because they are female. Dr. Russell has contributed seven provocative original chapters to Femicide in Global Perspective. This anthology includes chapters on woman-killing in Algeria, Australia, Canada, China, Israel, South Africa, other Southern African countries, the United States, and brief testimony from other nations. Together, the authors brilliantly	demonstrate how naming femicide helps to expose and bring attention to this most extreme yet neglected form of violence against women, and the urgent need to put femicide on local, national and international action agendas. <u>Libros</u> <u>españoles</u> . ISBN. Springer Science & Business Media Use and Abuse of History has become a key text of current	historiography ; this is a book that poses fundamental and disturbing questions about the use and abuse of history. Engaging and challenging, this book confronts the reader with the many 'histories' that exist and have existed around the world, from the Zulu kingdoms to Communist China. This title has now been extensively revised by Marc Ferro, a well respected historian, and presents the

different narratives that constitute the histories of countries as diverse as India, Iran, Trinidad and the United States makes for fascinating reading in their own right. What makes this book so valuable, though, is what these narratives tell us about the societies which create them - how much is history distorted in order to condition the minds of those who are taught it? Use

and Abuse of History appeals to anyone with a general interest in history. *A Tepoztlan a Mexican Village* London, H. S. King & Company "The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time, pervading contemporary understandings of human nature and society. Unfortunately, many social scientists in

sociology, psychology, and sociocultural anthropology have failed to engage with it. Barkow asks his fellow social scientists to put aside their all-too-common preconceptions and stereotypes of the "biological" and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide.

He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own, and that the real debate is about how to apply it."--

"Moore's provocative conclusion is that monotheism - with its monopoly on virtue and failure to provide supernatural scapegoats - is responsible for some of the most virulent forms of intolerance and is a major cause of human nastiness and suffering.

This biography of the man Stefan Zweig viewed as "the most perfect Machiavelli of modern times" was written in 1929, before the full impact of Nazism and Stalinism was

understood. In this gripping case study of ruthlessness, political opportunism, intrigue, and betrayal, Zweig portrays Minister of Police Joseph Fouché (1759-1820), a "thoroughly amoral personality" whose only goal was political survival and the exercise of power. Zweig traces Fouché's career, beginning with his stint as a math and physics teacher in provincial

Catholic schools and evolving into a moderate and then radical legislator. Fouché cultivated every political movement du jour, holding no convictions of his own. After preaching clemency for Louis XVI, Fouché voted to send the King to the guillotine. After writing "the first communist manifesto of modern times" he became a multi-millionaire. He led the brutal repression of an anti-

revolutionary movement, earning him the nickname "le mitrailleur (butcher) de Lyon". After serving Robespierre, Fouché engineered his overthrow and rose to Minister of Police under the Directory, which he then helped to overthrow before putting his network of informants in Napoleon's service as his Minister of Police. After turning against the Emperor, Fouché served the new King Louis XVIII -

whose brother he had helped send to the guillotine. Thus, Fouché served the Revolution, the Directory, the First Empire and the Restoration. **Thine is the Kingdom** Walter de Gruyter This fascinating book explores the bodily expression of emotion in worldwide and culture-specific contexts. Canek Macmillan Fidel's book exploring the development of the

prehistoric cultures of North, Central and South America from about 10,000 BC to AD 1530 has been updated to include discussion of recent discoveries and analyses of their implications. Prehistory of the Americas examines archaeological evidence of the earliest human migration from Asia to the New World; the rapid expansion of Paleo-Indian hunters; the adaptations of

archaic hunter-gatherers to post-Ice Age life; the origins and spread of farming and village life; and the rise and fall of chiefdoms and states. The author describes how different regions in the New World evolved, affected by a variety of factors ranging from technological developments to climate change. He compares the evolution of New World prehistory with that of

Old World cultures. Discussion of the development of American archaeology, from the early European encounters with native Americans to the 'new' archaeology, is also included.

 The available material in English discussing Latin American anarchism tends to be fragmentary, country-

specific, or focused on single individuals. This new translation of Ángel Cappelletti's wide-ranging, country-by-country historical overview of anarchism's social and political achievements in fourteen Latin American nations is the first book-length regional history ever published in English. With a foreword by the translator. Ángel J. Cappelletti (1927-1995)	was an Argentinian philosopher who taught at Simon Bolivar University in Venezuela. He is the author of over forty works primarily investigating philosophy and anarchism. Gabriel Palmer-Fernandez is Distinguished Professor of Philosophy and Religious Studies at Youngstown State University. <u>120 Years of American Education</u> Princeton University Press	This is an anthology of articles analyzing femicide - the misogynist killing of women by men - in the U.S., U.K., and India. The articles in Part 1 explore the history of femicide, demonstrating that it is as old as patriarchy itself. Part 2 explodes the myth that the home provides a safe haven for women. In Part 3 the complex interactions of racism and femicide are explored, showing that
---	--	---

femicide is no respecter of race, class or culture. Part 4 concentrates on media representations of femicide, showing that media generally fail to identify the sexual politics of femicide, and often sympathize with the male murderer at the expense of the female victim. Part 5 looks at the response of the criminal justice system to femicide, while Part 6 discusses the ways in which women have begun to fight back.

This chapter briefly describes the general goals of the book, introduces the most fundamental features of the methodology that is employed to achieve these goals, and gives an outline of the structure of the book. A more detailed account of the goals and methodology is presented in chapters 2 and 3, respectively. What the Book Is About The

main objective of this study is to attempt to answer the question: How do people understand their emotions? As we shall see in the next chapter, a large number of scholars have tried to provide answers to this question. The interest in the way people understand their emotions has led scholars to the issue of the nature of emotion concepts and emotional meaning. Since the

notion of understanding involves or presupposes the notions of concept and meaning, it was only natural for scholars with an interest in the way people understand their emotions to turn their attention to emotion concepts and the meaning associated with emotion terms. So the broader issue has often become more specific. For example, Davitz in his *The Language of Emotion* formulated

the central question in the following way: "What does a person mean when he says someone is happy or angry or sad?" (Davitz 1969: 1). Delibros Cambridge University Press This book provides a synthesis of Wierzbicka's theory of meaning, which is based on conceptual primitives and semantic universals, using empirical findings from a wide range of languages. While

addressed primarily to linguists, the book deals with highly topical and controversial issues of central importance to several disciplines, including anthropology, psychology, and philosophy. - ;Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years. Semantics: Primes and

Universals is a major synthesis of her work, presenting a full and systematic exposition of that theory in a non-technical and readable way. It delineates a full set of universal concepts, as they have emerged from large-scale investigations across a wide range of languages undertaken by the author and her colleagues. On the basis of empirical cross-linguistic studies it vindicates the old notion of the 'psychic unity of mankind', while at the same time offering a framework for the rigorous description of different languages and cultures. - ;A major synthesis of Anna Wierzbicka's work - Anthropological Essays Oxford University Press, UK

The recent riots in Los Angeles brought the urban crisis back to the center of public policy debates in Washington, D.C., and in urban areas throughout the United States. The contributors to this volume examine the major policy issues--race, housing, transportation, poverty, the changing environment, the effects of the global economy--confronting contemporary American cities. Raymond A. Mohl begins with an extended discussion of the origins, evolution, and current state

of Federal involvement in urban centers. Michael B. Katz follows with an insightful look at poverty in turn-of-the-century New York and the attempts to ameliorate the desperate plight of the poor during this period of rapid economic growth. Arnold R. Hirsch, Mohl, and David R. Goldfield then pursue different facets of the racial dilemma confronting American cities. Hirsch discusses

historical dimensions of residential segregation and public policy, while Mohl uses Overtown, Miami, as a case study of the social impact of the construction of interstate highways in urban communities. David Goldfield explores the political ramifications and incongruities of contemporary urban race relations. Finally, Carl Abbott and Sam Bass Warner, Jr.,

examine the impact of global economic developments and the environmental implications of past policy choices. Collectively, the authors show us where we have been, some of the needs that must be addressed, and the urban policy alternatives we face. **Missing the Revolution** Arcade Publishing This book is the first that provides a comprehensive overview of

the way countries, education systems and institutions have responded to the call for an integration of learning for work, citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999. Discussions on the central theme of the Seoul Conference - lifelong learning and training for all, a bridge to the future - led to the conclusion that a new paradigm of both development and Technical and Vocational Education (TVET) was needed. This book showcases the wide range of international initiatives that have sought to put such exhortations into practice. It includes: case studies of national TVET policy reforms, reoriented curricula, sustainable campus management programs, and examples of innovative approaches to integrating learning in TVET with on-the-job training and in community service. It also focuses on the issues and challenges being faced and ways of moving forward. Case studies feature initiatives in a wide range of world regions and countries, and include authors from: UK, Germany, Finland, Canada, USA, Australia, South Africa, China, Republic of

Korea, India, Pakistan and the Philippines.
