## CHANEL ALLEN

### Diaspora for Development in Africa Penguin

Time-geography is a mode of thinking that helps us understand change processes in society, the wider context and the ecological consequences of human actions. This book brings together international time-geographic research from a range of disciplines. Swedish geographer Torsten Hägerstrand is a key foundation for this book, and an introductory biography charts the influences that led to the formation of his theories. A central theme across time-geography research is recognizing time and space as unity. Contributions from the Netherlands, the USA, Japan, China, Norway and Sweden showcase the diverse palette of time-geography research. Chapters study societies adjusting to rapid urbanization, or investigate the need for structural changes in childcare organization. The book also delves into green transportation and the interplay between humans and nature in landscape transformation. Application chapters look at ICT effects on young people's daily life and methods for engaging clients in treatment practice. This book situates the outlook for this developing branch of research and the application of time-geography to societal and academic contexts. Its interdisciplinary nature will appeal to postgraduates and researchers who are interested in human geography, urban and regional planning and sociology.

[The King of the World](#) Harvard University Press

A stunning novel, spanning generations and continents, *Ghana Must Go* by rising star Taiye Selasi is a tale of family drama and forgiveness, for fans of Zadie Smith and Chimamanda Ngozi Adichie. This is the story of a family -- of the simple, devastating ways in which families tear themselves apart, and of the incredible lengths to which a family will go to put itself back together. It is the story of one family, the Sais, whose good life crumbles in an evening; a Ghanaian father, Kweku Sai, who becomes a highly respected surgeon in the US only to be disillusioned by a grotesque injustice; his Nigerian wife, Fola, the beautiful homemaker abandoned in his wake; their eldest son, Olu, determined to reconstruct the life his father should have had; their twins, seductive Taiwo and acclaimed artist Kehinde, both brilliant but scarred and flailing; their youngest, Sadie, jealously in love with her celebrity best friend. All of them sent reeling on their disparate paths into the world. Until, one day, tragedy spins the Sais in a new direction. This is the story of a family: torn apart by lies, reunited by grief. A family absolved, ultimately, by that bitter but most tenuous bond: familial love. *Ghana Must Go* interweaves the stories of the Sais in a rich and moving drama of separation and reunion, spanning generations and cultures from West Africa to New England, London, New York and back again. It

is a debut novel of blazing originality and startling power by a writer of extraordinary gifts. 'Ghana Must Go is both a fast moving story of one family's fortunes and an ecstatic exploration of the inner lives of its members. With her perfectly-pitched prose and flawless technique, Selasi does more than merely renew our sense of the African novel: she renews our sense of the novel, period. An astonishing debut!' Teju Cole, author of *Open City* Taiye Selasi was born in London and raised in Massachusetts. She holds a B.A. in American Studies from Yale and an M.Phil. in International Relations from Oxford. "The Sex Lives of African Girls" (Granta, 2011), Selasi's fiction debut, appears in *Best American Short Stories 2012*. She lives in Rome.

[Prisoners of Geography](#) Penguin UK

The diaspora of developing countries can be a potent force for development, through remittances, but more importantly, through promotion of trade, investment, knowledge and technology transfers. The book aims to consolidate research and evidence on these issues with a view to formulating policies in both sending and receiving countries.

[Seven Pillars of Wisdom](#) Routledge

This open access book explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing estates in 14 European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe.

An incisive portrait of the American landscape that shows how geography continues to determine America's role in the world

Book Club Pick for Now Read This, from PBS NewsHour and The New York Times • "There is more insight here into the Age of Trump than in bushels of political-horse-race journalism."—The New York Times Book Review (Editors' Choice) At a time when there is little consensus about who we are and what we should be doing with our power overseas, a return to the elemental truths of the American landscape is urgently needed. In *Earning the Rockies*, New York Times bestselling author Robert D. Kaplan undertakes a cross-country journey, traversing a rich and varied landscape that still remains the primary source of American power. Traveling west, in the same direction as the pioneers, Kaplan witnesses both prosperity and decline, and reexamines the history of westward expansion in a new light: as a story not just of genocide and individualism but also of communalism and a respect for the limits of a water-starved terrain. Concluding at the edge of the Pacific Ocean with a gripping description of an anarchic world, *Earning the Rockies* shows how America's foreign policy response ought to be rooted in its own geographical situation. Praise for *Earning the Rockies* "Unflinchingly honest . . . a lens-changing vision of America's role in the world . . . a jewel of a book that lights the path ahead."—Secretary of Defense James Mattis "A sui generis writer . . . America's East Coast establishment has only one Robert Kaplan, someone as fluently knowledgeable about the Balkans, Iraq, Central Asia and West Africa as he is about Ohio and Wyoming."—Financial Times "Kaplan has pursued stories in places as remote as Yemen and Outer Mongolia. In *Earning the Rockies*, he visits a place almost as remote to many Americans: these United States. . . . The author's point is a good one: America is formed, in part, by a geographic setting that is both sanctuary and watchtower."—The Wall Street Journal "A brilliant reminder of the impact of America's geography on its strategy. . . . Kaplan's latest contribution should be required reading."—Henry A. Kissinger "A text both evocative and provocative for readers who like to think . . . In his final sections, Kaplan discusses in scholarly but accessible detail the significant role that America has played and must play in this shuddering world."—Kirkus Reviews

[World Report on Violence and Health](#) Atlas

*Learning to Think Spatially* examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of K&#12 education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the K&#12 context, spatial thinking can be taught formally to all students. A geographic information system (GIS)

offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.

*Water Resources Management in Romania* National Academies Press

This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

*Research Catalogue* Edward Elgar Publishing

South Africa, by Christian M. Rogerson

**The Transport System and Transport Policy** Simon and Schuster

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

*Doing Gender, Doing Geography* Routledge

Examines the Earth's geologic history, climate, vegetation, population, food, economies, and mineral resources, and offers physical, political, and subject maps of each continent.

*Housing Estates in Europe* Nordic Africa Institute

ÓThis very interesting book provides an excellent multi-disciplinary introduction into the functioning of transport systems and the interaction with their environments.Ó Æ Erik Verhoef, VU University Amsterdam, The Netherlands ÓThe editors of this important book have clearly identified that few writings on transport treat the transport system as a whole. Implicit in this is a need for a genuinely multidisciplinary approach. An impressive list of contributors ensures that the book draws on the latest research whilst providing new insights into some of the key challenges facing transport students and researchers, transport providers and policy makers.Ó Æ Roger Vickerman, University of Kent, UK ÓSince ancient times transportation has brought our world together. But the need for connectivity and accessibility in a spatially differentiated world has prompted the emergence of very complex transportation systems. This book offers a fresh and operational contribution to a better understanding of the complexity and manageability of a mobile world, by addressing in a balanced way both conceptual and applied or policy aspects of modern transportation systems.Ó Æ Peter Nijkamp, Free University of Amsterdam, The Netherlands Transport impacts on people and businesses in many different ways, and presents some of the key problems that decision-makers need to address. This comprehensive textbook introduces the transport system in a holistic and multidisciplinary way, bringing together the myriad components of transport. This textbook is written for an

international readership of undergraduate and postgraduate students in transport and related subjects, as well as for professionals and policy decision-makers across both public and private sectors. Key features include: ¥ Discussion of the importance of transport accessibility and the impacts of transport on the environment and safety ¥ Policy issues relating to all of the discussed issues and prescribed future options. ¥ Transport evaluation methods and modelling approaches. ¥ Examples to highlight the linkages between components of the transport system Æ for example infrastructures, land-use, vehicle technologies Æ and the relevance of these linkages for decision making.

*Toward Sustainable Agricultural Systems in the 21st Century*

Sophia Perennis

One of the most important challenges concerning the future of the European Union is the demographic reproduction of the European population. Decreasing birth-rates and the retirement of the baby boomers will dramatically reduce the labour force in the EU, which will entail not only a lack of manpower but also lower contributions to European social systems. It seems clear that the EU will have to counterbalance this population decrease by immigration in the coming years. Migration Between the Middle East, North Africa and Europe takes this challenge as a point of departure for analysing the MENA region, in particular Morocco, Egypt and Turkey, as a possible source of future migration to the European Union. At the same time, it illustrates the uncertainties implied in such calculations, especially at a time of radical political changes, such as those brought about by the Arab Uprising.

*Urban Planning in Europe* Duke University Press

This book discusses water resources management in Romania from a hydrological perspective, presenting the latest research developments and state-of-the-art knowledge that can be applied to efficiently solve a variety of problems in integrated water resources management. It focuses on a wide range of water resources issues - from hydrology and water quantity, quality and supply to flood protection, hydrological hazards and ecosystems, and includes case studies from various watersheds in Romania. As such, the book appeals to researchers, practitioners and graduates as well as to anybody interested in water resources management.

*Ghana Must Go* Routledge

This remarkable book grew out of a conference headed by René Guénon, the sinologist René Grousset, and the neo-Thomist Jacques Maritain on questions raised by Ferdinand Ossendowski's thrilling account in his *Men, Beast and Gods of an escape through Central Asia*, during which he foils enemies and encounters shamans and Mongolian lamas, whose marvels he describes. The book caused a great sensation, especially the closing chapters, where Ossendowski recounts legends allegedly entrusted to him concerning the 'King of the World' and his subterranean kingdom Agartha. The present book, one of Guénon's most controversial, was written in response to this conference and develops the theme of the King of the World from the point of view of traditional metaphysics. Chapters include: Western Ideas about Agartha; Shekinah and Metatron; The Three Supreme Functions; Symbolism of the Grail; Melki-Tsedeq; Luz: Abode of Immortality;

The Supreme Center concealed during the Kali-Yuga; and The Omphalos and Sacred Stones .

*Population Index Bibliography: 1954-1968: Europe (Germany)-tropics* Routledge

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

**The New Geography of Jobs** National Academies Press

An analysis of the influences on urban planning in Europe. Detailed case studies are used to explore planning policies in a range of European cities, and discuss the social and environmental objectives that influence today's urban planner.

**The Geography of Tourism and Recreation** Routledge

The Iron Curtain was seen as the divider between East and West in Cold War Europe. The term refers to a material reality but it is also a metaphor; a metaphor that has become so powerful that it tends to mark our historical understanding of the period. Through the archaeological study of two areas that can be considered part of the former Iron Curtain, the Czech-Austrian border and the Italian-Slovenian border, this research investigates the relationship between the material and the metaphor of the Iron Curtain. As a study of the archaeology of the contemporary past this thesis brings forward methodological issues when dealing with many different sources as well as general reflections on our historical understanding.

**Digital Media, Youth, and Credibility** Simon and Schuster

Prisoners of Geography Simon and Schuster

**The Geography in the Global Context** Amsterdam University Press

A rising young economist at Berkeley makes correlations between success and geography, explaining how such rising centers of innovation as San Francisco, Boston and Austin are likely to offer influential opportunities and shape the national and global economies in positive or detrimental ways.

**Learning to Think Spatially** Springer Nature

In a sweeping and vivid survey, renowned historian Bernard Lewis charts the history of the Middle East over the last 2,000 years, from the birth of Christianity through the modern era, focusing on the successive transformations that have shaped it. Drawing on material from a multitude of sources, including the work of archaeologists and scholars, Lewis chronologically traces the political, economical, social, and cultural development of the Middle East, from Hellenization in antiquity to the impact of westernization on Islamic culture. Meticulously researched, this enlightening narrative explores the patterns of history that have repeated themselves in the Middle East. From the ancient conflicts to the current geographical and religious disputes between the Arabs and the Israelis, Lewis examines the ability of this region to unite and solve its problems and asks if, in the future, these unresolved conflicts will ultimately lead to the ethnic and cultural factionalism that tore apart the former Yugoslavia. Elegantly written, scholarly yet accessible, *The Middle East* is the most comprehensive single volume history of the region ever written from the world's foremost authority on the Middle East.
