Any law school graduate will tell you that when picking your outline tool you need to pick the best because your outlines are the most important study tool you will use throughout your law school career. Developed by legendary study aid author Steve Emanuel, Emanuel® Law Outlines (ELOs) are the #1 outline

choice among law students. An ELO ensures that you understand the concepts as you learn them in class and helps you study for exams throughout the semester. Here's why you need an ELO from your first day of class right through your final exam: ELOs help you focus on the concepts and issues you need to master to succeed on exams. They are easy to understand: Each ELO contains comprehensive coverage of the topics, cases, and black letter law found in your specific casebook, but is

explained in a way that is understandable. The Quiz Yourself and Essay Q&A features help you test your knowledge throughout the semester. Exam Tips alert you to the issues and fact patterns that commonly pop up on exams. The Capsule Summary provides a quick review of the key concepts covered in the full Outline—perfect for exam review!

This book efficiently contributes to our understanding of the interplay between data, technology and communicative practice on the one hand, and democratic participation on the other. It

addresses the emergence of proactive data activism, a new sociotechnical phenomenon in the field of action that arises as a reaction to massive datafication, and makes affirmative use of data for advocacy and social change. By blending empirical observation and in-depth qualitative interviews, Gutiérrez brings to the fore a debate about the social uses of the data infrastructure and examines precisely how people employ it, in combination with other technologies, to collaborate and act for social change.

Rising health care costs are a central fiscal challenge confronting the United States. National spending on health care currently accounts for 18 percent of gross domestic product (GDP), but is anticipated to increase to 25 percent of GDP by 2037. The Bipartisan Policy Center argues that "this rapid growth in health expenditures creates an unsustainable burden on America's economy, with far-reaching consequences". These consequences include crowding out many national priorities, including investments in education, infrastructure, and research; stagnation of employee wages; and decreased international competitiveness. In spite of health care

costs that far exceed those of other countries, health outcomes in the United States are not considerably better. With the goal of ensuring that patients have access to high-quality, affordable cancer care, the Institute of Medicine's (IOM's) National Cancer Policy Forum convened a public workshop, *Delivering Affordable Cancer Care in the 21st Century*, October 8-9, 2012, in Washington, DC. *Delivering Affordable Cancer Care in the 21st Century* summarizes the workshop. *Between Fault Lines and Front Lines* B&H Publishing Group

The Willpower Instinct Simon and Schuster

NEW YORK TIMES BESTSELLER • The classic work that predicted the anxieties of a world upended by rapidly emerging technologies—and now provides a road map to solving many of our most pressing crises. “Explosive . . . brilliantly formulated.” —The Wall Street Journal
Future Shock is the classic that changed our view of tomorrow. Its startling insights into accelerating change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave

a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, Future Shock is the most important study of change and adaptation in our time. In many ways, Future Shock is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change affects our products, communities, organizations—even our patterns of friendship and love. But Future Shock also illuminates the world of tomorrow by exploding countless clichés about today. It vividly describes the emerging global civilization: the rise of new businesses, subcultures, lifestyles, and human relationships—all of them temporary. Future Shock will intrigue, provoke, frighten, encourage,

and, above all, change everyone who reads it.

 How do lawyers resolve ethical dilemmas in the everyday context of their practice? What are the issues that commonly arise, and how do lawyers

determine the best ways to resolve them? Until recently, efforts to answer these questions have focused primarily on rules and legal doctrine rather than the real-life situations lawyers face in legal practice. The first book to present empirical research on ethical decision making in a variety of practice contexts, including corporate litigation, securities, immigration, and divorce law, *Lawyers in Practice* fills a substantial gap in the existing literature. Following an introduction emphasizing the increasing importance of understanding context in the legal profession, contributions focus on ethical dilemmas ranging from relatively narrow ethical issues to broader problems of professionalism, including the prosecutor's obligation to disclose evidence, the management of

conflicts of interest, and loyalty to clients and the court. Each chapter details the resolution of a dilemma from the practitioner's point of view that is, in turn, set within a particular community of practice. Timely and practical, this book should be required reading for law students as well as students and scholars of law and society.

In this revised and expanded edition of *Brothers, We Are Not Professionals* that includes a new introduction and select all-new chapters, best-selling author John Piper pleads through a series of thoughtful essays with fellow pastors to abandon the professionalization of the pastorate and pursue the prophetic call of the Bible for radical ministry. “We pastors are being killed by the professionalizing of the pastoral ministry,” he writes. “The mentality of the professional is not the mentality of the prophet. It is not the mentality of the slave of Christ. Professionalism has nothing to do with the essence and heart of the Christian ministry. The more professional we long to be, the more spiritual death we will leave in our wake. For there is no professional childlikeness,

there is no professional tenderheartedness, there is no professional panting after God. “Brothers, we are not professionals. We are outcasts. We are aliens and exiles in the world. Our citizenship is in Heaven, and we wait with eager expectation for the Lord (Phil. 3:20). You cannot professionalize the love for His appearing without killing it. And it is being killed. “The world sets the agenda of the professional man; God sets the agenda of the spiritual man. The strong wine of Jesus Christ explodes the wine-skins of professionalism.”

Now in paperback, “a compelling, accessible, and provocative piece of work that forces us to question many of our assumptions” (Gillian Tett, author of

Fool's Gold). Quants, physicists working on Wall Street as quantitative analysts, have been widely blamed for triggering financial crises with their complex mathematical models. Their formulas were meant to allow Wall Street to prosper without risk. But in this penetrating insider's look at the recent economic collapse, Emanuel Derman—former head quant at Goldman Sachs—explains the collision between mathematical modeling and economics and what makes financial models so dangerous. Though such models imitate the style of physics and employ the language of mathematics, theories in physics aim for a description of reality—but in finance, models can shoot only for a very limited approximation of reality. Derman uses his firsthand

experience in financial theory and practice to explain the complicated tangles that have paralyzed the economy. *Models Behaving Badly* exposes Wall Street's love affair with models, and shows us why nobody will ever be able to write a model that can encapsulate human behavior. *American Industries* Aspen Publishing With the warmth and humor we've come to know, the creator and host of *A Prairie Home Companion* shares his own remarkable story. In *That Time of Year*, Garrison Keillor looks back on his life and recounts how a Brethren boy with writerly ambitions grew up in a small town on the Mississippi in the 1950s and, seeing three good friends die young, turned to comedy and radio. Through a series of unreasonable lucky breaks, he

founded A Prairie Home Companion and put himself in line for a good life, including mistakes, regrets, and a few medical adventures. PHC lasted forty-two years, 1,557 shows, and enjoyed the freedom to do as it pleased for three or four million listeners every Saturday at 5 p.m. Central. He got to sing with Emmylou Harris and Renée Fleming and once sang two songs to the U.S. Supreme Court. He played a private eye and a cowboy, gave the news from his hometown, Lake Wobegon, and met Somali cabdrivers who'd learned English from listening to the show. He wrote bestselling novels, won a Grammy and a National Humanities Medal, and made a movie with Robert Altman with an alarming amount of improvisation. He says, "I was unemployable and managed

to invent work for myself that I loved all my life, and on top of that I married well. That's the secret, work and love. And I chose the right ancestors, impoverished Scots and Yorkshire farmers, good workers. I'm heading for eighty, and I still get up to write before dawn every day."

[Smith v. Providence Health &

Services] Expanded discussion of courts’ refusal to allow plaintiffs to recover for “pure economic loss,” including the California Supreme Court case holding that businesses whose profits were damaged by a toxic gas leak cannot recover anything if they did not also suffer some personal injury or property damage. [Southern California Gas Leak Cases] Expanded coverage of the modern approach to the “both ways” rule for imputed contributory/comparative negligence, including the court’s refusal to apply the rule against owner-passengers of a vehicle who are injured due to the combined negligence of a third party and the driver of the owner’s vehicle. [Seaborne-Worsely v. Mintiens] Expanded coverage of the duty to warn

in prescription-drug product-liability suits, including whether a plaintiff can recover for inadequate labeling from the maker of the brand-name version of a drug, if the plaintiff actually took a generic version made by some other manufacturer. [T.H. v. Novartis Pharmaceuticals Corp.] New coverage of strict product-liability suits arising from Internet sales, including whether a company that merely supplies fulfillment services—and never takes title to the goods—can nonetheless be liable as a “seller” of the goods. [Oberdorf v. Amazon.com Inc.]
