 The Navy Yeoman (YN)

is an administrative related field and is normally assigned to an administrative office. In today's Navy, the YN carries out a broad range of duties which include office procedures, typing correspondence such as official letters, instructions, notices, plan of the day, fitness and evaluation forms and management programs, mail management, security, legal, awards, and

records disposal. YN also must demonstrate a working knowledge of pay and allowances, leave procedures, along with maintaining officer and enlisted service records, officer promotions and enlisted advancements . YN must understand the following programs: the officer distribution control report (ODCR) and enlisted distribution verification report (EDVR),

casualty assistance calls officer (CACO), social usage and protocol, travel, navy standard integrated personnel system (NSIPS), and individual personnel tempo (ITEMPO). YN also need to have an understanding of working with flag offices. Navy Performance Evaluation System National Academies Press The recognized standard for

Manual of the Medical Department of the Navy

Now in paperback for the first time, this collection of biographical essays delves into the careers of thirteen colorful naval leaders who guided the U.S. Navy through four

turbulent decades of transition. Interpretive in approach, each essay emphasizes facets of the officer's personality or aspects of his career that made lasting contributions to the navy. [Report of the National Roster of Scientific and Specialized Personnel to the National Resources Planning Board BUPERS 1610.1B Appointments to Naval Academy](#) The U.S. Navy established an

ecological monitoring program to determine whether electric and magnetic fields from extremely low frequency (ELF) communications systems influenced plant and animal populations near the transmitting facilities. Although some of the researchers believe that a few biological changes might have occurred, they concluded that the results do not indicate

significant adverse ecological effects. This book evaluates the 11 ecological studies of the Navy's monitoring program and examines the adequacy of experimental design, the data collection and analysis, and the soundness of the conclusions. It also addresses whether the monitoring program was capable of detecting subtle effects due to ELF exposure and examines the biological

changes observed by some program researchers, such as enhanced tree growth. X-15
