CONOR CUNNINGHAM

Global Register of Migratory Species

Springer Science & Business Media

Wild chimpanzees are only found in tropical Africa, where their populations have declined by more than 66% in the last 30 years. This Action Plan focuses on one of the four chimpanzee subspecies, the western chimpanzee, which is one of the two subspecies most threatened with extinction. This publication presents a plan for action that represents a consensus among all parties concerned with the conservation of chimpanzees.

Forest Pathology and Plant Health

Editions Cheminements

The 2010 State of the Forest report (SOF) benefited from financial support from the European Union, the United States, Germany, France and UNESCO. It represents the collaborative effort of over 100 individuals from a diversity of institutions and the forestry administrations of the Central African countries. The SOF process began with the selection and definition of indicators relevant to monitoring the state of forests in Central Africa. The indicators are structured around three thematic areas: (i) forest cover; (ii) management of production forests; and (iii) conservation and biodiversity. They are presented in a hierarchical structure at the regional, national and management unit (i.e. logging concessions and protected areas) levels. The indicators were vetted by a representative panel of stakeholders of forest management in Central Africa. The indicators are used to

guide an annual data collection process carried out between April and August by national groups of four to ten individuals working within the forestry administrations. The data reported on in the 2010 SOF were primarily collected in 2009 and 2010. Results were validated in national workshops attended by government officials as well as representatives of environmental NGOs, the private sector and development projects. The data provided an important basis for the authors of the 11 chapters of the 2010 SOF, which were under the coordination of a scientific committee of international renown. A final workshop was held 29-30 March, 2011 in Douala to review a draft report. Following amendments based on comments from a wide audience of experts the final layout was completed.

SCAD Bulletin BRILL

The case history approach has an impressive record of success in a variety of disciplines. Collections of case histories, casebooks, are now widely used in all sorts of specialties other than in their familiar application to law and medicine. The case method had its formal beginning at Harvard in 1871 when Christopher Lagdell developed it as a means of teaching. It was so successful in teaching law that it was soon adopted in medical education, and the collection of cases provided the raw material for research on various diseases. Subsequently, the case history approach spread to such varied fields as business, psychology, management, and economics, and there are over 100 books in print that use this approach. The idea for a series of Casebooks in

Earth Science grew from my experience in organizing and editing a collection of examples of one variety of sedimentary deposits. The project began as an effort to bring some order to a large number of descriptions of these deposits that were so varied in presentation and terminology that even specialists found them difficult to compare and analyze. Thus, from the beginning, it was evident that something more than a simple collection of papers was needed. Accordingly, the nearly fifty contributors worked together with George de Vries Klein and me to establish a standard format for presenting the case histories. *West African Chimpanzees* Library of Congress

This book presents a unique and up-to-date summary of what is known about groundwater on our planet, from a global perspective and in terms of area-specific factual information. Unlike most textbooks on groundwater, it does not deal with theoretical principles, but rather with the overall picture that emerges as a result of countless observations,

SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and

Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Litteratur der Landesvermessung, Kataloge der Kartensammlungen, Karten, Pläne, Reliefs, Panoramen Routledge

This open access book discusses the eroding economics of nuclear power for electricity generation as well as technical, legal, and political acceptance issues. The use of nuclear power for electricity generation is still a heavily

disputed issue. Aside from technical risks, safety issues, and the unsolved problem of nuclear waste disposal, the economic performance is currently a major barrier. In recent years, the costs have skyrocketed especially in the European countries and North America. At the same time, the costs of alternatives such as photovoltaics and wind power have significantly decreased.

Contents History and Current Status of the World Nuclear Industry The Dramatic Decrease of the Economics of Nuclear Power Nuclear Policy in the EU The Legacy of Csernobl and Fukushima Nuclear Waste and Decommissioning of Nuclear Power Plants Alternatives: Heading Towards Sustainable Electricity Systems Target Groups Researchers and students in the fields of political, economic and technical sciences Energy (policy) experts, nuclear energy experts and practitioners, economists, engineers, consultants, civil society organizations

The Editors Prof. Dr. Reinhard Haas is University Professor of energy economics at the Institute of Energy Systems and Electric Drives at Technische Universität Wien, Austria. PD Dr. Lutz Mez is Associate Professor at the Department for Political and Social Sciences of Freie Universität Berlin, Germany. PD Dr. Amela Ajanovic is a senior researcher and lecturer at the Institute of Energy Systems and Electrical Drives at Technische Universität Wien, Austria.--

Essai d'histoire locale by Djiguiba

Camara World Conservation Union Despite an ever-growing scholarly interest in the work of Edmund Husserl and in the history of the phenomenological movement, much of the contemporaneous scholarly context surrounding Husserl's work remains shrouded in darkness. While much has

been written about the critiques of Husserl's work associated with Heidegger, Levinas, and Sartre, comparatively little is known of the debates that Husserl was directly involved in. The present volume addresses this gap in scholarship by presenting a comprehensive selection of contemporaneous responses to Husserl's work. Ranging in date from 1906 to 1917, these texts bookend Husserl's landmark *Ideas for a Pure Phenomenology and Phenomenological Philosophy* (1913). The selection encompasses essays that Husserl responded to directly in the *Ideas I*, as well as a number of the critical and sympathetic essays that appeared in the wake of its publication. Significantly, the present volume also includes Husserl's subsequent responses to his critics. All of the texts included have been translated into English for the first time, introducing the reader to a wide range of long-neglected material that is highly relevant to contemporary debates regarding the meaning and possibility of phenomenology.

Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy

Springer

2017 Reprint of 1931 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition software. Widely regarded as the principal founder of phenomenology, one of the most important movements in twentieth century philosophy, Edmund Husserl's *Ideas* is one of his most important works and a classic of twentieth century thought. Husserl's early thought conceived of phenomenology - the general study of what appears to conscious experience - in a relatively narrow way, mainly in

relation to problems in logic and the theory of knowledge. The publication of *Ideas* in 1913 witnessed a significant and controversial widening of Husserl's thought, changing the course of phenomenology decisively. Husserl argued that phenomenology was the study of the very nature of what it is to think, "the science of the essence of consciousness" itself. Husserl's arguments ignited a heated debate regarding the nature of consciousness and experience that has endured throughout the twentieth and continues in the present day. No understanding of twentieth century philosophy is complete without some understanding of Husserl, and his work influenced some of the great philosophers of the twentieth century, such as Martin Heidegger and Jean-Paul Sartre.

The Sources of Husserl's 'Ideas I'

Springer

This new book brings together some of the leading criminologists across Europe, to showcase the best of European criminology. This Handbook aims to reflect the range and depth of current work in Europe, and to counterbalance the impact of the – sometimes insular and ethnocentric – Anglo-American criminological tradition. The end-product is a collection of twenty-eight chapters illustrating a truly comparative and interdisciplinary European criminology. The editors have assembled a cast of leading voices to reflect on differences and commonalities, elaborate on theoretically grounded comparisons and reflect on emerging themes in criminology in Europe. After the editors' introduction, the book is organised in three parts: five chapters offering historical, theoretical and policy oriented overviews of European issues in crime and crime control; seven chapters

looking at different dimensions of crime in Europe, including crime trends, state crime, gender and crime and urban safety; fifteen chapters examining the variety of institutional responses, exploring issues such as policing, juvenile justice, punishment, green crime and the role of the victim. This book gives some indication of the richness and scope of the emerging comparative European criminology and will be required reading for anyone who wants to understand trends in crime and its control across Europe. It will also be a valuable teaching resource, especially at postgraduate level, as well as an important reference point for researchers and scholars of criminology across Europe.

Le temps des restrictions Springer Science & Business Media

In this book a group of leading authorities in the field address the key issues surrounding the future of sentencing in Britain, in the light particularly of the highly influential Halliday Report. These proposals for reform amount to the single most ambitious and comprehensive set of proposals for reconstituting the sentencing system of a common-law country, and include proposals to replace existing sentencing statutes, the establishment of a sentencing commission and sentencing guidelines, and the creation of a sentence review function in the judiciary. As well as addressing the major issues of the Halliday Report the chapters in this book go beyond this to explore the broader set of policy problems and implications which are raised, drawing upon experiences of reform in other jurisdictions and contexts, particularly that of the USA. This book will be essential reading for anybody with an

interest in the future of sentencing or the future direction of the criminal justice system as a whole.

Dans Essai d'histoire locale, Djiguiba Camara, un intermédiaire colonial et un interprète, décrit l'histoire de la Haute Guinée, de l'empire de Samori Touré et des résistances anticoloniales. In Essay on Local History, Djiguiba Camara, a colonial intermediary and interpreter, describes the history of Upper Guinea, with emphasis on the Empire of Samori Touré and of anticolonial local resistance.

The Technological and Economic Future of Nuclear Power MDPI

the Logische Untersuchungen, phenomenology has been conceived as a substratum of empirical psychology, as a sphere comprising "immanental" descriptions of psychical mental processes, a sphere comprising descriptions that - so the immanence in question is understood - are strictly confined within the bounds of internal experience. It would seem that my protest against this conception has been of little avail; and the added explanations, which sharply pinpointed at least some chief points of difference, either have not been understood or have been heedlessly pushed aside. Thus the replies directed against my criticism of psychological method are also quite negative because they miss the straightforward sense of my presentation. My criticism of psychological method did not at all deny the value of modern psychology, did not

at all disparage the experimental work done by eminent men. Rather it laid bare certain, in the literal sense, radical defects of method upon the removal of which, in my opinion, must depend an elevation of psychology to a higher scientific level and an extraordinary amplification of its field of work. Later an occasion will be found to say a few words about the unnecessary defences of psychology against my supposed "attacks."

Lake Pavin Springer Science & Business Media

This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore,

because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.

Français Interactif Presses de L'Ub
This textbook includes all 13 chapters of Français interactif. It accompanies www.laits.utexas.edu/fi, the web-based French program developed and in use at

the University of Texas since 2004, and its companion site, Tex's French Grammar (2000) www.laits.utexas.edu/tex/ Français interactif is an open access site, a free and open multimedia resources, which requires neither password nor fees. Français interactif has been funded and created by Liberal Arts Instructional Technology Services at the University of Texas, and is currently supported by COERLL, the Center for Open Educational Resources and Language Learning UT-Austin, and the U.S. Department of Education Fund for the Improvement of Post-Secondary Education (FIPSE Grant P116B070251) as an example of the open access initiative.
