Asian Folklore Studies Hong Kong University Press

Was macht man, wenn man zu zweit mit dem Auto auf Weltreise ist und plötzlich ein Riesenzoff die gemeinsame Weiterreise unmöglich macht? Genau: Einfach alle Pläne über den Haufen werfen und alleine weiterreisen! So geht es Katharina, die eine Reise mit einem völlig Fremden antritt und bei der prompt alles schief läuft. Doch verzaubert von den bereits durchquerten Ländern fasst Katharina den Mut, sich von nun an alleine den Herausforderungen ihrer ersten Weltreise zu stellen. Sie bewältigt Pannen, Unsicherheiten, Frustration – und genießt ihre Freiheit in vollen Zügen. Dabei begegnet sie nicht nur atemberaubenden Landschaften, überfüllten Großstädten und hilfsbereiten Menschen an jeder Ecke, sondern entdeckt auch eine neue, unbekannte Seite an sich selbst. Ein Buch über das, was passiert, wenn das Leben alle Pläne durchkreuzt.

Wissenschaftliche Ergebnisse der Expedition Filchner nach China und Tibet 1903-1905 MIT Press

Much of the discussion about new technologies and social equality has focused on the oversimplified notion of a "digital divide." Technology and Social Inclusion moves beyond the limited view of haves and have-nots to analyze the different forms of access to information and communication technologies. Drawing on theory from political science, economics, sociology, psychology, communications, education, and linguistics, the book examines the ways in which differing access to technology contributes to social and economic stratification or inclusion. The book takes a global perspective, presenting case studies from developed and developing countries, including Brazil, China, Egypt, India, and the United States. A central premise is that, in today's society, the ability to access, adapt, and create knowledge using information and communication technologies is critical to social inclusion. This focus on social inclusion shifts the discussion of the "digital divide" from gaps to be overcome by providing equipment to social development challenges to be addressed through the effective integration of technology into communities, institutions, and societies. What is most important is not so much the physical availability of computers and the Internet but rather people's ability to make use of those technologies to engage in meaningful social practices.

*Die Erdkunde im Verhältniss zur Natur und zur Geschichte des Menschen oder allgemeine vergleichende Geographie, als sichere Grundlage des Studiums und Unterrichts in physikalischen und historischen Wissenschaften* von Carl Ritter Psychology Press

In the 1980s, the distinguished interpreter Kat- Lomb researched and interviewed polyglots to discover how they learned their languages. In 1988 she published her findings in "Harmony of Babel." The book became immediately popular in Dr. Lomb's native Hungary. In 2013 TESL-EJ of Berkeley was proud to publish the first English translation of "Harmony of Babel." The English edition attracted many readers worldwide and Dr. Lomb's fame spread. The success of the English translation prompted the translator and editorial team to prepare a new edition of "Harmony"

featuring an introduction and the transcript of an interview Dr. Lomb did for Hungarian television in 1974. As with the first edition, readers will learn how some of the world's greatest polyglots think about, and use, their languages. Their views, grounded in real-world experience, will be of particular interest to linguaphiles who are seeking to supplement their theoretical knowledge of language learning.

**Raising Resilient MKs** Oxford University Press

Second edition of best-selling one-year introductory course in ancient Greek for students and adults. This volume contains a narrative adapted entirely from ancient authors in order to encourage students rapidly to develop their reading skills. The texts and numerous illustrations also provide a good introduction to Greek culture.

Tierleben Routledge

Nepal ist die Wasserscheide Asiens. Das Land liegt zwischen Indien und Tibet mit Landschaftsformen, die von subtropischem Dschungel bis zu den eisigen Höhen des Himalaya reichen. Zehn der höchsten Berge der Welt gehören ganz oder teilweise zu Nepal. Mindestens ebenso vielfältig ist die Kultur: Ein Dutzend große ethnische Gruppen mit 50 Sprachen und Dialekten leben in diesem kleinen Pufferstaat, in dem sich Hinduismus und Buddhismus, zwei der großen Weltreligionen, mit Naturverehrung und Schamanismus verflechten. Diesem landschaftlichen und kulturellen Reichtum trägt das Travel Handbuch in vollem Umfang Rechnung: Es bietet eine Fülle von Informationen für die individuelle Reiseplanung, gibt Tipps zu Unterkünften, Restaurants und Transport. Einen besonderen Schwerpunkt bilden Outdoor-Aktivitäten mit Kapiteln zu Trekking, Rafting/Kayakfahren und Mountainbiking. Ein weiteres Plus sind die vielen beschriebenen Reisewege: von selten befahrenen Hochgebirgsstraßen bis zu abgelegenen Grenzübergängen nach Indien oder Tibet - das Buch lässt selbst hartgesottene Traveller nicht im Stich. Hilfreiche Tipps und Adressen zu Yoga, Meditation und Ayurveda sowie die ausführliche Behandlung der nepalesischen Geschichte und der Glaubensvorstellungen machen dieses kompakte Reisehandbuch komplett.

Tibet, den Mekong und Südostasien erfahren Lulu.com

"The authors examine the socio-cultural, cognitive-linguistic, and educational-institutional trajectories along which Chinese as a Heritage Language may be acquired, maintained and developed. It draws upon developmental psychology, functional linguistics, linguistic and cultural anthropology, discourse analysis, orthography analysis, reading research, second language acquisition, and bilingualism. This volume aims to lay a foundation for theories, models, and master scripts to be discussed, debated, and developed, and to stimulate research and enhance teaching both within and beyond Chinese language education."--BOOK JACKET.

*Bilingual Education in China* neobooks

20 000 km, 21 Länder, 365 Tage und unendliche Eindrücke... Dr. Uwe Ellger und Dr. Isabel Ritz starteten mit dem Fahrrad von ihrer Heimatstadt München aus ihre Reise nach Singapur – und erfüllten sich damit einen lang geträumten Traum . Im ersten Buch folgten sie der Seidenstraße bis

nach Kashgar in China. Im vorliegenden Buch durchqueren sie das wilde, unbekannte, atemberaubende Osttibet. Dem Mekong folgen sie 5.000 km weit von der Quelle in Tibet bis zur Mündung im Mekongdelta in Vietnam. Sie durchqueren Südostasien, stehen auf dem südlichsten Festlandspunkt Asiens und erreichen schließlich genau ein Jahr nach dem Start in Deutschland das Ziel Singapur. Dies ist nicht nur ein Buch für Radfahrer, sondern für jeden, der das Abenteuer liebt und etwas über fremde Kulturen, Länder und Landschaften erfahren möchte.

**Vocabulary Increase and Collocation Learning** DuMont Reiseverlag

Paints a clear, research-based picture of how Chinese students and their teachers see the context of their learning both in Hong Kong and abroad. The focus of much of this research is the question, How can Chinese learners be so successful academically'.

*Mitteuropäische Vogelwelt* Cambridge University Press

The Routledge Handbook of Language Revitalization is the first comprehensive overview of the language revitalization movement, from the Arctic to the Amazon and across continents. Featuring 47 contributions from a global range of top scholars in the field, the handbook is divided into two parts, the first of which expands on language revitalization issues of theory and practice while the second covers regional perspectives in an effort to globalize and decolonize the field. The collection examines critical issues in language revitalization, including: language rights, language and well-being, and language policy; language in educational institutions and in the home; new methodologies and venues for language learning; and the roles of documentation, literacies, and the internet. The volume also contains chapters on the kinds of language that are less often researched such as the revitalization of music, of whistled languages and sign languages, and how languages change when they are being revitalized. The Routledge Handbook of Language Revitalization is the ideal resource for graduate students and researchers working in linguistic anthropology and language revitalization and endangerment.

*Die Vögel der paläarktischen Fauna* Oxford University

This book highlights research that expands on our knowledge of second- language collocation acquisition. It presents original findings based on the largest collocation database to date, encompassing over 8,000 collocations: verb + noun, adjective + noun, and noun + noun. These collocations, collected from a one-million-learner corpus, were not confined to English as a foreign language (EFL) learners at a particular proficiency level, but also included learners at three levels. As such, the book provides a panoramic view regarding L2 collocation acquisition, not only in terms of learners' acquisition of different types of collocations, but in terms of the developmental patterns in L2 collocation learning. One major discovery is that there is a collocation lag as learners' proficiency levels rise, which is associated with vocabulary increase, in particular semantic domains—a remarkable insight for second-language acquisition researchers, English teachers and EFL learners alike. The findings reported shed new light on how collocations are acquired by EFL learners, offering guidance on how they can best be taught. In closing, the book discusses pedagogical aspects that arise from considering how learners can be helped with collocation learning.

*Socio-Cultural Perspectives on Science Education* Springer

Tackles the question of whose interests are being served by the current science education practices and policies, and offers perspectives from culture, economics, epistemology, equity, gender,

language, and religion. Promotes a reflective science education that takes place within people's cultural lives rather than taking it over. Among the topics are situating school science in a climate of critical cultural reform, the influence of language on teaching and learning science in a second language, a cultural history of science education in Japan, and the philosophy of science and radical intellectual Islam in Turkey. Of interest to students, researchers, and practitioners of education.

**Talking the Talk** Amsterdam University Press

KAT LOMB (1909-2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. Polyglot: How I Learn Languages, first published in 1970, is a collection of anecdotes and reflections on language learning. Because Dr. Lomb learned her languages as an adult, after getting a PhD in chemistry, the methods she used will be of particular interest to adult learners who want to master a foreign language.

**Techniques and Principles in Language Teaching** Multilingual Matters

Techniques and Principles in Language Teaching has influenced the way thousands of teachers have taught English. This classic guide to developing the way you teach has been an essential resource to new and experienced teachers worldwide, and is now in its third edition. Each chapter focuses on a different teaching approach, describing it being used in the classroom, analyzing what happened, and helping you think how you could apply it to your own teaching. New features of the third edition include: a new discussion on the political dimensions of language teaching, a new digital technology chapter, and extended coverage of content-based and task-based approaches. On this site you will find additional resources, including author videos in which Diane Larsen-Freeman and Marti Anderson talk about the background to the book and new innovations in language teaching which are discussed in the third edition.

*The Routledge Handbook of Language Revitalization* Springer Science & Business Media

This volume brings a mixed group of researchers together to discuss issues in bilingual or trilingual education for the majority and minority nationality groups in China and to explore the relationship between the two.

*Mitteilungen der Kaiserlich-Königlichen Geographischen Gesellschaft* Reise Know-How Verlag Peter Rump

This volume further complicates and advances the contemporary perspective on language endangerment by examining the outcomes of the most commonly cited responses to language endangerment, i.e. language documentation, language revitalization, and training. The present collection takes stock of many complex and pressing issues, such as the assessment of the degree of language endangerment, the contribution of linguistic scholarship to language revitalization programs, the creation of successful language reclamation programs, the emergence of languages that arise as a result of revitalization efforts after interrupted transmission, the ethics of fieldwork, and the training of field linguists and language educators. The volume's case studies provide detailed personal accounts of fieldworkers and language activists who are grappling with issues of language documentation and revitalization in the concrete physical and socio-cultural settings of

native speaker communities in different regions of the world.

[Harmony of Babel: Profiles of Famous Polyglots - 2nd Edition](#) Simon and Schuster

This book provides a practical overview of the most important methods in the field. Readers are drawn into classrooms where various teaching methods and approaches are being used. They are encouraged to reflect on their own beliefs and to develop their own approach to language teaching. - Publisher.

**Southern Tibet** Natl Foreign Lg Resource Ctr

What happens – sociologically, linguistically, educationally, politically – when more than one language is in regular use in a community? How do speakers handle these languages simultaneously, and what influence does this language contact have on the languages involved? Although most people in the world use more than one language in everyday life, the approach to the study of language has usually been that monolingualism is the norm. The recent interest in bilingualism and language contact has led to a number of new approaches, based on research in communities in many different parts of the world. This book draws together this diverse research, looking at examples from many different situations, to present the topic in any easily accessible form. Language contact is looked at from four distinct perspectives. The authors consider bilingual societies; bilingual speakers; language use in the bilingual community; finally language itself (do languages change when in contact with each other? Can they borrow rules of grammar, or just words? How can new languages emerge from language contact?). The result is a clear, concise synthesis offering a much-needed overview of this lively area of language study.

[Die Erdkunde im Verhältniss zur Natur und zur Geschichte des Menschen](#) John Benjamins Publishing

Talking the Talk provides a comprehensive introduction to the psychology of language, written for the reader with no background in the field or any prior knowledge of psychology. Written in an accessible and friendly style, the book answers the questions people actually have about language; how do we speak, listen, read, and learn language? The book advocates an experimental approach, explaining how psychologists can use experiments to build models of language processing. Considering the full breadth of psycholinguistics, the book covers core topics including how children acquire language, how language is related to the brain, and what can go wrong with it. Fully updated throughout, this edition also includes: Additional coverage on the genetics of language Insight into

potential cognitive advantages of bilingualism New content on brain imaging and neuroscience Increased emphasis on recursion and what is special about language Talking the Talk is written in an engaging style which does not hesitate to explain complex concepts. It is essential reading for all undergraduate students and those new to the topic, as well as the interested lay reader.

**Das kloster Kumbum in Tibet** AOSIS

The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers — thus far overlooked — a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is that authors used the comparative method in education, that is comparing the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive national projects of establishing world-class universities, with Project 985, Project 211, and the “Double First Class University” project. The chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries.

*Chinese as a Heritage Language* Lulu.com

The Caldecott Medal Winner, Sibert Honor Book, and New York Times bestseller Locomotive is a rich and detailed sensory exploration of America’s early railroads, from the creator of the “stunning” (Booklist) Moonshot. It is the summer of 1869, and trains, crews, and family are traveling together, riding America’s brand-new transcontinental railroad. These pages come alive with descriptive details of the journey: the sounds, speed, and strength of the mighty locomotives; the work that keeps them moving; and the thrill of travel from plains to mountain to ocean. Come sit inside the caboose, feel the heat of the engine, watch the landscape race by. Come ride the rails, come cross the young country!
