Rumble with the Dinosaurs Capstone
For decades early childhood educators in high-quality programs have understood that the transition into reading and writing occurs naturally when young children are surrounded by

opportunities to interact with print in ways that are meaningful to them. The original edition of *More Than Letters*, first published in 2001, showed teachers how to intentionally help children develop literacy skills through hands-on, play-based activities. Like the original edition, the Standards Edition is based on theory and research. It contains new chapters

that specifically focus on developing the skills needed to decode literature and informational text. Expanded chapters include activities that target specific concepts included in national literacy standards. Fossil Hunter Capstone Coming in May 2016! Finding Voice, written by Nancy Dean with Natalie Danaher, is a foundational

book for elementary students and teachers that addresses close reading of complex text through understanding and practicing the elements of voice. The book is a collection of classroom lessons that cover the tools authors use to shape voice and meaning: diction, detail, imagery, figurative language, and tone. Every voice lesson includes a quotation selected from a wide range of engaging fiction and nonfiction text, two discussion questions, an exercise that

encourages students to practice what they have learned, and discussion suggestions so that possible answers are at the teacher's fingertips. The lessons will help students understand the elements of voice in what they read and encourage them to try out the elements of voice in their own writing. The Finding Voice lessons are specifically designed for students in grades 3 to 6. These lessons provide focused examination and practice for a specific element of voice and take

only 10 to 20 minutes of class time. The lessons of Finding Voice: Introductory Lessons to Teach Reading and Writing of Complex Text fit well with any literacy and language arts curriculum. As students work with each element of voice, they will improve their ability to critically analyze text. Students will also learn to apply the elements of voice to their own writing, creating a clear voice of their own. [Smithsonian Kids to the Moon and Back](#) Cavendish Square Publishing

Crash! The huge, fast, and hungry Tyrannosaurus Rex thundered through the hot and wet forests of the Cretaceous period, always searching for its next meal. Discover the fascinating story of this giant dinosaur and its journey through time.

Albertosaurus LB Kids
Albertosaurus' name may not sound very fearsome, but this was one deadly dino. Readers learn about this prehistoric predator from engaging text and bold illustrations reviewed by Smithsonian experts.
Smithsonian Kids T.Rex

Capstone
Head back to the Mesozoic and rumble with the dinosaurs! Part of the 2021 NAPPA-award-winning Discovery 10-Button Sound Books series With 10 cool sound buttons, fun facts, full-color illustrations, and much more, this Discovery sound-and-reference book is a unique way for kids to learn about dinosaurs. Kids will love hearing the sounds of the various dinosaurs in this vibrant and interactive book.

Random House Books for Young Readers
"Introduces young readers to Allosaurus, including

physical characteristics, habitat, behavior, diet, and fossil discovery."--
Barnum Brown Penguin
Winner of the International Lannan Literary Award for Nonfiction Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the

senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patters) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to

recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of

language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez. **If You Decide to Go to the Moon** Capstone Discovery Rumble with the Dinosaurs! is filled with 10 dinosaur sounds for your little one to discover new sounds. Megalosaurus Capstone

When Little Blue gets lost from his herd, he is forced to learn to use his wits.

Lucia Marquand

A young boy describes the fun and difficulty of having a Tyrannosaurus Rex for a friend, in a book that includes dinosaur facts.

The Legend of the

Bluebonnet Penguin

Megalosaurus was the very first dinosaur ever found in fossils. The discovery of this "Great Lizard" introduced the world to prehistoric monsters that once roamed the earth. Vibrant

images, accompanied by colorful maps, fun facts, and engaging text supported by Smithsonian experts, transports readers back in time.

Finding Voice

Megalosaurus

Introducing another book in the LITTLE EXPLORERS series, an interactive nonfiction series for curious youngsters. With more than 30 flaps, DINOSAURS provides little ones with hands-on fun! DINOSAURS is a lively introduction to all types of prehistoric dinos. Children can lift the flaps to learn

about these amazing dinosaurs and the environments they used to live in, and they will be amazed as they find out all about the biggest, fastest, and most ferocious dinosaurs, and much, much more. This book features over 30 sturdy flaps to lift, along with charming, kid-friendly artwork that introduces new concepts and vocabulary in a simple and accessible way.

Board Book Smith

Get ready to roar with this updated edition of DK's beloved Big Book of Dinosaurs Dinosaurs fascinate young children, and this colorful catalog of those mysterious creatures from the past will keep even toddlers entertained for hours.

Children will love spotting and learning to name all the different dinosaurs-- from the fierce, meat-eating Tyrannosaurus and

the long-necked, plant-eating Diplodocus to the armor-plated Stegosaurus and the tiny, hen-sized Compsognathus.

Tyrannosaurus Rex

Penguin

Tyrannosaurus rex was one of the biggest meat-eating dinosaurs that ever lived, but life began for this giant dinosaur inside a small protective egg. Let's find out about the life of Tyrannosaurus Rex.

Triceratops Vintage

From his stunning discovery of Tyrannosaurus rex one

hundred years ago to the dozens of other important new dinosaur species he found, Barnum Brown led a remarkable life (1873-1963), spending most of it searching for fossils—and sometimes oil—in every corner of the globe. One of the most famous scientists in the world during the middle of the twentieth century, Brown—who lived fast, dressed to the nines, gambled, drank, smoked, and was known as a ladies' man—became as legendary as the dinosaurs he uncovered.

Barnum Brown brushes off the loose sediment to reveal the man behind the legend. Drawing on Brown's field correspondence and unpublished notes, and on the writings of his daughter and his two wives, it discloses for the first time details about his life and travels—from his youth on the western frontier to his spying for the U.S. government under cover of his expeditions. This absorbing biography also takes full measure of Brown's extensive

scientific accomplishments, making it the definitive account of the life and times of a singular man and a superlative fossil hunter.
