Applying Social Science John Wiley & Sons
Provides one-of-a-kind, in-depth guidance for improving effectiveness in the classroom This is the only book for new and midcareer faculty that delivers practical, evidence-based strategies for physician assistants, nurse practitioners, and other clinical professionals teaching in advanced health provider education programs. The text disseminates interprofessional teaching and learning strategies that can be used across the gamut of advanced clinical disciplines. It also features sample curricula and syllabi, lecture tips, evaluation strategies, and in-depth information about state-of-the-art

technology and virtual classrooms. Key pedagogical principles set a firm foundation for both novice and experienced educators, and practical applications and case examples integrated into each chapter offer concrete reinforcement. The text describes how to design and implement a curriculum that promotes cognitive diversity and inclusion, and examines ways to encourage leadership and scholarship. It addresses methods for fostering active learning and clinical reasoning through the use of technology, simulation, distance education, and student-centered pedagogy. Edited by experienced PA and NP faculty who are leaders in interprofessional education, the book distills the insight and expertise of top PA, nursing, and physician educators and provides valuable tools that help faculty

become effective educators in the U.S. and abroad. Key Features: Delivers cutting-edge "tools of the trade" for advanced health professions educators Provides evidence-based strategies for interprofessional education Describes key pedagogical principles for both beginner and advanced educators •Includes strategies to promote cognitive diversity and inclusion in the teaching environment Weaves practical applications and case examples into each chapter Offers strategies for faculty to establish and maintain work-life balance
Engaging Undergraduates in Publishable Research: Best Practices Jones & Bartlett Learning
The Scholarship of Teaching and Learning unleashes great potential in librarianship, and academic librarians are ideal candidates for participation in SoTL

projects: We're inquisitive, passionate, and we care about student success. The Grounded Instruction Librarian can provide innovative ideas and methods to help you use SoTL as a professional development tool, a research agenda, a way to create theory, or for a deeper understanding of your teaching and your students' learning. [Communities of Practice](#) Indiana University Press

This publication, the latest report from AAC&U's Liberal Education and America's Promise (LEAP) initiative, defines a set of educational practices that research has demonstrated have a significant impact on student success. Author George Kuh presents data from the National Survey of Student Engagement about these practices and explains why they benefit all students, but also seem to benefit underserved students even more than their more advantaged peers. The report also presents data that show definitively that underserved students are the least likely students, on average, to have access to these practices.

Building a Scholarship of Assessment Rowman & Littlefield

Ensure that your institutional policy and practice are guided by empirical research and scholarship rather than by mere common sense, trial and error, or a "shoot from the hip" basis for institutional action. The two primary goals of a scholarship of practice are: 1. improving administrative practice in higher education, and 2. developing a knowledge base to guide such practice. To attain these goals, campuses must use the findings of empirical research as the basis for developing institutional policy and practice. The result? Improved administrative practice in higher education, both at a campus level and for higher education as a social institution. This is the 178th volume of the Jossey-Bass quarterly report series *New Directions for Higher Education*. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

Shifting faculty roles in a changing landscape Ernest L. Boyer's landmark book *Scholarship Reconsidered: Priorities of the Professoriate* challenged the publish-or-perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the

national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how *Scholarship Reconsidered* applies today. [The Scholarship of Teaching and Learning in and Across Disciplines](#) Oxford University Press

Methodologically innovative in its use of mixed-media diary research, this timely book offers a focused sociological study of non-binary people's identities and experiences in the UK. From negotiating a sense of legitimacy when 'not feeling trans enough' to how identities can shift over time, it reveals important nuances of diverse gender identities while offering crucial insights into trans-related healthcare inequalities. The findings of this ground-breaking research mark an important contribution to the wider fields of gender studies, LGBTQ scholarship and medical policy.

The First Black Archaeologist Sydney University Press

Pivotal to the transformation of higher education in the 21st Century is the nature of pedagogy and its role in advancing the aims of various stakeholders. This book brings together pre-eminent scholars to critically assess teaching and learning issues that cut across most disciplines. Systematically explored throughout the book is the avowed linkage between classroom teaching and motivation, learning, and performance outcomes in students.

[Working with Academic Literacies](#) ALA Editions

At the heart of digital scholarship are universal questions, lessons, and principles relating both to the mission of higher education and the shared values that make an academic library culture. But while global in aspirations, digital scholarship starts with local culture drawn from the community.

Scholarship in the Sandbox John Wiley & Sons

This is a book for anyone who has ever considered engaging in the scholarship of teaching and learning - known familiarly as SoTL - and needs a better understanding of what it is, and how to engage in it. The authors describe how to create a SoTL project, its implications for promotion and tenure, and how it fosters:
* Increased satisfaction and fulfillment in teaching
* Improved student learning
* Increased productivity of scholarly publication
* Collaboration with colleagues across disciplines
* Contributing to a growing and important body of literature
This guide provides prospective SoTL scholars with the necessary background information, foundational theory, tools, resources, and methodology to develop their own SoTL projects, taking the reader through the five stages of the process: Generating a research question; Designing the study; Collecting the data; Analyzing the data; and Presenting and publishing your SoTL project. Each stage is illustrated by examples of actual SoTL studies, and is accompanied by worksheets to help the reader refine ideas and map out his or her next steps. The process and worksheets are the fruit of the successful SoTL workshops the authors have offered at their institution for many years. SoTL differs from scholarly and reflective teaching in that it not only involves questioning one's teaching or a teaching strategy, but also formally gathering and exploring evidence, researching the literature, refining and testing practices, and finally going public.

The purpose of SoTL is not just to make an impact on student learning, but through formal, peer-reviewed communication, to contribute to the larger knowledge base on teaching and learning. While the roots of SoTL go back some 30 years, it was Ernest Boyer in his classic *Scholarship Reconsidered* who made the case for the parity of the scholarships of integration, of discovery, of application, and of scholarship of teaching as vital to the health of higher education. Glassick, Huber, and Maeroff's subsequent *Scholarship Assessed* articulated the quality standards for SoTL, since when the field has burgeoned with the formation of related associations, a proliferation of conferences, the launching of numerous journals, and increasing recognition and validation by institutions.

Engaging in the Scholarship of Teaching and Learning Facet Publishing

Writing about Learning and Teaching in Higher Education offers detailed guidance to scholars at all stages-experienced and new academics, graduate students, and undergraduates-regarding how to write about learning and teaching in higher education. It evokes established practices, recommends new ones, and challenges readers to expand notions of scholarship by describing reasons for publishing across a range of genres, from the traditional empirical research article to modes such as stories and social media that are newly recognized in scholarly arenas. The book provides practical guidance for scholars in writing each genre-and in getting them published. To illustrate how choices about writing play out in practice, we share throughout the book our own experiences as well as reflections from a range of scholars, including both highly experienced, widely published experts and newcomers to writing about learning and teaching in higher education. The diversity of voices we include is intended to complement the variety of genres we discuss, enacting as well as arguing for an embrace of multiplicity in writing about learning and teaching in higher education.

Theory and Research for Academic Nurse Educators: Application to Practice John Wiley & Sons

In recent times academic development has moved from the margins to the mainstream of higher education institutions. This work addresses the concept and nature of academic development and examines research into and within the field. It shows how academic development might be distinguished from and overlap with educational development and staff

development, and how it encompasses those activities concerned with developing learning and teaching in higher education at individual, departmental, faculty, institutional and even at national/international levels.

Higher Education: Handbook of Theory and Research Springer Publishing Company

This volume goes beyond the confines of statutory partnerships, addressing other important forms of collaboration between voluntary, private and statutory sectors, and service users and community and minority groups.

Toward a Scholarship of Practice John Wiley & Sons

Before the Paper Chase: The Scholarship of Law School Preparation and Admissions contains the best of the recent qualitative and quantitative research on the law school application process and the law school experience. Over the years, numerous books have offered advice to students on how to get into law school; no work, however, has ever provided those interested in law school with information about what the scholars say about legal education and the admissions process.

The editors have gathered insightful articles from academic journals and law reviews on a variety of topics relevant to the admissions experience, including the Law School Admissions Test; the ranking of law schools by national magazines; the most reliable first-year success indicators, including the significance of the undergraduate major; future employment patterns; law school tuition and the consequences of student debt; and the psychological impact of the law school experience. Their analysis will help demystify the admissions process for students, provide prelaw advisors with information that will enhance their counseling, and offer law school admissions officials an opportunity to consider how scholars from a wide variety of disciplines are evaluating their institutions. Students and prelaw advisors alike will find the book an informative and, at times, disconcerting work.

The Scholarship of Academic Development Jossey-Bass

Scholarship Assessed continues the exploration begun by *Scholarship Reconsidered*. It examines the changing nature of scholarship in today's colleges and universities and proposes new standards with a special emphasis on methods for assessment and documentation. Begun under the oversight of Ernest L. Boyer, and based on the findings of the Carnegie Foundation's National Survey on the Reexamination of Faculty Roles and Rewards, *Scholarship*

Assessed provides a base of information for and gives focus to the debate of institutional standards of rigor and quality.

High-impact Educational Practices

Berrett-Koehler Publishers

The Doctor of Nursing Practice Project: A Framework for Success, Third Edition provides the foundation for the scholarly process enabling DNP students to work through their project in a more effective, efficient manner.

Partnership Working Routledge

Within the field of academic development, the last twenty years have seen a great expansion of published research into practice and the further development of theoretical approaches. This growth in the scholarship of academic development matches a growth in the scholarship of teaching and learning. *Advancing Practice in Academic Development* draws on these evolving scholarships to advance professional practice in academic development, addressing questions such as: . How have global academic developers and their units developed and changed over recent decades? How has the context in which academic development work is done altered? What have academic developers and their professional associations learnt? Case studies and examples are used throughout the text to illustrate development scenarios and methods. Academic development is considered as, among others, a critical, a scholarly, a principled, a pragmatic, a supporting and a leadership role. This book is ideal for use on academic development courses run by SEDA and other international organisations as well as by those who have responsibility for leading the improvement of educational practice. Written in a scholarly, accessible, stimulating and practical style, this book acknowledges difficulties and offers ways forward. As well as analysing problems, it offers solutions. A Handbook for Teaching and Learning in Higher Education

Routledge

As the general population of Latinxs in the United States burgeons, so does the population of college-going Latinx students. With more Latinxs entering college, the number of Hispanic Serving Institutions (HSIs), which are not-for-profit, degree granting postsecondary institutions that enroll at least 25% Latinxs, also grows, with 523 institutions now meeting the enrollment threshold to become HSIs. But as they increase in number, the question remains: What does it mean to

serve Latinx students? This edited book, *Hispanic Serving Institutions (HSIs) in Practice: Defining "Servingness" at HSIs*, fills an important gap in the literature. It features the stories of faculty, staff, and administrators who are defining "servingness" in practice at HSIs. Servingness is conceptualized as the ability of HSIs to enroll and educate Latinx students through a culturally enhancing approach that centers Latinx ways of knowing and being, with the goal of providing transformative experiences that lead to both academic and non-academic outcomes. In this book, practitioners tell their stories of success in defining servingness at HSIs. Specifically, they provide empirical and practical evidence of the results and outcomes of federally funded HSI grants, including those funded by Department of Education Title III and V grants. This edited book is ideal for higher education practitioners and scholars searching for best practices for HSIs in the

United States. Administrators at HSIs, including presidents, provosts, deans, and boards of trustees, will find the book useful as they seek out ways to effectively serve Latinx and other minoritized students. Faculty who teach in higher education graduate programs can use the book to highlight practitioner engaged scholarship. Legislators and policy advocates, who fight for funding and support for HSIs at the federal level, can use the book to inform and shape a research-based Latinx educational policy agenda. The book is essential as it provides a framework that simplifies the complex phenomenon known as servingness. As HSIs become more significant in the U.S. higher education landscape, books that provide empirically based, practical examples of servingness are necessary.

Hispanic Serving Institutions (HSIs) in Practice Springer Science & Business

Media

Academics across the globe are being urged by universities and research councils to do research that impacts the world beyond academia. Yet to date there has been very little reflection amongst scholars and practitioners in these fields concerning the relationship between the theoretical and engaged practices that emerge through such forms of scholarship. *Theoretical Scholarship and Applied Practice* investigates the ways in which theoretical research has been incorporated into recent applied practices across the social sciences and humanities. This collection advances our understanding of the ethics, values, opportunities and challenges that emerge in the making of engaged and interdisciplinary scholarship. *The Culture of Digital Scholarship in Academic Libraries* Springer Provides a state-of-the-field review of recent SoTL scholarship
