Practice is a recurring and popular theme in language education. However, the concepts of practice and automatization have recently received renewed theoretical and practical interest and are increasingly being explored from the skill acquisition theory and cognitive psychology perspectives. In this volume, leading scholars discuss the optimal types, amounts, and schedules of practice for specific language structures and skills, as well as for various types of learners and learning contexts, to facilitate second language development. They illuminate how practice is instantiated for specific groups of teachers and learners in diverse institutionalized contexts, such as foreign language curriculum development, intelligent computer-assisted language learning systems, task-based language teaching, and study abroad. Furthermore, original methodological syntheses of extant research on practice and automatization are presented, along with guides for conducting empirical research on these topics. *Practice and Automatization in Second Language Research: Perspectives from Skill Acquisition Theory and Cognitive Psychology* is a valuable resource and reference for graduate students and researchers in the field of SLA and applied linguistics.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and

healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Calvin Fletcher, born in Vermont in 1798, came to Indiana from Ohio in 1821, and in the next forty-five years made a fortune, raised eleven children, and was a pillar of the community. This pioneer Indianapolis lawyer, banker, and philanthropist kept a diary for most of his long life, and in it he recorded both the growth of his family and his community. Whether complaining, criticizing, observing shrewdly, or agonizing, Fletcher emerges as both a complex and unforgettable human being. Each of the set's nine volumes has a preface, chronology, and index. Volume nine includes a cumulative index.

How and where to use 500 of the words that make you sound more cultured, worldly, and downright smart. Whoever said sounding smart had to be painful? It's all in how you acquire the "ten-dollar words" of English. *Smart Words* makes fast and smooth learning of words such as prelapsarian, sedulous, sybaritic and draconian. How? By sticking to ultra-simple definitions, then offering a memorable--and often funny--description of when or why to use the word. A sample sentence shows you how. And the phonetics are a snap. Here's the description of sybaritic, defined as luxurious:

"Make that luxurious with a capital S. The word got its start from Sybaris, an ancient Greek city known for being a tad over the top in the pamper-me department." Whether you're a word lover, a fan of quirky reference books, or simply in need of a vocabulary makeover, Smart Words will help you be smart(er) about the words you use and the way you use them.

Today, the online sphere is no longer just an information repository or a place to search for resources. It has become instead a place supporting both intentional and non-intentional learning. Intentional, formal learning, often leads to certification, whereas informal learning is unstructured

and takes place as part of daily work-related or leisure activities. Cases on Formal and Informal E-Learning Environments: Opportunities and Practices brings together cases outlining the practical aspect of formal, non-formal, and informal online learning. This book introduces conceptual aspects of these types of learning, knowledge-base, new learning paradigms, policy implications, evaluation and concerns, design, and development of online learning.
