Personally I have known Mr. Chitta Ranjan Das from the days of his youth. His father, the late Babu Bhuban Mohan Das was a friend of mine. Bhuban Mohan was a well-known Attorney of the Calcutta High Court. For some time he was connected also with Bengalee journalism. As editor, first, of the

Brahmo Public Opinion, and subsequently of the Bengal Public Opinion, he made a very high position for himself among Bengalee journalists. His style was very simple, and he spoke with a directness that was rather rare in our more successful English weeklies of those days. Babu Bhuban Mohan was a sincere patriot, and though like good many English educated Bengalees of his generation, he threw himself heart and soul into the Brahmo Samaj Movement, in his personal life and more particularly in his dealings with his Hindu relatives, he belonged to

the old Hindu type, and spent whatever he earned,—and he earned a lot—for the support of his poorer relatives. Indeed he spent upon them more than his finances allowed and consequently got involved in heavy liabilities that forced him, during the closing years of his professional life, to take refuge in the Insolvency Court.

This book looks at how religious studies is framed and taught in India. It addresses the contradiction between the country's vibrant religious life and the dearth of comparative and social scientific religious studies programs across Indian universities. The volume: • Studies the efforts by Rabindranath Tagore in Santiniketan and Mohan Malaviya in Varanasi, to introduce and institutionalize religious studies in India; • Discusses the

notions of religion and spirituality and situates the failure of the 'secularization thesis' in the context of modern India; • Provides concrete suggestions on how to develop religious studies in relation to global citizenship and Indian cultural heritage with the hope of initiating a larger discussion. A unique contribution to the study of religion in society and education, the book will be indispensable to students and researchers of theology, history, philosophy, sociology, secularization, globalization, religious studies, education studies, and South Asian studies.

Tracing the history of the Indian National Congress from its founding in 1885 until about 1905, Professor McLane analyzes its efforts to build a national community and to obtain fundamental reforms from the British. In so doing, he extends our understanding of the dynamics of Indian pluralism. In its first two decades of existence, the Congress failed to inspire sacrifices from its members or to attract Muslims or Indians without an English education. The author explains this early stagnation in terms of developments within the Congress as well as outside in Indian society. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton

University Press since its founding in 1905.

Indian party politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of "ideology" is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism-the extent to which the state should dominate and regulate society-and recognition-whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

The Changing Party Systems of India

This book explains the postcolonial Indian

polity by presenting an alternative historical narrative of the British Empire in India and India's struggle for independence. It pursues this narrative along two major trajectories. On the one hand, it focuses on the role of imperial judicial institutions and practices in the making of both the British Empire and the anti-colonial movement under the Congress, with the lawyer as political leader. On the other hand, it offers a novel interpretation of Gandhi's non-violent resistance movement as being different from the Congress. It shows that the Gandhian movement, as the most powerful force largely responsible for India's independence, was anchored not in western discourses of political and legislative freedom but rather in Indic traditions of renunciative freedom, with the renouncer as leader. This volume offers a comprehensive and new reinterpretation of the Indian Constitution in the light of this historical narrative. The book contends that the British colonial idea of justice and the Gandhian ethos of resistance have been the two competing and conflicting driving forces that have determined the nature and evolution of

the Indian polity after independence.

A Forgotten Ambassador in Cairo PHI Learning Pvt. Ltd.

Amongst the multitude of tombs in the City of the Dead in Cairo, there lies buried a lone Indian — a scholar, writer, debonair statesman and a leader of the freedom movement. Who is he? How did he get there? For a man who used both the lectern and the pen to devastating effect during the Indian Independence movement led by the likes of Gandhi and Nehru, little is known of Syud Hossain. Born to an aristocratic family in Calcutta, he forayed into journalism early in life and became the editor of Motilal Nehru's nationalist newspaper, *The Independent*. After a brief elopement with Motilal's daughter, Sarup (aka Vijaya Lakshmi Pandit), Hossain, under immense pressure from Nehru and Gandhi, annulled the marriage and stayed away from the country. Thus began several years of exile. Eventually, he landed in the United States. Flitting from one place to another, making homes of hotel rooms, he imparted Gandhi's message across the country. He

fought for India's cause from afar, garnering support in the United States and decrying British oppression. Syud Hossain inspired and irked in equal measure; with every speech he delivered and every editorial he penned, he sent a shiver down the spine of the colonial ruler. In addition, Hossain took on the fight for Indian immigrant rights in the United States, one that successfully culminated in President Truman signing the Luce-Celler Bill into an Act in 1946. Hossain returned to India to witness the triumph of her independence as well as the tragedy of Gandhi's assassination. Thereafter appointed India's first ambassador to Egypt, he died while in service and was laid to rest in Cairo. *A Forgotten Ambassador in Cairo* offers an illuminating narrative of Hossain's life interspersed with historical details that landscapes a vivid political picture of that era. Through primary sources that include Hossain's private papers, British Intelligence files, and contemporary correspondence and newspapers, N.S. Vinodh brilliantly brings to life a man who has been relegated far too long to the shadows of time.

Dear reader! In your hand you have the second book from the series “XXI Century Technologies.” The first book under the title “Manufacturing Technologies for Machines of the Future” was published by “Springer” in 2003. This book is aimed at solving one of the basic problems in the development of modern machine-building – working out of technologies and manufacturing equipment which would promote the continuous development and improvement of the final product design, rapidly “adaptable” to the requirements of the market as for the quantity, quality, and variety of products manufactured with the lowest cost and minimum time and labor of the product process. In this book the problems of theory and practice of development in the reconfigurable

manufacturing systems and transformable factories for various machine-building branches with a focus on automotive industry are discussed. The problems concerning the development of a new class of production systems which in comparison to the flexible manufacturing systems are composed of a far less quantity of machine-tools (reduced cost of production) are discussed. In comparison to the conventional automated lines (dedicated systems) they make it possible to rapidly transform the equipment for new products manufacturing. The book has some advantages concerning the art of scientific ideas and the presentation of developments.
