Since the age of the Sasanian Empire

(224-651 AD), Iran and the West have time and again appeared to be at odds. Iran and the West charts this contentious and complex relationship by examining the myriad ways the two have perceived each other, from antiquity to today. Across disciplines, perspectives and periods contributors consider literary, imagined, mythical, visual, filmic, political and historical representations of the 'other' and the ways in which these have been

constructed in, and often in spite of, their specific historical contexts. Many of these narratives, for example, have their origin in the ancient world but have since been altered, recycled and manipulated to fit a particular agenda. Ranging from Tacitus, Leonidas and Xerxes via Shahriar Mandanipour and Azar Nafisi to Rosewater, Argo and 300, this inter-disciplinary and wide-ranging volume is essential reading for anyone working on the complex

history, present and future of Iranian-Western relations.

**Tales of the Caucasus** Routledge

This book concentrates on the sometimes Greek but largely Roman survivals many travellers set out to see and perhaps possess throughout the immense Ottoman Empire, on what were eastward and southward extensions of the Grand Tour. Europeans were curious about the Empire, Christianity's great rival for centuries, and plenty of information on its antiquities was available, offered here via lengthy quotations. Most accounts of the history of collecting and museums concentrate on the European end. *Plundered Empire* details how and where antiquities were sought, uncovered, bartered, paid for or stolen, and any tribulations in getting them home. The book provides evidence for the continuing debate about the ethics of museum collections, with 19th century international competition the spur to spectacular acquisitions.

The Unseen Truth Routledge

First published in 2008. Intended for would-be travellers to Georgia, this guide presents information on all of the country's regions, as well as its history,

language, literature, and political conditions. Batum, Tiflis, Vladikavkaz, the Kakhetian Road, Signakh, and the Alazana are among the locales explored by the author of this fascinating book, first published in 1888. Today's travellers would be well advised to carry two guides: a modern book to assist them with practical necessities and Wardrop's *Kingdom of Georgia* to convey to them Georgia's history and eternal spirit. *The Bondage and Travels of Johann Schiltberger, a Native of Bavaria, in Europe, Asia, and Africa, 1396-1427* Routledge

Oliver Wardrop in the book "The Kingdom of Georgia: Notes of travel in a land of women, wine, and song" discusses the adventures of an adventurer in the late 19th century. This book consists of the travelogue, history of Georgia, and a multi-language bibliography of related material on the Kingdom. A historical book for young and old interested in the history of Georgia.

This is the first bibliography in its field,

based on first-hand collations of the actual articles. International in scope, it includes publications found in public theatre libraries and archives of Barcelona, Berlin, Brussels, Budapest, Florence, London, Milan, New York and Paris amongst others. Over 3500 detailed entries on separately published sources such as books, sales and exhibition catalogues and pamphlets provide an indispensable guide for theatre students, practitioners and historians. Indices cover designers, productions, actors and performers. The iconography provides an indexed record of over 6000 printed plates of performers in role, illustrating performance costume from the 18th to 20th century.

The award-winning art historian and founder of Vision & Justice uncovers a pivotal era in the story of race in the United States when Americans came to ignore the truth about the false foundations of the nation's racial regime. In a masterpiece of historical detective work, Sarah Lewis exposes one of the most damaging lies in American history. There was a time when Americans were confronted with the fictions shoring up the nation's racial regime and learned to disregard them. The true significance of this hidden history has gone unseen—until now. The surprising catalyst occurred in the nineteenth century when the Caucasian War—the fight for independence in the Caucasus that coincided with the end of the US Civil War—revealed the instability of the entire regime of racial domination. Images of the Caucasus region and peoples captivated the American public but also showed that the place from which we derive “Caucasian” for whiteness was not white at all. Cultural and political figures ranging from P. T. Barnum to Frederick Douglass, W. E. B. Du Bois to Woodrow Wilson

recognized these fictions and more, exploiting, unmasking, critiquing, or burying them. To acknowledge the falsehood at the core of racial order proved unthinkable, especially as Jim Crow and segregation took hold. Sight became a form of racial sculpture, vision a knife excising what no longer served the stability of racial hierarchy. That stability was shaped, crucially, by what was left out, what we have been conditioned not to see. Groundbreaking and profoundly resonant, *The Unseen Truth* shows how visual tactics have long secured our regime of racial hierarchy in spite of its false foundations—and offers a way to begin to dismantle it.

Belief in the afterlife is still very much alive in Western civilisation, even though the truth of its existence is no longer universally accepted. Surprisingly, however, heaven, hell and the immortal soul were all ideas which arrived relatively late in the ancient world. Originally Greece and Israel - the cultures that gave us Christianity - had only the vaguest ideas of an afterlife. So where did these concepts come from and why did they develop? In this fascinating, learned, but highly readable book, Jan N. Bremmer - one of the foremost authorities on ancient religion - takes a fresh look at the major developments in the Western imagination of the afterlife, from the ancient Greeks to the modern near-death experience.

C'est maintenant le no man's land vers la Russie, premier filtre, je patiente. On appelle "Strasbourg", ce qui veut dire qu'il y a eu de l'échange d'information avec le poste ukrainien, je réponds et on me fait mettre de côté, quid ? Un type ne parlant que russe m'aboie dessus, il a l'air de me dire que j'aurais dû prendre le poste frontière de la route principale E101 vers Moscou et que je dois faire demi-tour - et aller au diable, en fait. Il est limite agressif [...] je reste calme, souriant et droit dans mes bottes, je ne vais pas rebrousser chemin quand même, et perdre au bas mot deux heures et 150 kilomètres ! Je crains le pire, mais on me laisse entrer, tout le monde rigole, peut-être n'était-ce qu'une comédie pour m'intimider. On me donne une fiche de police à remplir, et je peux accéder à la zone frontière russe. Soyons clairs : Alexandre Dumas a été nettement mieux accueilli en Russie en 1858 que moi en 2017... » Nouvelle

destination pour E. Henry et sa plus que vénérable BMW 525i de 1992 qui ne cessent d'arpenter les routes d'Europe : leur nouvel objectif est en effet Bakou, pour un voyage qui repousse les limites des précédents. Espace et temps étant des dimensions indissociables, il n'est pas étonnant que ce périple devienne propice à une plongée dans le temps, à l'évocation des heures sombres et des tragédies qui ont marqué cette partie de l'Europe et ses populations au cours des siècles. Populations que l'auteur croque par ailleurs avec un œil acéré ou étonné, dans une écriture parfois acide ou grinçante, au fil de pages qui oscillent entre légèreté et gravité.
