The Essentials of Archery Stackpole Books
This guide to traditional bowhunting with a longbow or recurve combines the best of both worlds for beginners and veteran bowhunters. How-to chapters share hard-earned wisdom that will help you perfect your skills and get close to your game, while engaging stories tell of the author's experiences hunting white-tailed deer in the east, chasing big game in the American West, and trekking to South Africa in search of Greater Kudu and other

plains game. Throughout, the author highlights archery's traditional spirit by exploring the history and craft of bowhunting and chronicles the challenges faced by today's bowhunters in continuing their important role as hunter-conservationists. As a professional wildlife biologist, Ron Rohrbaugh Jr. also provides valuable information on wildlife ecology and behavior that is instructive for all those interested in increasing their success with archery tackle. Specific shooting techniques for hunting situations, ways to set up effective ambush sites for big game, and dealing with the stresses of "buck fever" The latest information on

equipment and arrows, including the pros and cons of various bow styles and arrow shaft materials Advice on using the wind, hunting bedding areas, creating effective scent trails, and understanding why and how deer move Discussion of controversial topics, such as baiting and trophy hunting Archery Quarto Publishing Group USA
This book was originally published by my father, Albert J. Love, M.D. in 1956. It has been said by many that it is the gold standard in the field of archery and serves as a solid primer in this timeless sport. It will appeal to both those who are accomplished archers as well as to beginners. Field Archery Technique will

teach the enthusiast the classic, time-tested methods to improving his/her marksmanship and overall enjoyment of the sport. There is special emphasis placed on technique and trouble-shooting. Simon and Schuster

From the most trusted name in guns and ammunition comes this ultimate reference on bowhunting. The Shooter's Bible Guide to Bowhunting offers everything you need to know about the sport and its gear, from its origin as a means of survival to modern gear. Compound bows and crossbows have undergone an explosive rise in popularity in recent years, due in part, Dr. Todd A. Kuhn explains, to complex socioeconomic, environmental, and biological factors. As expansive tracts of land vanish, many hunters can no longer pursue game with high-powered rifles. That, plus vast improvements in archery gear, has hunters flocking to compound bows and crossbows as alternatives. In the Shooter's Bible Guide to Bowhunting Dr. Kuhn examines all things bowhunting and archery. Topics covered include: Compound, recurve, and traditional bows Arrows and broadheads Sights and rests Releases and triggers Quivers Tree stands,

blinds, decoys, and other popular gear This exhaustive desk reference provides a never before seen look into the history and engineering of archery, theories and trends in game discipline, and, of course, an exhaustive catalog of archery equipment both new and traditional.

The Traditional Bowyer's Bible is a remarkably in-depth analysis of the wooden bow from its construction to its correct use by leading experts in the field. The emphasis here is on the history of these weapons and methods for building them from scratch, just as they were made before the advent of firearms. Invaluable information for anyone interested in the age-old lure of archery.

Inside the Archer Shooting the Stickbow Shooting the Stickbow is the first comprehensive treatise on shooting modern recurves and longbows! It answers questions most asked by new archers and delves into topics not often considered, but critical to precision shooting for experienced authors. Topics include: equipment choices - bows, arrow, strings, shooting tabs and gloves, armguards, sights and stabilizers and necessary accessories shooting form - anchoring, should alignment, back tension, breathing, variations in technique and more tuning - methods of visual, paper, bare shaft, walk-back and group tuning are described and compared aiming - six methods of aiming are fully compared and contrasted, including "instinctive" aiming physical and mental aspects of becoming a proficient archer - functional anatomy for the archer and how it relates to proper form and efficient shooting; techniques are given to optimize the archer's focus, confidence and how to prepare for the big event transitioning to Olympic archery - how to turn basic skills into reaching the gold at 70 meters teaching and coaching - how to find a good instructor or coach and how to

approach teaching both new and experienced shooters archery history - dating back from the 1960s and 70s; what's changed and what hasn't Visit us at www.shootingthestickbow.com Shooting the Stickbow

Perfect your bowhunting technique with this comprehensive guide covering equipment, skill-building, and field-tested tips for taking down big game. Most hunters agree that bowhunting is a low-percentage affair. To improve your chances in the field, it's crucial that you choose the right equipment, set it up properly, and have the necessary skill to use it when the moment of truth comes. In this guide, expert archer and bowhunter Lon E. Lauber gives you the knowledge and techniques you need to drastically improve your accuracy. Whether you're working with a compound bow, recurve or longbow, Lauber helps you understand your weapon. He then offers in-depth advice on how to practice good shooting form. This is followed by a discussion field skills such as balancing accuracy and speed and maintaining mental focus, and shooting in adverse conditions.

Traditional Archery Crowood Expert bowhunter and archery traditionalist Dan Bertalan has compiled the most complete bowmaking text available today. By traveling coast to coast and consulting America's top bowmakers, he has gathered the best information on how to build your own recurve longbow, improve your hunting skills, care properly for a bow, and more. Including descriptive photographs, diagrams, a complete glossary of terms, and reviews of particular bows that include draw/force measurements and hand-shot arrow speeds, this illuminating book will provide hunters, collectors, and others with invaluable insight into this specialized world. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness

survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Andesite Press

A Leading Expert on Traditional Archery Offers Insight Into How the Longbow Was Drawn from Medieval Sources to Modern Recreations "Soar's book [The Crooked

Stick] is indispensable."--Bernard Cornwell, New York Times bestselling author Relying on more than fifty years' experience in archery, historian Hugh D. H. Soar reflects on how the longbow was drawn and shot across the centuries through examining the design of the bow and early literature about the bow, combined with his and his colleagues' applied knowledge using replica bows. No complete medieval longbow has survived, but those found aboard the Tudor warship Mary Rose provide the best archaeological evidence to the possible construction of the medieval bow. Contemporary treatises written about the proper manner of shooting the bow, together with the resurgence in interest and construction of replica bows beginning in the late sixteenth century that form part of the author's collection provide the basis for this work. *How to Shoot the Longbow: A Guide from Historical and Applied Sources* is a fascinating and practical look at the use of a legendary invention.

The Traditional Bowhunter's

Handbook?History, How-To and Practical

Information for the Traditional Bowhunter Finally, the definitive book for the novice and experienced traditionalist alike that covers all facets of traditional archery and bowhunting. As the Editor/Publisher/Founder of Traditional Bowhunter Magazine, T.J. Conrads is considered one of the leading experts on traditional archery today. Everything from the history of bowhunting in the United States to selecting, tuning and shooting a traditional bow, building arrows and bowstrings, to an in-depth look at bowhunting equipment is covered in this one book. In addition, there are numerous appendices, a glossary, and complete contact information for all traditional archery supplies, bowyers, fletchers and related manufacturers, as well as a complete list of all 50 states' fish and game contact information. There is more useful, practical information in this one book than you will find in over a dozen other books on the same subject. Cross referenced, indexed, footnoted and richly illustrated, this is one book every traditional archer should own. Forward by Glenn St. Charles.

[Bowhunting Pressured Whitetails](#) Globe Pequot

This book will guide you through the 'mysteries' and 'black magic' of StringWalking so you will see that there are neither 'mysteries' nor 'black magic' involved. StringWalking is complex, but you can easily tune your bow to shoot accurately where you aim. To stringwalk, you hold the string at different places (crawls) according to the distance to the target and use the tip of the arrow to aim. You grip the string closer to the nock for longer distance targets and grip it farther down from the nock for closer targets. However, drawing the string from different places is stressful on the bow, since its parameters (tiller, power stroke, etc.)

change from shot to shot as the crawl changes. Therefore, the correct tuning of the bow to its arrows is trickier than for other shooting techniques. If you want to obtain good results, you must tune the bow so that it works, more or less, accurately at all distances, when using different crawls. We will start by defining the Barebow Class and the many ways of aiming without sights, which includes StringWalking. We will analyze bow mechanics, both in a simple situation (gripping the string from one point) and when StringWalking (gripping the string from different points). We will also consider criteria for equipment selection, the riser, limbs, bow length, draw weight, balance, etc. There are special sections on rest, button, tab, arrows, etc. Then, we will analyze how to set up our equipment and the different ways of tuning it. Tuning is therefore very personal, but with a little work and dedication, you can achieve excellent results. Then you will enjoy the

sight of your arrows flying, with accuracy, from a well-tuned, well-behaved bow. Finally, we introduce the form of competition in which the barebow is at home. We explain the rules and how the competition works. Preparation for a day in the field is explained and we give hints on how to approach shooting in natural surroundings and how to perfect your distance judgement skills. So, at the end of this book not only will you be able to enjoy the sight of your arrows flying accurately from a well behaved bow, but from that bow in a natural and enjoyable setting.

The Traditional Bowhunter's Handbook
Crowood

An introduction to the fun of buying, shooting and collecting old archery gear. Details on production bow models post WW2, plus tips on what to look for in a classic bow, refinishing tips and tuning the bow, arrow and archer into a "system".

Guide to the Longbow Simon and Schuster

Written by an acknowledged expert, this invaluable book is aimed at archers of all levels, from those starting out in the sport to those taking part in competitions at the highest level. The author analyses shooting techniques and tuning, and also emphasizes the development of mental toughness; he argues that this goes hand in hand with the mastery of the physical aspects of the sport. This comprehensive guide to shooting covers: how to get started in archery, the costs involved, choosing and using equipment and the basics of shooting; setting up your equipment and initial tuning; the biomechanics of shooting; the tactics and preparation work involved in archery competitions; physical fitness, nutrition and psychology; arrow selection and preparation; making bowstrings; shooting techniques, improving performance and the fine-tuning of equipment.
