*Evidence-Based Practice in Nursing & Healthcare* Lippincott Williams & Wilkins  
 This inspiring collection of accounts from educators and students is "an essential resource for all those seeking to build an antiracist school system" (Ibram X. Kendi). Since 2016, the Black Lives Matter at School movement has carved a new path for racial justice in education. A growing coalition of educators, students, parents and others have established an annual week of action during the first week of February. This anthology shares vital lessons that have been learned through this important work. In this volume, Bettina Love makes a powerful case for abolitionist teaching, Brian Jones looks at the historical context of the ongoing struggle for racial justice in education, and prominent teacher union leaders discuss the importance of anti-racism in their unions. Black Lives Matter at School includes essays, interviews, poems, resolutions, and more from participants across the country who have been building the movement on the ground.

Nurse as Educator Routledge #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part Max docuseries Brené Brown: Atlas of the Heart! ONE OF BLOOMBERG'S BEST BOOKS OF THE YEAR Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown

has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In *Dare to Lead*, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

*Saving Lives* Scribner

In this groundbreaking new work, David Kessler—an expert on grief and the coauthor with Elisabeth Kübler-Ross of the iconic *On Grief and Grieving*—journeys beyond the classic five stages to discover a sixth stage: meaning. In 1969, Elisabeth Kübler-Ross first identified the stages of dying in her transformative book *On Death and Dying*. Decades later, she and David Kessler wrote the classic *On Grief and Grieving*, introducing the stages of grief with the same transformative pragmatism and compassion. Now, based on hard-earned personal experiences, as well as knowledge and wisdom earned through decades of work

with the grieving, Kessler introduces a critical sixth stage. Many people look for “closure” after a loss. Kessler argues that it’s finding meaning beyond the stages of grief most of us are familiar with—denial, anger, bargaining, depression, and acceptance—that can transform grief into a more peaceful and hopeful experience. In this book, Kessler gives readers a roadmap to remembering those who have died with more love than pain; he shows us how to move forward in a way that honors our loved ones. Kessler’s insight is both professional and intensely personal. His journey with grief began when, as a child, he witnessed a mass shooting at the same time his mother was dying. For most of his life, Kessler taught physicians, nurses, counselors, police, and first responders about end of life, trauma, and grief, as well as leading talks and retreats for those experiencing grief. Despite his knowledge, his life was upended by the sudden death of his twenty-one-year-old son. How does the grief expert handle such a tragic loss? He knew he had to find a way through this unexpected, devastating loss, a way that would honor his son. That, ultimately, was the sixth state of grief—meaning. In *Finding Meaning*, Kessler shares the insights, collective wisdom, and powerful tools that will help those experiencing loss. *Finding Meaning* is a necessary addition to grief literature and a vital guide to healing from tremendous loss. This is an inspiring, deeply intelligent must-read for anyone looking to journey away from suffering, through loss, and towards meaning.

*Crab Monsters*, *Teenage Cavemen*, and *Candy Stripe Nurses* is an outrageously rollicking account of the life and career of Roger Corman—one of the most prolific and successful independent producers, directors, and writers of all time, and self-proclaimed king of the B movie. As told by Corman himself and graduates of "The Corman Film School," including Peter Bogdanovich, James

Cameron, Francis Ford Coppola, Robert De Niro, and Martin Scorsese, this comprehensive oral history takes readers behind the scenes of more than six decades of American cinema, as now-legendary directors and actors candidly unspool recollections of working with Corman, continually one-upping one another with tales of the years before their big breaks. *Crab Monsters* is supplemented with dozens of full-color reproductions of classic Corman movie posters; behind-the-scenes photographs and ephemera (many taken from Corman's personal archive); and critical essays on Corman's most daring films—including *The Intruder*, *Little Shop of Horrors*, and *The Big Doll House*—that make the case for Corman as an artist like no other.  First published in 1990. The subject of anorexia nervosa and, more recently, bulimia nervosa in males has been a source of interest and controversy in the fields of psychiatry and medicine for more than 300 years. These disorders, sometimes called eating disorders, raise basic questions concerning the nature of abnormalities of the motivated behaviors: Are they subsets of more

widely recognized illnesses such as mood disorders? Are they understandable by reference to underlying abnormalities of biochemistry or brain function? In what ways are they similar to and in what ways do they differ from anorexia nervosa and bulimia nervosa in females? This book will be of interest to a wide variety of people—physicians, psychologists, nurses, social workers, occupational therapists, nutritionists, educators, and all others who may be interested for personal or professional reasons.
