Spiers and Surene's French and English Pronouncing Dictionary Bloomsbury Publishing

Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated

that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor

will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations+World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

Olivier-Thomas Venard's Thomas d'Aquin poète théologien trilogy, an in depth analysis of the scripture of St. Thomas Aquinas, is translated for a new

audience in this streamlined anthology. Featuring selections from all three books in the trilogy, chosen in accordance with Venard's direction and discernment, it introduces not only arguments pertinent to the theme of this volume, but an invitation to explore the full breadth of Venard's work. Concentrating on the subjects of scripture, theology and literature, language as a theological question and the word of God, Murphy and Oakes capture the scope and energy of Venard's trilogy while collating many of its key passages. Ranging from the themes of a poetic gospel and Christology to the Thomist theories of semiology and the metaphysics of the Word, this volume sets scholars on the path to a deeper understanding of Aquinas's systematic theology.

Writing in English, German, or French, more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context. The gradually emerging institutions concerned with the study, organisation, documentation, and distribution are considered as well as those dealing with the utilisation of language related knowledge. Special emphasis has been placed on related disciplines, such as rhetoric, the philosophy of language, cognitive psychology, logic and neurological science.

"In *Murder in Parisian Streets* Thomas Cragin provides an in-depth study of the production, sale, and content of the canards. He demonstrates their significance to nineteenth-century culture, even their role in determining the emerging tabloid's success. Cragin explores the incremental creation of textual meaning in the canards' authorship, production, distribution, and consumption. He exposes the power of oral traditions as well as modern marketing at work upon this popular news literature. The canards challenge our assumptions about the nineteenth century's revolution in print and reorient our understanding of cultural creation through textual construction."--Jacket.
