly in the (upper) face and the (upper) torso. However, striking differences in self-localization were found when testing in different VR setups. Upon further investigation, these differences were found to be foremost due to inaccuracies in body part localization. When taking these inaccuracies into account, differences between setups—and also with self-localization outside of VR—largely disappear. Another striking finding was that providing participants—in between pointing phases—with information about their bodies in the form of a real-time animated self-avatar, did not make them more accurate at locating their own body parts. While manipulating their viewpoint to chest-height of their self-avatar did shift the afterwards indicated locations of their own body parts upwards, towards where they were seen on the avatar. Potential explanations for the various new findings, also from tasks outside of VR, are discussed. Taken together, this volume suggests a differential involvement of multi-sensory information processing in experienced self-location within the body and the ability to locate body parts. Self-localization seems to be less flexible, possibly because it is strongly grounded in the 'bodily senses', while body part localization appears more adaptable to the manipulation of sensory stimuli, at least in the visual modality.
