Classical liberal democratic theory has provided crucial ideas for a still dominant and hegemonic discourse that rests on ideological conceptions of freedom, equality, peacefulness, inclusive democratic participation, and tolerance. While this may have held some truth for citizens in Western liberal-capitalist societies, such

liberal ideals have never been realized in colonial, postcolonial and settler colonial contexts. Liberal democracies are not simply forms of rule in domestic national contexts but also geo-political actors. As such, they have been the drivers of processes of global oppression, colonizing and occupying countries and people, appropriating indigenous land, annihilating people with eliminatory politics right up to genocides. There can be no doubt that the West - with its civilizational Judeo-Christian idea and divine mission 'to subdue the world' - has destroyed other civilizations, countries, trading systems, and traditional ways of life and is responsible for the death of hundreds of millions of human beings in the course of colonizing the world from its Empires of trade through colonialism to settler colonialism and today's politics of regime change. The book discusses the settler colonial regime that Israel has established in Palestine while still claiming to be a democracy. It discusses the failures of liberal democracy to overcome the structural and racist

inequalities in post-Apartheid South Africa, and it presents hopeful outlooks on new ideas and forms of democracy in social movements in the MENA region.

While the Arab revolutions have obviously triggered extensive social and political changes, the far-reaching consequences of the cultural and discursive changes have yet to be adequately considered. For activists, researchers and journalists, the revolution was primarily a revolution in language; a break with the linguistic oppression and the rigidity of the old regimes. This break was accompanied by the emergence of new languages, which made it possible to inform, tell and translate the ongoing events and transformations. This language of the revolution was carried out into the world by competing voices from Syria (by local and foreign researchers, activists, and journalists). The core of this project is to find the various translations of the language of the Syrian revolution (2011 -2012) from Arabic to English to study and analyze. In addition, the discursive and non-discursive dimensions of the revolution are to be seen as another act of translation, including the

language of the banners, slogans, graffiti, songs and their representation in English. This research aims, in addition to contextualizing the language of the revolution, to demonstrate how this language was translated into English through three levels of translation. The first explores the context of translations from Arabic into English and examines three English books written about Syria. The second level sees translation as an act of importation into the dominant discourse and is exemplified with three books representing the revolutionary language. The third, and last, level looks at translation from the margin to the center, represented by activist translations from Arabic into English. The research tries to study how translations of the language of the Syrian revolution are reshaped after leaving their originating discourse and entering the English one Military Review Springer Nature

Syria has been at the center of world news since 2011, following the beginnings of a popular uprising in the country and its subsequent violent and murderous repression

by the Assad regime. Eight years on, Joseph Daher analyzes the resilience of the regime and the failings of the uprising, while also taking a closer look at the counter revolutionary processes that have been undermining the uprising from without and within. Joseph Daher is the author of *Hezbollah: The Political Economy of the Party of God*, and founder of the blog *Syria Freedom Forever*.

This book provides a demographic profile of the Syrian diaspora into Europe and identifies the issue of forced migration as a separate and increasingly salient topic within the more general field of migration research. It describes the progressive increase in numbers of Syrian refugees in different European countries during recent years and gives a demographic profile of the Syrian refugee population. The book also compares and synthesizes the demographic profiles presented, to show how the population of Syrian refugees differs from country to county in terms of age structure, sex ratio, family status, educational attainment and other social and economic characteristics. By providing a solid empirical portrait based on national and international statistics, this book will be a great resource to students, academics in migration and refugee studies as well as social scientists and policy-makers in European countries.

Both Australia and Sweden are economically, socially and politically well-developed countries and each has responded to the Syrian crisis in its own way with features that define refugee children's schooling trajectories for transition to life and work. *Syrian Refugee Children in Australia and Sweden* provides insights into policies influencing the education and schooling of Syrian refugee children in Australia and Sweden. This book uses the perspectives of Syrian refugee children and their voiced experiences to elicit recommendations for education practices and content. Their voices were central to the analysis for the main reason that their viewpoints could contribute in a practical way to the development of pedagogical approaches that would support their schooling, and an effective and productive transition to life in the host countries. The opinions, suggestions and experiences of other stakeholders such as parents, caregivers, teachers and school and state officials, were included for greater

understanding so that as many relevant contexts are covered. The recommendations for refugee education proposed in this book will be useful for teachers, principals and policy makers directly involved in educating refugee students and this could positively impact on young refugee students finding their way to a new and better life.
