SANTIAGO STARK

International Index to Periodicals BRILL

(Published in Co-operation with the National Council of Teacher of Mathematics) According to NCTM's Principles and Standards for School Mathematics, "Technology is essential in teaching and learning of mathematics; it influences the mathematics that is taught and it enhances students' learning." How does research inform this clarion call for technology in mathematics teaching and learning? In response to the need to craft appropriate roles for technology in school mathematics new technological approaches have been applied to the teaching and learning of mathematics, and these approaches have been examined by researchers world-wide. The second volume has a dual focus: cases and perspectives. It features descriptive cases that provide accounts of the development of technology-intensive curriculum and tools. In these cases the writers describe and analyze various roles that research played in their development work and ways in which research,

curriculum development, and tool development can inform each other. These thoughtful descriptions and analyses provide documentation of how this process can and does occur. The remaining chapters in the second volume address research related issues and perspectives on the use of technology in the teaching and learning of mathematics. The lessons learned from the research presented in these volumes are lessons about teaching and learning that can be applied more broadly than solely in technological settings.

Antarctic Communities Oxbow Books

An authoritative and comprehensive account of the assessment and conservative management of temporomandibular disorders. Recent emphasis has been on 'evidence-based practice' at the expense of the clinical reality which should also take account of clinician expertise and patient preference. A sound research base is not always available. This text addresses the clinical reality of having to make decisions using other sources of knowledge in the absence of a comprehensive scientific rationale. It advocates clinical and evidence-informed practice - an approach which acknowledges the value of clinician experience and expertise as well as research findings.

Compiled and edited by two highly regarded and experienced practitioners, researchers and authors who have already published many books and journal articles in the field. With contributions from a mix of 28 internationally-based clinicians and clinician-researchers allowing the text to highlight both current best evidence and clinicians' expertise and experience. Contributors include talented young clinicians as well as established experts in orthopaedic physiotherapy and world-level expert researchers.

Travelling the Korosko Road: Archaeological Exploration in Sudan's Eastern Desert IAP

Aimed at an interdisciplinary audience (philosophy, psychology and neuroscience), this book is about mental imagery and the important work it does in our mental life. Mental imagery plays a crucial role in the vast majority of our perceptual episodes; but also plays an important role in emotions, action execution and even in our desires.

Ulrich's International Periodicals Directory Oxbow Books

This volume publishes accounts of archaeological exploration carried out in the Sudanese Eastern Desert. A pioneering programme of expeditions along the so-called 'Korosko Road' revealed a rich

archaeological landscape frequented over millennia, including gold-production areas and their associated settlements.

Volume 2: Cases and Perspectives Elsevier

Volume for 1947 includes "A list of clandestine periodicals of World War II, by Adrienne Florence Muzzy."

Bulletin officiel des annonces civiles et commerciales Jessica Kingsley Publishers

An author and subject index to publications in fields of anthropology, archaeology and classical studies, economics, folklore, geography, history, language and literature, music, philosophy, political science, religion and theology, sociology and theatre arts.

Chemoinformatics and Bioinformatics in the Pharmaceutical Sciences Academic Press

This book is a collection of papers delivered at an international conference in September 1996 at the Scottish National Gallery of Modern Art during a major Giacometti retrospective. The contributors are leading curators, art historians and literature specialists. While the relationship between nineteenth- and twentieth-century painters and writers has been the subject of intense interest in recent years, the parallel relationship between sculptors and writers has been largely neglected. These essays seek to redress the balance by looking at a variety of ways in which the conventional barriers between writing and sculpting were broken down by such pioneering figures as Rodin, Degas, Bourdelle, Valéry, Apollinaire, Reverdy, Breton, Bataille, Arp, Picasso and Giacometti. Among the topics discussed are: the many personal and professional contacts, dual artistic talent, 'Ecrits d'artistes', ekphrasis, sculpture as object, the sculptorly representation of the poet, the poetic representation of the sculptor, sculpture as metaphor, proprioception and mental images. Fully illustrated throughout, this book offers new perspectives on familiar masterpieces like Rodin's Gates of Hell, but also opens up less well known subjects like Valéry's sculpture and Breton's Object-Poems. Above all it makes a provocative and original contribution to Word and Image studies.

Entre Amis Universidad Pontificia Comillas

This new volume in the Oasis Papers series marks the 40th anniversary of archaeological fieldwork in the Dakhleh Oasis in Egypt's Western Desert under the leadership of Anthony J. Mills and presents a synthesis of the current state of our knowledge of the oasis and its interconnections with surrounding regions, especially the Nile Valley. The papers are by distinguished authorities in the field and postgraduate students who specialise in different aspects of Dakhleh and presents an almost complete survey of the archaeology of Dakhleh including much unpublished, original material. It will be one of the few to document a specific part of modern Egypt in such detail and thus should have a broad and lasting appeal. The content of some of the papers is unlikely to be published in any other form elsewhere. Dakhleh is possibly the most intensively examined wider geographic region within Egypt.

Current Catalog Walter de Gruyter

Patellofemoral complaints are a major problem for all those working in sports medicine and orthopaedics. The correct diagnosis at an early stage is essential if subsequent treatment is to be successful and secondary complications are to be avoided. Written by an internationally known team of experts this book looks at the various diagnostic techniques currently available, cites examples of unsuccessful treatments and proposes the most appropriate ones on the proven basis of the latest research. The core of the book is the 20 case studies ranging from simple non-operative treatment to multi-operated patients with salvage procedures. The underlying theme of the book is that treatment of patellofemoral problems must, in the first instance, be somewhat conservative. Surgical interventions should be performed in a response to a clear underlying pathology and only after non-operative treatment has failed. Patellofemoral Disorders is enhanced by the inclusion of some superb specially drawn illustrations and numerous colour photographs in the case studies section.

Temporomandibular Disorders University of Chicago Press

The study of Antarctic communities can provide a valuable step forward in investigating the control

of community development, the utilization of habitats and the interaction among species in both species rich and species poor communities. This book contains chapters characterizing the present approaches to both aquatic and terrestrial communities in the Antarctic. From biodiversity to trophic flows, from ecophysiological strategies to the impacts of environmental change and the effects of human disturbance, this volume provides an up to the minute overview of community studies in an area covering ten percent of the Earth's surface.

Includes entries for maps and atlases.

Index-catalogue of Medical and Veterinary Zoology Oxford University Press

Day-to-day activities are important in the development of social identities, the establishment of social standing, and the communal understanding of societal rules. This perspective is broadly referred to as practice theory and relates to the power of an overarching social structure and the individual actors that exist within it. Practice theory has made an important contribution to anthropological and archaeological research as these fields are particularly interested in daily life and the importance of these actions. This volume argues that practice theory can also be used in a bioarchaeological context through the examination of human skeletal remains and the archaeological context in which they were excavated. Bioarchaeology offers a unique perspective on these day-to-day experiences—skeletal tissue is constantly undergoing a process of change and, as a living biological system, it can adapt to external forces. Furthermore, bioarchaeological studies are multi-scalar and can examine individuals, groups, or entire populations. Using osteological indicators of activity patterns (enthesal changes, osteoarthritis) and dietary isotopes (carbon, nitrogen) as examples, this book addresses patterns of everyday life in the ancient past. Physical activities and food consumption are actions that are carried out on a daily basis. While bioarchaeology does not have the ability to recreate specific day-to-day activities, we can assess broad trends in everyday life. The volume illustrates these points using examples from the Ancient Nile Valley. Through the examination of over 800 Egyptian and Nubian individuals from five different archaeological sites, the research addresses patterns of everyday life as they relate to social inequality, agency, and practice. Beyond osteological indicators of activity and dietary patterns, this book also discusses additional methods that can be pursued to draw attention to daily life. Lastly, this book also highlights the applicability of and potential contribution that practice theory can make to this area of research.

Yearbook Archaeopress Publishing Ltd

Back to English est un cahier d'activités permettant aux faux-débutants de renouer avec l'anglais et de réviser les bases de la grammaire et du vocabulaire de façon active, au gré d'activités variées, basées sur des exemples et des situations issus de la vie de tous les jours, dans le but de mieux comprendre et s'exprimer au quotidien. Il comprend : * 26 séquences réparties en 10 unités thématiques abordant les aspects essentiels de la langue anglaise * des explications simples et concises, sous forme de tableaux * 4 séquences de phonologie * plus de 190 activités ludiques corrigées dont des exercices de compréhension orale * 32 fichiers audio à télécharger sur le site des éditions Ellipses

The Sociology of Music Editions Ellipses

This timely Handbook collates a range of evidence from top scholars in the field to help readers understand who microfinance reaches, how it helps, and why clients come back. It offers updated views on important concepts that enable a broader framework for understanding poverty and the corresponding financial needs of poor households.

Human Rights Directory, Western Europe Springer

Anthropology has long had a vexed relationship with literature, and nowhere has this been more acutely felt than in France, where most ethnographers, upon returning from the field, write not one book, but two: a scientific monograph and a literary account. In Far Afield—brought to English-

language readers here for the first time—Vincent Debaene puzzles out this phenomenon, tracing the contours of anthropology and literature's mutual fascination and the ground upon which they meet in the works of thinkers from Marcel Mauss and Georges Bataille to Claude Lévi-Strauss and Roland Barthes. The relationship between anthropology and literature in France is one of careful curiosity. Literary writers are wary about anthropologists' scientific austerity but intrigued by the objects they collect and the issues they raise, while anthropologists claim to be scientists but at the same time are deeply concerned with writing and representational practices. Debaene elucidates the richness that this curiosity fosters and the diverse range of writings it has produced, from Proustian memoirs to proto-surrealist diaries. In the end he offers a fascinating intellectual history, one that is itself located precisely where science and literature meet.

Cumulated Index Medicus Psychology Press

First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

Groupware: Design, Implementation, and Use Springer Science & Business Media

The theme of this meeting was the management of technologies in the context of developing countries, and in the light of recent developments concerning especially open source software and applications. Speakers from various countries debated in English and in French over the importance of changing the rules concerning library management systems, as well as related implications. Results show that open source software might be a solution, although some conditions apply. Réunis sous le thème de la gestion des systèmes automatisés de bibliothèques dans les pays en développement, conférenciers et participants discutèrent des changements récents dans ce domaine, notamment de l'apport des logiciels à code source ouvert. Les conférenciers, provenant de différents pays, présentèrent en anglais et en français leurs différents points de vue et expériences sur cette question importante pour l'avenir, de même que sur les implications qui y sont liées. Les résultats démontrent que les logiciels à code source ouverts peuvent être une solution, mais à certaines conditions.

À LA DÉCOUVERTE des FORÊTS Springer

This book is concerned with the development of human factors inputs to software design. The aim is to create products which match the requirements and characteristics of users and which offer usable user interfaces. The HUFIT project - Human Factors in Information Technology - was carried out within the European Strategic Programme for Research and Development in Information Technology (ESPRIT) with the objective of enhancing the quality of software design within the European Community. The variety of activities undertaken to achieve this goal are reflected in this book. It describes human factors knowledge and tools for integration in information technology supplier organisations.

Cahiers D'histoire Mondiale Presses Univ de Bordeaux

The Neuroscience of Pain, Anesthetics and Analgesics examines the syndromes of pain and how they interlink with anesthesia and analgesics. The book covers assessments, screening and resources, and provides applications to related areas of medicine. It explores how the perception of pain results from a multifaceted interaction between illness beliefs, age, gender, time of onset, stress, socioeconomic status, and other factors. In addition, it scrutinizes how the neuroscience of pain in one condition may be relevant to understanding pain observed in other conditions. Sections address the onset of pain, the cause of pain, and the administration of analgesia or anesthesia. The book works to clarify all of the subjects pertinent to anesthesia and the brain. Featuring chapters on neurotransmitters, pharmacology and brain imaging, this volume discusses the mechanisms of pain and experimental studies undertaken to better understand the pathways involved. - Includes content on the features and assessments of pain, anesthesia and analgesia - Provides a mini-dictionary of terms and summary points that succinctly encapsulate each chapter - Covers a broad range of topics related to the neuroscience of analgesics and anesthetics - Helps readers navigate key areas for research and further clinical recommendations - Features chapters on molecular pathways, imaging and a deep look at behavior associated with the experience of pain
