AVERY WARREN

HIV in U.S. Prisons and Jails Springer Publishing Company
The ability to anticipate, avoid, and resolve ethical conflicts in neuropsychology is a dynamic process that must be developed and maintained over time. Ethics codes and professional guidelines are drafted and updated, changes in clinical practice occur, and new laws are implemented. To practice in a manner consistent with the highest ethics principles, neuropsychologists must be able to integrate the evolving ethical and legal requirements into their professional activities. The primary purpose of this 2nd edition is to review ethical guidelines and literature relevant to clinical neuropsychology that have been published since the first edition of this book was published a decade ago. A number of important publications have emerged since the first edition was published, including new Specialty Guidelines for Forensic Psychology, Standards for Educational and Psychological Testing, and position statements/practice guidelines by APA (e.g., Assessment of Older Adults with Diminished Capacity, co-authored with ABA) and other professional organizations (e.g., AACN, NAN) that are directly relevant to neuropsychological practice. In addition, scholarly publications have contributed knowledge to ethical practice in general (e.g., Knapp's & VandeCreek's work on positive ethics), which is relevant for, and should be applied to, neuropsychological practice. Additionally, book chapters on ethics in subspecialty areas (e.g., pediatric and geriatric neuropsychology, mTBI, Veterans) have advanced our understanding of ethical issues in neuropsychology and should be integrated into a new edition of the book. Finally, advances in technology and increased use of technology in clinical neuropsychology bring ethical issues and challenges incorporated in the new edition of the book. Learning exercises and study questions at the end of the chapters help readers review the main points and check their learning progress.

"This book brings together excellent contributions spanning the

historic basis of neuropsychology in forensic practice, ethical and legal issues, and practical instruction....The editors have done an outstanding job in providing us with a volume that represents state-of-the-art in forensic neuropsychology. This volume also will be useful for graduate students, fellows, and practitioners in clinical neuropsychology." --Igor Grant, MD, Executive Vice Chair, UCSD Department of Psychiatry This book serves as an updated authoritative contemporary reference work intended for use by forensic neuropsychologists, psychiatrists, neurologists, neurosurgeons, pediatricians, attorneys, judges, law students, police officers, special educators, and clinical and school psychologists, among other professionals. This book discusses the foundations of forensic neuropsychology, ethical/legal issues, practice issues and special areas and populations. Key topics discussed include the principles of brain structure and function, history of clinical neuropsychology, neuropsychology of intelligence, normative and scaling issues, and symptom validity testing and neuroimaging. Special areas and populations will include disability and fitness for duty evaluations, aging and dementia, children and adolescents, autism spectrum disorders, substance abuse, and Neurotoxicology. A concluding section focuses on the future of forensic neuropsychology.

Abstracts of Active Projects Rowman & Littlefield
In San Francisco, the St. James Infirmary (SJI) and the California Prostitutes Education Project (CAL-PEP) provide free, nonjudgmental medical care, counseling, and other health and social services by and for sex workers—a radical political commitment at odds with government policies that criminalize prostitution. To maintain and expand these much-needed services and to qualify for funding from state, federal, and local authorities, such organizations must comply with federal and state regulations for nonprofits. In *Sex Work Politics*, Samantha Majic investigates the way nonprofit organizations negotiate their governmental obligations while maintaining their commitment to outreach and advocacy for sex workers' rights as well as broader sociopolitical change. Drawing on multimethod qualitative research, Majic outlines the strategies that CAL-PEP and SJI employ to balance the conflicting demands of service and

advocacy, which include treating sex work as labor with legitimate occupational health and safety concerns, empowering their clients with civic skills to advance their political commitments outside the nonprofit organization, and conducting and publishing research and analysis to inform the public and policymakers of their constituents' needs. Challenging the assumption that activists must "sell out" and abandon radical politics to manage formal organizations, Majic comes to the surprising conclusion that it is indeed possible to maintain effective advocacy and key social movement values, beliefs, and practices, even while partnering with government agencies. *Sex Work Politics* significantly contributes to studies of transformational politics with its nuanced portrait of nonprofits as centers capable of sustaining political and social change.

Monthly Catalog of United States Government Publications John Wiley & Sons
Justice Statistics: An Extended Look at Crime in the United States is a special edition of *Crime in the United States*. It brings together key reports that fall under this category. Topics covered include capital punishment, rape and sexual assault among college-age women, correctional populations, crime in the United States, hate crimes, probation, parole, human trafficking, and law enforcement officers killed and assaulted. Tables in this volume provide a comprehensive account of each of these subjects. Each section contains statistical tables and figures highlighting the data, as well as a brief summary of the report's methodology and at-a-glance highlights of the most compelling information. This completely updated volume provides valuable information compiled by the Department of Justice, including its subsidiaries, the Bureau of Justice Statistics and the Federal Bureau of Investigation. This publication includes more detailed information on the impact that COVID-19 had on law enforcement, incarceration, and the judiciary. Additionally, the section on capital punishment places more emphasis on the judicial process than on executions since capital punishment has been declining for two decades in the United States. Finally, a new ten-year report on recidivism of prisoners is included.

LSCA Final Reports University of Pennsylvania Press

The computing profession faces a serious gender crisis. Today, fewer women enter computing than anytime in the past 25 years. This book provides an unprecedented look at the history of women and men in computing, detailing how the computing profession emerged and matured, and how the field became male coded. Women's experiences working in offices, education, libraries, programming, and government are examined for clues on how and where women succeeded—and where they struggled. It also provides a unique international dimension with studies examining the U.S., Great Britain, Germany, Norway, and Greece. Scholars in history, gender/women's studies, and science and technology studies, as well as department chairs and hiring directors will find this volume illuminating.

Computerworld Frontiers Media SA

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.
