A Treasury of Victorian Murder Nti Upstream

A Centenary History of the Indian National Congress, 1885-1985: 1919-1935 Forbesbooks

The author believes the period of our lives that has the greatest impact on disease and personality formation is our gestation and birth. Recent studies provide evidence that fetal imprinting, an evolutionary strategy to prepare children to cope with life, establishes a permanent set-point in a child's physiology. Mothers highly anxious during pregnancy may give birth to babies prone to mental illness and disease in later life. Low oxygen at birth, drugs taken during pregnancy, and a lack of parental affection in the first years of life may have similar adverse affects. The author puts a case for a reorientation of our approaches to pregnancy and the use of drugs, and above all, to the modes of psychotherapy we implement to treat everything from phobias and compulsions to anxiety and depression.--From book jacket.

She published her first novel at age fourteen, shocking the upper crust of Boston with her frank depiction of blue-blooded indiscretions, and she seemed to have a magnificent career ahead of her. But before Thea could publish her follow-up novel, she mysteriously disappeared and was eventually named as a victim of a serial killer. Twenty-four years later, an admirer of Thea's comes to Carlotta claiming to have evidence that Thea is alive—and still writing. He begs Carlotta to find the onetime prodigy, but there are powerful people, including

Thea's prominent family of Boston politicians, who want Thea's second book to stay buried. As a take-no-prisoners gubernatorial race speeds to its climax, Carlotta discovers a secret that could upend the campaign, endanger people's lives, and rewrite literary history.
