WHATS IN IT FOR ME? Information technology lives all around us--in how we communicate, how we do business, how we shop, and how we learn. Smart phones, iPods, PDAs, and wireless devices dominate our lives, and yet it's all too easy for students to take information technology for granted. Rainer and Turban's Introduction to Information Systems, 2nd edition helps make Information Technology come alive in the classroom. This text takes students where IT lives--in today's businesses and in our daily lives while helping students understand how valuable information technology is to their future careers. The new edition provides concise and accessible coverage of core IT topics while

connecting these topics to Accounting, Finance, Marketing, Management, Human resources, and Operations, so students can discover how critical IT is to each functional area and every business. Also available with this edition is WileyPLUS - a powerful online tool that provides instructors and students with an integrated suite of teaching and learning resources in one easy-to-use website. The WileyPLUS course for Introduction to Information Systems, 2nd edition includes animated tutorials in Microsoft Office 2007, with iPod content and podcasts of chapter summaries provided by author Kelly Rainer.

If you work in a K-12 school that uses SASIxp, then this book is for you! All schools need to produce reports such as Schedules, Rosters, Progress Reports, Report Cards and so on. Wouldn't it be nice to be able to modify the design of these reports, so that they meet the needs of YOUR school? Would you like to be able to add, delete or edit the information that is going on your school's official documents? Would you like to see your school's logo on the report cards? Would it be helpful to have your school's bell schedule on the bottom of the class rosters? Microsoft Access can easily use SASIxp data files to produce functional and visually attractive reports. This book will show you the essential steps in creating these reports. Only three things are needed: student data files contained within a SASIxp database, Microsoft Access, and the courage to try something new. Anyone can use this book! The author wrote it to meet the needs of the Access beginner; no previous experience with MS Access is necessary. Even if you've been using Access for a while, you will still find this book a valuable resource. Inside, you will find easy-to-follow guidelines that will help you: Learn the basics of Access tables, queries, reports and macro's; what they are, how they work, and when to use them Create and modify Access data tables to store your data Design and create various types of Access queries Design and produce schedules, class rosters, book bills, progress reports, report cards, honor roll reports, and mailings Make MS Access to calculate GPA's within queries or directly on reports. Use special characters to "flag" students who meet pre-determined criteria,

such as course failures, excessive absences, etc. Use Access macro programming to automate the entire process so that it runs automatically. Save your valuable time and energy by using existing queries, reports and macro's as templates for new databases. How to make your boss and your colleagues think you're a genius!
