*Reflexive Epistemology* Bloomsbury Publishing

Fans of *Thirteen Reasons Why*, *Running with Scissors*, and *Girl, Interrupted* will be entranced by this remarkable true story of teenage despair and recovery. “[The *Burn Journals*] describes a particular kind of youthful male desolation better than it has ever been described before, by anyone.” —Andrew Solomon, author of *The Noonday Demon*

In 1991, fourteen-year-old Brent Runyon came home from school, doused his bathrobe in gasoline, put it on, and lit a match. He suffered third-degree burns over 85% of his body and spent the next year recovering in hospitals and rehab facilities. During that year of physical recovery, Runyon began to question what he’d done, undertaking the complicated journey from near-death back to high school, and from suicide back to the emotional mainstream of life.

*The Unfair Commercial Practices*

Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level. It is an umbrella provision, which uses general clauses to protect consumers. How effective this approach is and how it relates to the existing *acquis* are fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing *acquis*. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.

*The Dynamics of Taxation* Springer

This content provides financial analysts, investment professionals, and financial planners with a review of how financial risk-tolerance tests can and should be evaluated. It begins by clarifying terms related to risk taking and is followed by a broad overview of two important measurement terms: validity and reliability. It concludes with examples for practice.

The COVID-19 pandemic has had extraordinary effects on human lives and economies around the world. Many countries have introduced various measures to stop the spread of the virus and preserve human lives and livelihoods. Some commentators have considered these measures extreme, such as the restrictions imposed on people's movement and lockdown of countries' borders. While these measures have undoubtedly saved lives and curbed the spread of the deadly virus, they have also produced some unintended legal implications for individuals and businesses, particularly in the areas of contractual obligations, employment relationships, tourism and hospitality, company law, competition law, human rights and the rule of law, protection of vulnerable groups like migrant workers, and access to judicial and legal services. *COVID-19 and Business Law: Legal Implications of a Global Pandemic* identifies and discusses specific legal challenges caused by the COVID-19 pandemic in these areas and suggests possible ways in which they could be remedied.

### **Curious Creatures**

Red Globe Press  
One of the most important EU consumer protection directives of the past decade, the 2005 Unfair Commercial Practices Directive, or UCPD, is brought under

examination in this stimulating volume. Bringing together leading experts in the comparative law and consumer law domain, the book discusses the impact of the Directive and whether the many possible issues identified at its inception have been borne out in practice. Divided into four parts of 'Implementation, Approximation and Harmonization', 'Vulnerability', 'The UCP Directive and Other Regimes', and finally 'Enforcement', the volume examines the various policy developments, the growing body of case law, the decisions of relevant national enforcement authorities, as well as the legislative debates which have surrounded the implementation of the UCPD in Member States. This book provides a valuable assessment of the impact of a major EU directive almost ten years after its adoption, and as such will be of interest to academics, legal practitioners and the judiciary working in the areas of European and Consumer law.

 Increasingly, managers must make decisions based on almost unlimited information. How can they navigate and organize this vast amount of data?  
*Essentials of Business Research Methods* provides research techniques for people who aren't data analysts. The authors offer a straightforward, hands-on approach to the vital managerial process of gathering and using data to make clear business decisions. They include critical topics, such as the increasing role of online research, ethical issues, data mining, customer relationship management, and how to conduct information-gathering activities more effectively in a rapidly changing business environment. This is the only text that includes a chapter on qualitative data analysis, and the coverage of quantitative data analysis is more extensive, and much easier to understand than in other texts. The book features a realistic continuing case throughout that enables students to see how business research information is used in the real world. It includes applied research examples in all chapters, as well as ethical dilemma mini cases, and exercises.

*The Reflexive Thesis* Walter de Gruyter

GmbH & Co KG

This book examines consumer behavior using the “life course” paradigm, a multidisciplinary framework for studying people's lives, structural contexts, and social change. It contributes to marketing research by providing new insights into the study of consumer behavior and illustrating how to apply the life course paradigm's concepts and theoretical perspectives to study consumer topics in an innovative way. Although a growing number of marketing researchers, either implicitly or explicitly, subscribe to life course perspectives for studying a variety of consumer behaviors, their efforts have been limited due to a lack of theories and methods that would help them study consumers over the lifecycle. When studying consumers over their lifespan, researchers examine differences in the consumer behaviors of various age groups (e.g., children, baby boomers, elderly, etc.) or family life stages (e.g., bachelors, full nesters, empty nesters, etc.), inferring that consumer behavior changes over time or linking consumption behaviors to previous experiences and future expectations. Such efforts, however, have yet to benefit from an interdisciplinary research approach. This book fills this gap in consumer research by informing readers about the differences between some of the most commonly used models for studying consumers over their lifespan and the life course paradigm, and providing implications for research, public policy, and marketing practice. Presenting applications of the life course approach in such research topics as decision making, maladaptive behaviors (e.g., compulsive buying, binge eating), consumer well-being, and cognitive decline, this book is beneficial

for students, scholars, professors, practitioners, and policy makers in consumer behavior, consumer research, consumer psychology, and marketing research.

*The Truth About Managing People* South Western Educational Publishing  
This unusually innovative book treats reflexivity, not as a philosophical conundrum, but as a practical issue that arises in the course of scholarly research and argument. In order to demonstrate the concrete and consequential nature of reflexivity, Malcolm Ashmore concentrates on an area in which reflexive "problems" are acute: the sociology of scientific knowledge. At the forefront of recent radical changes in our understanding of science, this

increasingly influential mode of analysis specializes in rigorous deconstructions of the research practices and textual products of the scientific enterprise. Through a series of detailed examinations of the practices and products of the sociology of scientific knowledge, Ashmore turns its own claims and findings back onto itself and opens up a whole new era of exploration beyond the common fear of reflexive self-destruction.
