To make the best decisions possible, middle leaders need to have a nuanced understanding of the consequences of their actions. In this pragmatic book, Adam Robbins aims to boost their role-specific expertise to help them achieve that goal - and offers them a preferable alternative to learning from their mistakes. Instead of relying on generic leadership theories, Middle Leadership Mastery collates perspectives from psychology and cognitive science to share evidence-informed guidance on a wide range of topics - from supporting staff and students in crisis and managing wellbeing, to quality-assuring teaching and curriculum design. Adam Robbins draws on his sixteen years' experience of teaching in a deprived area to illustrate his points with stories and anecdotes from the front line, demonstrating how middle leaders can better understand their context and

deliver the best outcomes from a variety of starting points.

Answering six mark questions in your GCSE is much more than just writing down six correct things. There is a skill to answering them that needs to be practiced. Here I have written 25 questions on each subject, given you the answers and guided you through how to answer to get full marks. The more you practice, the more confident you'll be in the exam! Example Question 58 - Renewable and Non-Renewable Energy Sources  
In June 2017, for the first time, over 50% of energy in the UK was supplied by renewable energy. The UK government is leading a drive to promote the increased use of renewable energy sources for generating electricity. Evaluate the use of renewable and non-renewable energy sources.
