 Crops.Creating a Forest
 Garden: Working with
 Nature to Grow
 ...CREATING A FOREST
 GARDEN Different plants
 need different nutrients
 The types of plant in a
 forest garden can be
 divided into four groups,
 according to their
 demands for nutrients. •

Undemanding, lightly cropping unimproved fruits, e.g. hawthorn, and lightly cropping perennials. • Moderately cropping fruiting plants, e.g. currants. Creating a Forest Garden - agroforestry.co.uk Creating a Forest Garden - the Process of Design Having an understanding of a few basic ecological and design principles enables us to work through the process of combining fruit trees and bushes and other (mainly) perennial species in order to create our own highly productive edible landscapes... The Step By Step Guide to Creating Your Forest Garden ... Creating a Forest Garden: Working with Nature to Grow Edible Crops. A forest garden is modelled on young natural woodland, with a wide range of crops grown in different vertical layers. Unlike in a conventional garden, there is little need for digging, weeding or pest control. Species are carefully chosen for their beneficial effects on each other, creating a healthy system that maintains its own fertility. Creating a Forest Garden: Working with Nature to Grow ...
