The Black Watch was formed at Aberfeldy in Perthshire in the early eighteenth century as an independent security force, or 'watch', to guard the approaches to the lawless areas of the Scottish Highlands. Instantly recognisable due to the famous red hackle cap badge and the traditional dark blue and green government tartan kilt from which it got its name, The Black Watch was renowned as one of the great fighting regiments of the British Army and served with distinction in all major conflicts from the War of Austrian Succession onwards. In a highly controversial move, the regiment served under the operational control of the US Army during the counter-insurgency war in Iraq in December 2004. The Black Watch prided itself on being a 'family regiment', with sons following fathers into its ranks, and this new concise history reflects the strong sense of identity which was created over the centuries. In 2006, as part of a radical review of the country's defence policy, The Black Watch was amalgamated into the new Royal Regiment of Scotland. This new account of the famous regiment is therefore a timely memorial to its long and distinguished history.

A fascinating biography of a revolutionary American artist ripe for rediscovery as a photographer and champion of other artists Alfred Stieglitz (1864-1946) was an enormously influential artist and nurturer of artists even though his accomplishments are often overshadowed by his role as

Georgia O'Keeffe's husband. This new book from celebrated biographer Phyllis Rose reconsiders Stieglitz as a revolutionary force in the history of American art. Born in New Jersey, Stieglitz at age eighteen went to study in Germany, where his father, a wool merchant and painter, insisted he would get a proper education. After returning to America, he became one of the first American photographers to achieve international fame. By the time he was sixty, he gave up photography and devoted himself to selling and promoting art. His first gallery, 291, was the first American gallery to show works by Picasso, Rodin, Matisse, and other great European modernists. His galleries were not dealerships so much as open universities, where he introduced European modern art to Americans and nurtured an appreciation of American art among American artists.

Colonial Trauma is a path-breaking account of the psychosocial effects of colonial domination. Following the work of Frantz Fanon, Lazali draws on historical materials as well as her own clinical experience as a psychoanalyst to shed new light on the ways in which the history of colonization leaves its traces on contemporary postcolonial selves. Lazali found that many of her patients experienced difficulties that can only be explained as the effects of "colonial trauma" dating from the French colonization of Algeria and the postcolonial period. Many French feel weighed down by a colonial history that they are aware of but which they have not experienced directly. Many Algerians are traumatized by the way that the French colonial state imposed new names on people and the land, thereby severing the links with community, history, and genealogy and contributing to feelings of loss, abandonment, and injustice. Only by reconstructing this history and uncovering its consequences can we understand the impact of colonization and give individuals the tools to come to terms with their past. By demonstrating the power of psychoanalysis to illuminate the subjective dimension of

colonial domination, this book will be of great interest to anyone concerned with the long-term consequences of colonization and its aftermath.

In *The Meaning of Soul*, Emily J. Lordi proposes a new understanding of this famously elusive concept. In the 1960s, Lordi argues, soul came to signify a cultural belief in black resilience, which was enacted through musical practices—inventive cover versions, falsetto vocals, ad-libs, and false endings. Through these soul techniques, artists such as Aretha Franklin, Donny Hathaway, Nina Simone, Marvin Gaye, Isaac Hayes, and Minnie Riperton performed virtuosic survivorship and thus helped to galvanize black communities in an era of peril and promise. Their soul legacies were later reanimated by such stars as Prince, Solange Knowles, and Flying Lotus. Breaking with prior understandings of soul as a vague masculinist political formation tethered to the Black Power movement, Lordi offers a vision of soul that foregrounds the intricacies of musical craft, the complex personal and social meanings of the music, the dynamic movement of soul across time, and the leading role played by black women in this musical-intellectual tradition.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. *The Art of Seduction* is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

A 2008 cover of *The New Yorker* featured a much-discussed Black Power parody of Michelle and Barack Obama. The image put a spotlight on how easy it is to flatten the Black Power movement as we imagine new types of blackness. Margo Natalie Crawford argues that we have misread the Black Arts Movement's call for blackness. We have failed to see the movement's anticipation of the "new black" and "post-black." *Black Post-Blackness* compares the black avant-garde of the 1960s and 1970s Black Arts Movement with the most innovative spins of twenty-first century black aesthetics. Crawford zooms in on the 1970s second wave of the Black Arts Movement and shows the connections between this final wave of the Black Arts movement and the early years of twenty-first century black aesthetics. She uncovers the circle of black post-blackness that pivots on the power of anticipation, abstraction, mixed media, the global South, satire, public interiority, and the fantastic.

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's *Faust*, Dante's *Inferno*, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. In civil-rights-era Chicago, a dedicated group of black activists, educators, and organizations employed black public history as more than cultural activism. Their work and vision energized a black public history movement that promoted political progress in the crucial time between World War II and the onset of the Cold War. Ian Rocksborough-Smith's meticulous research and adept storytelling provide the first in-depth look at how these committed individuals leveraged Chicago's black public history. Their goal: to engage with the struggle for racial equality. Rocksborough-Smith shows teachers working to advance curriculum reform in public schools, while well-known activists Margaret and Charles Burroughs pushed for greater recognition of black history by founding the DuSable Museum of African American History. Organizations like the Afro-American Heritage Association, meanwhile, used black public history work to connect radical politics and nationalism. Together, these people and their projects advanced important ideas about race, citizenship, education, and intellectual labor that paralleled the shifting terrain of mid-twentieth century civil rights.

Between the countless works of art in the world and numerous laws on their care, the task of deciphering correct procedure can seem daunting. In *Art Law: A Concise Guide for Artists, Curators, and Art Educators*, Michael E. Jones breaks down the legal language into a concise tool for all those involved in the art world. While most art law books are written for law students or museum directors, trustees, and curators, Jones' book appeals to a far larger audience, particularly undergraduate and graduate students studying art, graphic design, photography, museum studies, art education and art business. It is also a useful research guide for museum professionals, gallery directors, foundation heads, working professional visual fine artists and board/trustee members. *Art Law* distinguishes itself by providing a broad scope of art law in relation to the world of artists and those organizations that support, preserve, govern, display, and even sell art. Covering topics such as acquisition, grants, and buying and selling, this book takes a look at the ethical and legal issues and rights that confront the art community and museums. Through case studies complete with images, readers can see these topics in action. *Art Law* is a must-have guide for art educators, museum studies students, art law and business programs, and artists looking for clear and readable descriptions and answers to the relevant legal issues facing the art world community.

An ambitious and revelatory investigation of the black female figure in modern art, tracing the legacy of Manet through to contemporary art. This revelatory study investigates how changing modes of representing the black female figure were foundational to the development of modern art. *Posing Modernity* examines the legacy of Édouard Manet's *Olympia* (1863), arguing that this radical painting marked a fitfully evolving shift toward modernist portrayals of the black figure as an active participant in everyday life rather than as an exotic "other." Denise Murrell explores the little-known interfaces between the avant-gardists of nineteenth-century Paris and the post-abolition community of free black Parisians. She traces the

impact of Manet's reconsideration of the black model into the twentieth century and across the Atlantic, where Henri Matisse visited Harlem jazz clubs and later produced transformative portraits of black dancers as icons of modern beauty. These and other works by the artist are set in dialogue with the urbane "New Negro" portraiture style with which Harlem Renaissance artists including Charles Alston and Laura Wheeler Waring defied racial stereotypes. The book concludes with a look at how Manet's and Matisse's depictions influenced Romare Bearden and continue to reverberate in the work of such global contemporary artists as Faith Ringgold, Aimé Mpane, Maud Sulter, and Mickalene Thomas, who draw on art history to explore its multiple voices. Featuring over 175 illustrations and profiles of several models, *Posing Modernity* illuminates long-observed figures and proposes that a history of modernism cannot be complete until it examines the vital role of the black female muse within it.
