**Exploring Transculturalism** Scholastic Inc.

Lotta has just started middle school--but life isn't going very smoothly. First of all, she has a teacher named Mrs. Crabbert--who is very, well, crabby. Then, her mom gives her a recorder that seems to make mysterious things happen. Lotta also wants to get her own pet . . . no matter what it takes. But her parents' refusal to consider her request, a fight with her best friend, and that weird recorder keep getting in the way. Can Lotta make it all work out?

This volume explores the late medieval

and early modern periods from the perspective of objects. While the agency of things has been studied in anthropology and archaeology, it is an innovative approach for art historical investigations. Each contributor takes as a point of departure active things: objects that were collected, exchanged, held in hand, carried on a body, assembled, cared for or pawned. Through a series of case studies set in various geographic locations, this volume examines a rich variety of systems throughout Europe and beyond. The Open Access version of this book, available at <http://www.taylorfrancis.com/doi/view/10.4324/9781315401867>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Everyone's favorite pranksters are at it

again! School's out, and Miles and Niles are running wild in the woods outside town: climbing trees, exploring caves, and, yes, pranking. But these leafy, lazy days of mischief darken when bully Josh Barkin and his cadets from a nearby kids' boot camp discover the merrymakers—and vow to destroy them. Are our heroes' sharp minds any match for these hooligans' hard fists? The latest installment of the witty, on-target illustrated series is another "fast paced, laugh-out-loud novel" (School Library Journal) that proves once again that, in the hands of the powerless, pranks can be tools of justice—plus, they're funny.

**A Tiny Bit Lucky (Tom Gates #7)**

University of North Carolina S  
Hitler's decision to declare war on the United States has baffled generations of historians. In this revisionist new history of

those fateful months, Klaus H. Schmider seeks to uncover the chain of events which would incite the German leader to declare war on the United States in December 1941. He provides new insights not just on the problems afflicting German strategy, foreign policy and war production but, crucially, how they were perceived at the time at the top levels of the Third Reich. Schmider sees the declaration of war on the United States not as an admission of defeat or a gesture of solidarity with Japan, but as an opportunistic gamble by the German leader. This move may have appeared an excellent bet at the time, but would ultimately doom the Third Reich.

It's really cold outside and we're all hoping it's going to snow. Yeah! Derek and I could make a snow Rooster and have a snowball fight (look out, Delia!). Granny Mavis has started to knit me a new winter jumper, but by the looks of things I'm not sure it's going to fit. . .

*Elephant Chronicles* Vandenhoeck & Ruprecht

Exciting News! Mr Fullerman announces that class 5F are going on an 'Activity Break'! Which should be fun. As long as I don't get stuck in a group with anyone who snores or worse still with . . . . .  
Marcus Meldrew.

**Excellent Excuses (and Other Good Stuff) (Tom Gates #2)** Scholastic Canada

What's up the Gates family tree? In the next hilarious illustrated instalment of Tom Gates, Mr. Fullerman has a class assignment: a family tree! Tom's ready to learn all about the Gates family, his friends and a furry creature (or two!). But just what is that squawking sound coming from Tom's shoes?

*Essex Dogs* Vosuri Media

"From saying hello and pronouncing your friend's name correctly to giving more than you take and saying I'm sorry, this simple concept book explores definitions of peace and actions small and big that foster it"--

*Sport Under Unexpected Circumstances* Walter de Gruyter GmbH & Co KG

From the Treaty of Versailles to the 2018 centenary and beyond, the history of the First World War has been continually written and rewritten, studied and contested, producing a rich historiography shaped by the social and cultural circumstances of its creation. Writing the Great War provides a groundbreaking survey of this vast body of work, assembling contributions on a variety of national and regional historiographies from some of the most prominent scholars

in the field. By analyzing perceptions of the war in contexts ranging from Nazi Germany to India's struggle for independence, this is an illuminating collective study of the complex interplay of memory and history.

*The Murderer's Daughters* Yale University Press

Leo, the son of the maintenance man of the Whippet Hotel, opens a series of cryptic boxes which reveals hidden floors, strange puzzles, and unexpected alliances and leads him on an adventure to save the building and his future.

*Hitler's Fatal Miscalculation* Scholastic UK  
A brilliant box set of the first five fantastic 'Tom Gates' books. Each book takes the form of Tom's battered homework diary and is crammed with his stories and scribbles.

*How to Get a Grip on Grammar* Springer Science & Business Media

This provocative new work examines the years between the Nazi book fires and the publication of Ray Bradbury's *Fahrenheit 451* (1953), a period when book burning captured the popular imagination. It explores how embedded the myths of book burning have become in our cultural history, and illustrates the enduring appeal of a great cleansing bonfire.

*Stefan Zweig* Scholastic UK

The study of the Earth's origin, its composition, the processes that changed and shaped it over time and the fossils preserved in rocks, have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology and biographical sketches of noted scholars in various fields of geoscience.

*The Spaghetti Detectives* Geological Society of London

A practical guide to unlocking the powers of our DNA to manifest health, wealth, and happiness • Shows how our DNA

communicates with those around us and attracts resonant energy--whether positive or negative--to us • Reveals groundbreaking scientific research on the influence of DNA on photons as well as the interactions between DNA and emotions • Provides practical exercises to remove negative influences, build positive visualizations of your desires, and accelerate the manifestation of your wishes Taking the law of attraction to an entirely new level, Pierre Franckh reveals how human DNA has a direct effect on the physical world around us--an effect we can consciously focus to manifest our desires. Sharing groundbreaking experiments on the influence of DNA on photons and on the interactions between emotions and DNA, Franckh explains how our thoughts, emotions, and beliefs, whether positive or negative, build a field of resonance around us. Through this quantum field our DNA is continuously communicating our unique vibration to those around us and receiving their unique oscillations in return. By focusing our intentions and removing negativity from our beliefs about ourselves, our past, and our future, we can use our DNA to communicate our thoughts and desires to the universe. Through focused thoughts and intentions we draw the same resonant energy to us, thus bringing our intentions and desires into manifestation. The author shares success stories from the thousands who have taken his seminars and were then able to attract a soul mate, heal themselves or loved ones, or build wealth, sometimes remarkably quickly. He also describes how he discovered the law of resonance through his own self-healing from a degenerative spinal condition. Franckh provides practical exercises to remove inner and outer negative influences that could be blocking your desires, build a positive visualization of your goals, and increase the power of your field of resonance for quicker manifestation. In this inspiring guide to the law of resonance, the author shows how the power to manifest health, wealth, and happiness is within each of us, waiting to be unlocked within our DNA.

*The Religion of Isaac Newton* Puffin Books

Just a few years before the dawn of the digital age, Harvard psychologist Bert Kaplan set out to build the largest database of sociological information ever assembled. It was the mid-1950s, and social scientists were entranced by the human insights promised by Rorschach tests and other innovative scientific protocols. Kaplan, along with anthropologist A. I. Hallowell and a team of researchers, sought out a varied range of

non-European subjects among remote and largely non-literate peoples around the globe. Recording their dreams, stories, and innermost thoughts in a vast database, Kaplan envisioned future researchers accessing the data through the cutting-edge Readex machine. Almost immediately, however, technological developments and the obsolescence of the theoretical framework rendered the project irrelevant, and eventually it was forgotten.

**Nero Corleone** Scholastic Canada Archives are considered to be collections of administrative, legal, commercial and other records or the actual place where they are located. They have become ubiquitous in the modern world, but emerged not much later than the invention of writing. Following Foucault, who first used the word archive in a metaphorical sense as "the general system of the formation and transformation of statements" in his "Archaeology of Knowledge" (1969), postmodern theorists have tried to exploit the potential of this concept and initiated the "archival turn". In recent years, however, archives have attracted the attention of anthropologists and historians of different denominations regarding them as historical objects and "grounding" them again in real institutions. The papers in this volume explore the complex topic of the archive in a historical, systematic and comparative context and view it in the broader context of manuscript cultures by addressing questions like how, by whom and for which purpose were archival records produced, and if they differ from literary manuscripts regarding materials, formats, and producers (scribes).

*The DNA Field and the Law of Resonance* Abrams

Lulu and Merry's childhood was never ideal, but on the day before Lulu's tenth birthday their father propels them into a

nightmare. He's always hungered for the love of the girls' self-obsessed mother; after she throws him out, their troubles turn deadly. Lulu had been warned not let her father in, but when he shows up drunk, he's impossible to ignore. He bullies his way past Lulu, who then listens in horror as her parents struggle. She runs for help, but discovers upon her return that he's murdered her mother, stabbed her five-year-old sister, Merry, and tried, unsuccessfully, to kill himself. Lulu and Merry are effectively orphaned by their mother's death and father's imprisonment. The girls' relatives refuse to care for them and abandon them to a terrifying group home. Even as they plot to be taken in by a well-to-do family, they come to learn they'll never really belong anywhere or to anyone—that all they have to hold onto is each other. For thirty years, the sisters try to make sense of what happened. Their imprisoned father is a specter in both their lives, shadowing every choice they make. One spends her life pretending he's dead, while the other feels compelled--by fear, by duty--to keep him close. Both dread the day his attempts to win parole may meet with success. A beautifully written, compulsively readable debut, Randy Susan Meyers's *The Murderer's Daughters* is a testament to the power of family and the ties that bind us together and tear us apart.

**Pantomime** Viking Juvenile

1 String of Spaghetti + 2 Friends = A Noodle-Cooking, Crime-Solving Adventure! Sometimes Rico acts a bit odd - his mom calls him a "proddity" -- but he's GENIUS at noticing little things nobody else does. Like a string of spaghetti stuck to the sidewalk. Or the big buckteeth of that boy in the blue motorcycle helmet. Or the strange behavior of the neighbors in his apartment building. Oscar is a true prodigy, with a high IQ and high anxieties

to match. He's the one who wears the blue helmet -- to protect his precious brain! Oscar may have a lot of book smarts, but he needs Rico's help to face his biggest fears. And when other kids mysteriously start going missing, it's up to the two friends to use their noodles, keep track of the clues, and crack the case! Funny, sweet, and just the right amount of scary, *THE SPAGHETTI DETECTIVES* shows how two opposite, seemingly mismatched kids can put their heads together and be better as a pair.

A boy and a dragon team up to keep the Pegasus from extinction in this "not-to-be-missed" sequel to the #1 New York Times–bestselling *Dragon Rider* (School Library Journal). The last Pegasus in the world has been discovered and when Ben learns the legendary horse has three unhatched eggs that need to be protected, he vows to help. But the only way the eggs will ever hatch—and continue the survival of this incredible magical species—is if they are placed under a griffin's feather. But griffins are the most dangerous creatures in the world, and their mortal enemies are dragons . . . Ben vows not to tell his beloved dragon Firedrake about his quest, if only to protect him. But as Ben sets off for a remote island where the terrible griffins are rumored to live, he may just need the help of his best friend and dragon . . . "A richly imagined, adeptly illustrated adventure with a strong message of respect for all species of creatures." —Kirkus Reviews
