Bentham's writings for

the French Revolution were dominated by the themes of rights, representation, and reform. In 'Nonsense upon Stilts' (hitherto known as 'Anarchical Fallacies'), the most devastating attack on the theory of natural

rights ever written, he argued that natural rights provided an unsuitable basis for stable legal and political arrangements. In discussing the nature of representation he produced the earliest utilitarian justification of political equality and representative democracy, even recommending women's suffrage.

### **The Fortnightly**

The present book explores the complexity of the past, by analysing the relationships between place, territory, the material value of objects and landscapes, time and ritual, during archaeological investigations. It presents the archaeology of place as a series of

interconnecting and interactive relationships. It is clear that things and places do not emerge without some form of agency, usually through the concept of material manipulation, coupled with elaboration, innovation and time. Depending on the raw material used and the process of manipulation and its relationship with the environment, materiality gains value. How do we as modern humans work within the complexity of place, materiality, time, and ritual? Traditional in archaeological discourse is the need to describe place, albeit in an empiricist and banal way. Discourse is sometimes followed by a more fruitful and interpretive

account. However, these accounts tend to ignore human emotion that is bound-up in place, for example the ritualized and symbolic meanings that place holds. This book explores the significance of geography, place and the materiality that place holds, and challenges many of the tradition norms that in the past have trivialized landscape archaeology. The book is divided into 14 thought-provoking and crafted chapters and will be an ideal companion to anyone involved in the social sciences.

*Dictionnaire nouveau et universel* Routledge  
Cinema has been long associated with France, dating back to 1895, when Louis and Auguste Lumi\_re screened their works, the first public viewing of films anywhere. Early silent pioneers Georges MZli\_s, Alice Guy BlachZ and others

followed in the footsteps of the Lumi\_re brothers and the tradition of important filmmaking continued throughout the 20th century and beyond. In Encyclopedia of French Film Directors, Philippe Rège identifies every French director who has made at least one feature film since 1895. From undisputed masters to obscure one-timers, nearly 3,000 directors are cited here, including at least 200 filmmakers not mentioned in similar books published in France. Each director's entry contains a brief biographical summary, including dates and places of birth and death; information on the individual's education and professional training;

and other pertinent details, such as real names (when the filmmaker uses a pseudonym). The entries also provide complete filmographies, including credits for feature films, shorts, documentaries, and television work. Some of the most important names in the history of film can be found in this encyclopedia, from masters of the Golden Age\_Jean Renoir and RenZ Clair\_to French New Wave artists such as Fran\_ois Truffaut and Jean-Luc Godard. *The Naval History of Great Britain, from the Declaration of War by France, in 1793, to the Accession of George IV* Metropolitan Museum of Art

Although considered a  
classic thinker,  
Sismondi is seldom  
discussed, at least in  
English. In this context,  
this volume offers a  
key reference work on  
the intellectual and  
economic contribution  
of Sismondi to the  
economic, political,  
and social sciences.  
The book explores his  
works in order to  
rediscover the

direction of a viable path to individual and public happiness. Through examining Sismondi's work, *The Birth of Economics as a Social Science* contributes to the current debate on the relationships between liberty, interpersonal relations, and wealth. Moreover, Dal Degan presents an analytical and historical example of the ways in which an author from the past attempted to connect these aspects in his scientific discourse. The first part of the book focuses on Sismondi's political thought, paying particular attention to the different cultural and political traditions that pepper the author's reflections on the conditions for liberty. The second part analyzes the

epistemological view underlying how Sismondi's historical method and multidisciplinary approach respond to the need to base economic discourse on a contextual and causal analysis that also addresses the historical and institutional structure of social organizations. Finally, the third part of the book is dedicated to Sismondi's economic theory. This work brings the works of Sismondi to a wider readership. It will be of great interest to those studying and researching economic theory and the connections between economics and society, as well as the broader social sciences.
