Dictionary of the English and German Languages for Home and School: German-English Walter de Gruyter

Although opera figured importantly in the French quarrel of the Ancients versus the Moderns and in the English discussions of heroic tragedy, it was in Germany that its role in the development of criticism and

aesthetics was most pronounced. Beginning with this observation, Gloria Flaherty tries to show how, from its very inception and through most of its history, opera was related not only to the revival of ancient drama and the evolution of modern theater, but also to the development of modern critical thought. The author provides a comprehensive treatment of the writings both for and against the operatic forms that dominated seventeenth- and eighteenth-century German theater. Included in her focus are

the academic critics who denounced the failure of opera to comply with universally valid standards of beauty and the rules of drama; the various sermonizers who condemned opera's excessive emphasis on the senses and preached total abstinence; and the theatrical artists and patrons as well as the innumerable poets, philosophers, and writers who upheld the freedom to experiment and defended opera as a modern theatrical form with nearly unlimited artistic possibilities. As a result of these controversies, the defense

of opera helped to shape a distinctively German version of the classical ideal, enriched German criticism with new vocabulary, promoted the study of the performing arts, and emphasized music and spectacle as essential components of theater. Im Zeichen postkolonialer Kritik sind Museen der Volks- und Völkerkunde heute eine umstrittene Gattung. Museen werden

aufgelöst, Sammlungen umorganisiert, neue Institutionen gegründet. Dieses Buch nimmt die Entwicklungen in Frankreich, Deutschland, Belgien und USA von der Mitte des 19. Jahrhunderts bis zur Gegenwart in den Blick. Es bringt Kuratoren, Kunsthistoriker, Anthropologen, Soziologen und Historiker in einen inter- und multidisziplinären Austausch über neue Wege der Visualisierung des Eigenen wie Fremden. In light of postcolonial criticism, the museum of ethnology, anthropology and folklore has become a contested territory. Some museums are being dissolved, collections reorganized, and new institutions created. Focusing on France, Germany, Belgium and the United States in the period between the mid-nineteenth century and the present, this essay collection creates an interdisciplinary dialogue between curators, sociologists, anthropologists, historians and art historians. It sheds new light on the manner in which a modern museology negotiates the problematic heritage of the field and finds new ways to exhibit self and other. Inhalt Vorwort I. Bei genauerem Hinsehen sind wir, trotz Leid, Schuld und Tod, von vielen täglichen Wundern umgeben. Was bedeuten sie? Unsere Beziehungs-, Kommunikations-, Liebesfähigkeit, unsere Kreativität und unsere ethischen Antennen-was sagen sie uns über Sinn und Ziel unseres Lebens? Und wenn wir über die feine Abstimmung der Naturgesetze nachdenken, kann das alles Zufall sein? Der britische Physiker Stephan Hawking bringt seine Forschung auf folgenden Nenner: "Wenn ich wüsste, warum das Universum entstand, würde ich alles wirklich Wichtige wissen." Winner of the Prix Médicis, this multifaceted literary novel follows the Jesuit scholar Athanasius Kircher across 17th century Europe and Eleazard von Wogau, a retired French correspondent, through modern Brazil. When Eleazard begins editing a strange, unpublished biography of Kircher, the rest of his life seems to begin unraveling—his ex-wife goes on a dangerous geological expedition to Mato Grosso; his daughter abandons school to travel with her young professor and her lesbian lover to an indigenous beach town, where the trio use drugs and form interdependent sexual relationships; and Eleazard himself starts losing his sanity, escalated by loneliness, and his

work on the biography. Patterns begin to emerge from these interwoven narratives, which develop toward a mesmerizing climax. Shortlisted for the Goncourt Prize and the European Book Award, and already translated into 14 languages, *Where Tigers Are At Home* is large-scale epic, at once literary and entertaining, that belongs in the company of Umberto Eco and Haruki Murakami.

This book engages non-digital role-playing games—such as table-top RPGs and live-action role-plays—in and from Japan, to sketch their possibilities and fluidities in a global context. Currently, non-digital RPGs are experiencing a second boom worldwide and are increasingly gaining scholarly attention for their inter-media relations. This study concentrates on Japan, but does not emphasise unique Japanese characteristics, as the practice of embodying an RPG character is always contingently realised. The purpose is to trace the transcultural entanglements of RPG practices by mapping four arenas of conflict: the tension between reality and fiction; stereotypes of escapism; mediation across national borders; and the role of scholars in the making of role-playing game practices.

This book shows for the first time how green infrastructure can work in an African

urban context. On one level it provides a major rethinking of the role of infrastructure in urban society since the creation of networked infrastructure in the early twentieth century. On another, it explores the changing paradigms of urban development through the fundamental question of how decisions are made. With a focus on Africa's fast-growing secondary towns, where 70 per cent of the urban population live, the book explains how urban infrastructure provides the key to the relationship between economic development and social equity, through the mediation of natural resources. Adopting this view enables investment to be channelled more effectively to provide the engine for economic growth, while providing equitable services for all residents. At the same time, the mediation of resource flows integrates the metabolism of the city into the wider ecosystem. This vision leads to a new way of thinking about infrastructure, giving clear definition to the concept of green infrastructure. On the basis of research gathered throughout an extensive career, John Abbott draws in particular from his experience in Ethiopia to demonstrate the

ways in which infrastructure needs to respond to the economies, societies and natural environments of twenty-first century urban Africa.

In Black Enlightenment Surya Parekh reimagines the Enlightenment from the position of the Black subject. Parekh examines the works of such Black writers as the free Jamaican Francis Williams (1697-1762), Afro-British thinker Ignatius Sancho (1729?-1780), and Afro-American poet Phillis Wheatley (1753?-1784), placing them alongside those of their white European contemporaries David

Hume (1711-1776) and Immanuel Kant (1724-1804). By rethinking the Enlightenment and its canons, Parekh complicates common understandings of the Enlightenment wherein Black subjects could exist only in negation to white

subjects. Black Enlightenment points to the anxiety of race in Hume, Kant, and others while showing the importance of Black Enlightenment thought. Parekh prompts us to consider the timeliness of reading Black Enlightenment authors who become “free” in a society hostile to that

freedom.
