National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch

At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian

Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times
 "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker
 "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

Jem Cresswell's striking anthropomorphic photographic work allows us to view the complex creatures that are humpback

whales and the intimate bonds they form in a manner that is befitting of sentient beings who think, feel and communicate like we do. It opens a dialogue that mutes the distances between our species, creating a space in which the restless modern spirit is humbled into peaceful submission.

Iljuwas Bill Reid Sterling

Few twentieth-century artists were catalysts for the reclamation of a culture, but Iljuwas Bill Reid (1920-1998) was among them. The first book on the artist by an Indigenous scholar details Reid's incredible journey to becoming one of the most significant Northwest Coast artists of our time. Born in British Columbia and denied his mother's Haida heritage in his youth, Iljuwas Bill Reid lived the reality of colonialism yet tenaciously forged a creative practice that celebrated Haida ways of seeing and making. Over his fifty-year career, he created nearly a thousand original works and dozens of texts, and he is remembered as a passionate artist, community activist, mentor, and writer. Reid was often said to embody the Raven, a trickster who transforms the world. He followed in the footsteps of his great-great-uncle, master Haida artist Daxhiigang (Charles Edenshaw), engaging with a culture whose practices were once banned by the Indian Act and producing symbols for a nation. His iconic large-scale works now occupy sites such as the Canadian Embassy in Washington, D.C., and the Museum of Anthropology at the University of British Columbia in Vancouver. Reid's legacy is a complex story of power, resilience, and strength. In *Iljuwas Bill Reid: Life & Work*, acclaimed scholar Gerald McMaster examines how the artist made a critical inquiry into his craft throughout his life, gaining a sense of identity, purpose, and impact.
