The adventure begins with a rocky start; Krogstads flight instructor dies in an airplane crash. That realization seems to cast a residual shadow on Krogstads entire flying career. Through twenty years, more than ten thousand hours of flight, and more than a million miles of flying in extraordinary airplanesingle engines to jetson extraordinary missions, Krogstad experienced more close calls, near misses, and potential disastersas well as some calamitiesthan most pilots ever hear about. Krogstad has landed and taken off in every state in the continental US, and his Alaskan adventures are among the most diverse and exciting as any pilot could experience. Every flight project was uniquely challenging and often carried with it the risks borne of unproven techniques and equipment. The technicalities of the work, the equipment, and the flying environment were complex, and Krogstad clearly defines them as they contribute to the bizarre events that defined his flying experiences and career. The gradual loss of hearing clearly loomed as the eventual loss of Krogstads license to fly, but the actual end of his flying career was the devastating result of a personal disaster that haunted his being long after retiring from flying.

THE BOYS WHO BRING IN THE CROP is a mostly true story about

a group of amateur marijunana smugglers who operated out of Florida in the mid seventies. These guys really had some cajones, they did their thing right under the noses of the law. They made seven flights to Colombia and back and never got caught, partly because they were smart and planned well, partly because of dumb luck. The book is fast paced, it all takes place in less than one year. Along the way there is plenty of adventure, not everything goes as planned. There is some romance thrown in, these guys knew how to enjoy life with the piles of money they accumulated.
