A powerful reminder to anyone who thinks design is primarily a visual pursuit, *The Senses* accompanies a major exhibition at the Cooper-Hewitt Smithsonian Design Museum that explores how space, materials, sound, and light affect the mind and body. Learn how contemporary designers, including Petra Blaisse, Bruce Mau, Malin+Goetz and many others, engage sensory experience. Multisensory design can solve problems and enhance life for everyone, including those with sensory disabilities. Featuring thematic essays on topics ranging from design for the table to tactile graphics, tactile sound, and visualizing the senses, this book is a call to action for multisensory design practice. *The Senses: Design Beyond Vision* is mandatory reading for students and professionals working in diverse fields, including products, interiors, graphics, interaction, sound, animation, and data visualization, or anyone seeking the widest possible understanding of design. The book, designed by David Genco with Ellen Lupton, is edited by Lupton and curator Andrea Lipps. Includes essays by Lupton, Lipps, Christopher Brosius, Hansel Bauman, Karen Kraskow, Binglei Yan, and Simon Kinnear.

Frank McCourt's glorious childhood memoir, *Angela's Ashes*, has been loved and celebrated by readers everywhere for its spirit, its wit and its profound humanity. A tale of redemption, in which storytelling itself is the source of salvation, it won the National Book Critics Circle Award, the Los Angeles Times Book Award and the Pulitzer Prize. Rarely has a book so swiftly found its place on the literary landscape. And now we have 'Tis, the story of Frank's American journey from impoverished immigrant to brilliant teacher and raconteur. Frank lands in New York at age nineteen, in the company of a priest he meets on the boat. He gets a job at the Biltmore Hotel, where he immediately encounters the vivid hierarchies of this "classless country," and then is drafted into the army and is sent to Germany to train dogs and type reports. It is Frank's incomparable voice -- his uncanny humor and his astonishing ear for dialogue -- that renders these experiences spellbinding. When Frank returns to America in 1953, he works on the docks, always resisting what everyone tells him, that men and women who have dreamed and toiled for years to get to America should "stick to their own kind" once they arrive. Somehow, Frank knows that he should be getting an education, and though he left school at fourteen, he talks his way into New York University. There, he falls in love with the quintessential Yankee, long-legged and blonde, and tries to live his dream. But it is not until he starts to teach -- and to write -- that Frank finds his place in the world. The same vulnerable but invincible spirit that captured the hearts of readers in *Angela's Ashes* comes of age. As Malcolm Jones said in his Newsweek review of *Angela's Ashes*, "It is only the best storyteller who can so beguile his readers that he leaves them wanting more when he is done...and McCourt proves himself one of the very best." Frank McCourt's 'Tis is one of the most eagerly awaited books of our time, and it is a masterpiece.

This book offers a unique and unified approach to competence and the basic processes of human communication backed by skill assessment. Beginning with the premise that all forms of communication have the potential to be viewed as competent depending on the context or situation, the text helps readers develop a framework for choosing among communication messages that will allow them to act competently. The theoretically-based and skills-oriented framework emphasizes the basic themes of motivation, knowledge and skills across interpersonal communication, electronically mediated communication, small group communication, and public speaking.

My new friends have begun to suspect I haven't told them the full story of my life. "Why did you leave Sierra Leone?" "Because there is a war." "You mean, you saw people running around with guns and shooting each other?" "Yes, all the time." "Cool." I smile a little. "You should tell us about it sometime." "Yes, sometime." This is how wars are fought now: by children, hopped-up on drugs and wielding AK-47s. Children have become soldiers of choice. In the more than fifty conflicts going on worldwide, it is estimated that there are some 300,000 child soldiers. Ishmael Beah used to be one of them. What is war like through the eyes of a child soldier? How does one become a killer? How does one stop? Child soldiers have been profiled by journalists, and novelists have struggled to imagine their lives. But until now, there has not been a first-person account from someone who came through this hell and survived. In *A Long Way Gone*, Beah, now twenty-five years old, tells a riveting story: how at the age of twelve, he fled attacking rebels and wandered a land rendered unrecognizable by violence. By thirteen, he'd been picked up by the government army, and Beah, at heart a gentle boy, found that he was capable of truly terrible acts. This is a rare and mesmerizing account, told with real literary force and heartbreaking honesty.

Do you ever feel not good enough? Are you constantly trying to fix yourself? Do you want to find your way back to the person who you know you are deep down? Suzanne Jones has helped

thousands of participants with her life-changing somatic healing program and has put the knowledge into the last self-help book you will ever need. She leads you on a journey back to your authentic self by guiding you through a personal exploration of recovery, growth, and resilience. *There Is Nothing to Fix* is *The Power of Now* meets the #MeToo movement. Interspersed with case studies and stories of real people--stories you can connect with--the book illustrates the power of Jones's approach to create innate healing and hope. Jones begins where most teachings on self-compassion, emotional regulation, and healthy relationships end, by going to the source of lasting change--the body. This book provides a practical lens through which readers can understand their responses and emotions while offering step-by-step guidance for changing these responses, all with an emphasis on compassion and empowerment. Through this revolutionary approach you will be able to experience true freedom from the constant urge to fix yourself from the outside. Jones teaches you everyday tools to build self-confidence, self-compassion, and most important, self-acceptance--tools that have been within you all along. In today's struggle to feel connection and approval in our chaotic and critical world, *There Is Nothing to Fix* teaches us how to suspend judgment, become curious, and find emotional freedom from within.

What Am I Feeling? Palgrave Macmillan

The New Codependency is an owner's manual to learning to be who you are and gives you the tools necessary to reclaim your life by renouncing unhealthy practices. In *Codependent No More*, Melody Beattie introduced the world to the term codependency. Now a modern classic, this book established Beattie as a pioneer in self-help literature and endeared her to millions of readers who longed for healthier relationships. Twenty-five years later concepts such as self-care and setting boundaries

have become entrenched in mainstream culture. Now Beattie has written a followup volume, *The New Codependency*, which clears up misconceptions about codependency, identifies how codependent behavior has changed, and provides a new generation with a road map to wellness. The question remains: What is and what is not codependency? Beattie here reminds us that much of codependency is normal behavior. It's about crossing lines. There are times we do too much, care too much, feel too little, or overly engage. Feeling resentment after giving is not the same as heartfelt generosity. Narcissism and self-love, enabling and nurturing, and controlling and setting boundaries are not interchangeable terms. In *The New Codependency*, Beattie explores these differences, effectively invoking her own inspiring story and those of others, to empower us to step out of the victim role forever. Codependency, she shows, is not an illness but rather a series of behaviors that once broken down and analyzed can be successfully combated. Each section offers an overview of and a series of activities pertaining to a particular behavior--caretaking, controlling, manipulation, denial, repression, etc.--enabling us to personalize our own step-by-step guide to wellness. These sections, in conjunction with a series of tests allowing us to assess the level of our codependent behavior, demonstrate that while it may not seem possible now, we have the power to take care of ourselves, no matter what we are experiencing.

Superhero of Love Raviraj Mishra

Since the early 1990s hundreds of thousands of Tamil villagers in southern India have participated in literacy lessons, science demonstrations, and other events designed to transform them into active citizens with access to state power. These efforts to spread enlightenment among the oppressed are part of a movement known as the Arivoli Iyakkam (the Enlightenment Movement), considered to be among the most successful mass literacy movements in recent history. In *The Light of Knowledge*, Francis Cody's ethnography of the Arivoli Iyakkam highlights the paradoxes inherent in such movements that seek to emancipate people through literacy when literacy is a power-laden social practice in its own right. *The Light of Knowledge* is set primarily in the rural district of Pudukkottai in Tamil Nadu, and it is about activism among laboring women from marginalized castes who have been particularly active as learners and volunteers in the movement. In their endeavors to remake the Tamil countryside through literacy activism, workers in the movement found that their own understanding of the politics of writing and Enlightenment was often transformed as they encountered vastly different notions of language and imaginations of social order. Indeed, while activists of the movement successfully mobilized large numbers of rural women, they did so through logics that often pushed against the very Enlightenment rationality they hoped to foster. Offering a rare behind-the-scenes look at an increasingly important area of social and political activism, *The Light of Knowledge* brings tools of linguistic anthropology to engage with critical social theories of the postcolonial state.

By the end of the 19th century, British imperial medical officers and Christian medical missionaries had introduced Western medicine to Tibet, Sikkim, and Bhutan. Their Footprints Remain uses archival sources, personal letters, diaries, and oral sources in order to tell the fascinating story of how this once-new medical system became imbedded in the Himalayas. Of interest to anyone with an interest in medical history and anthropology, as well as the Himalayan world, this volume not only identifies the individuals involved and describes how they helped to spread this form of imperialist medicine, but also discusses its reception by a local people whose own medical practices were based on an entirely different understanding of the world.

In times of uncertainty and crisis, the mental health of individuals become a concern as added stressors and pressures can cause depression, anxiety, and stress. Today, especially with more people than ever experiencing these effects due to the Covid-19 epidemic and all that comes along with it, discourse around mental health has gained heightened urgency. While there have always been stigmas surrounding mental health, the continued display of these biases can add to an already distressing situation for struggling individuals. Despite the experience of mental health issues becoming normalized, it remains important for these issues to be addressed along with adequate education about mental health so that it becomes normalized and discussed in ways that are beneficial for society and those affected. Along with raising awareness of mental health in general, there should be a continued focus on treatment options, methods, and modes for healthcare delivery. The Research Anthology on Mental Health Stigma, Education, and Treatment explores the latest research on the newest advancements in mental health, best practices and new research on treatment, and the need for education and awareness to mitigate the stigma that surrounds discussions on mental health. The chapters will cover new technologies that are impacting delivery modes for treatment, the latest methods and models for treatment options, how education on mental health is delivered and developed, and how mental health is viewed and discussed. It is a comprehensive view of mental health from both a societal and medical standpoint and examines mental health issues in children and adults from all ethnicities and socio-economic backgrounds and in a variety of professions, including healthcare, emergency services, and the military. This book is ideal for psychologists, therapists, psychiatrists, counsellors, religious leaders, mental health support agencies and organizations, medical professionals, teachers, researchers, students, academicians, mental health practitioners, and more.

In an educational environment of high-stakes tests and school accountability, humor has been virtually banned from the classroom. That's a shame, and perhaps a mistake, since student success depends on engagement, and young adults seem to be naturally drawn to comic media. How can you take advantage of your students' interest in humorous material? According to Bruce A. Goebel, incorporating humor writing into the classroom not only reduces student anxiety but also provides them with an opportunity to study and practice the careful and effective use of language. Divided into four chapters--(1) Humorous Words, Phrases, and Sentences, (2) Funny Stories and Essays, (3) Light Verse, and (4) Parody--the book offers more than 150 activities you can use to help students

develop writing skills in voice, word choice, style, and organization while exploring a variety of genres. Depending on your purpose and needs, you can either sprinkle brief lessons throughout your instructional units or create an extended humor writing unit. Perhaps most important, these activities offer students the rare opportunity to express their creative, divergent-thinking sides in an increasingly serious classroom space.

This textbook is the new edition of Purnell's famous Transcultural Health Care, based on the Purnell twelve-step model and theory of cultural competence. This textbook, an extended version of the recently published Handbook, focuses on specific populations and provides the most recent research and evidence in the field. This new updated edition discusses individual competences and evidence-based practices as well as international standards, organizational cultural competence, and perspectives on health care in a global context. The individual chapters present selected populations, offering a balance of collectivistic and individualistic cultures. Featuring a uniquely comprehensive assessment guide, it is the only book that provides a complete profile of a population group across clinical practice settings. Further, it includes a personal understanding of the traditions and customs of society, offering all health professionals a unique perspective on the implications for patient care.

The Syrian refugee crisis has galvanized attention to one of the world's foremost challenges: forced displacement. The total number of refugees and internally displaced persons, now at over 65 million, continues to grow as violent conflict spikes. This report, *Forcibly Displaced: Toward a Development Approach Supporting Refugees, the Internally Displaced, and Their Hosts*, produced in close partnership with the United Nations High Commissioner for Refugees (UNHCR), attempts to sort fact from fiction to better understand the scope of the challenge and encourage new thinking from a socioeconomic perspective. The report depicts the reality of forced displacement as a developing world crisis with implications for sustainable growth: 95 percent of the displaced live in developing countries and over half are in displacement for more than four years. To help the displaced, the report suggests ways to rebuild their lives with dignity through development support, focusing on their vulnerabilities such as loss of assets and lack of legal rights and opportunities. It also examines how to help host communities that need to manage the sudden arrival of large numbers of displaced people and that are under pressure to expand services, create jobs, and address long-standing

development issues. Critical to this response is collective action. As work on a new Global Compact on Responsibility Sharing for Refugees progresses, the report underscores the importance of humanitarian and development communities working together in complementary ways to support countries throughout the crisis— from strengthening resilience and preparedness at the onset to creating lasting solutions.

A Long Way Gone Hidden Feelings

Inter-ethnic conflict and genocide have demonstrated the dangers of failing to protect people targeted by fellow citizens. When minority groups in one country are targeted for killings or ethnic cleansing based on their group identity, whose responsibility is it to protect them? In particular, are they owed any protective responsibility by their kin state? How can cross-border kinship ties strengthen greater pan-national identity across borders without challenging territorially defined national security? As shown by the Russia-Georgia conflict over South Ossetia, unilateral intervention by a kin state can lead to conflict within and between states. The protection of national minorities should not be used as an excuse to violate state sovereignty and generate inter-state

conflict. This book suggests that an answer to the kin state dilemma might come from the formula "neither intervention nor indifference" that recognizes the special bonds but proscribes armed intervention based on the ties of kinship.--Publisher's description.

There Is Nothing to Fix Springer

We were introduced to poetry right from a young age. We were made to sing and recite poetry in groups. The rhyming words somehow would bring a sense of enjoyment, and they won't leave our mind even with the passing days. Poetry holds magic. A magic to change the moment and bring out the joyous hidden self. We all in some point or another had come across a poetry that either taught us the unlearned or brought back a memory or just a smile. Piece of poetry is an effort to share some thoughts through prose. Each poetry was written with a story in mind, willing to be talked about. The thoughts that didn't need sophisticated words, but they were craving for rhythm. The idea was to point out some of the feelings and emotions that were desperate to be shared. Some untold words, a certain perspective that was always doubted by self and others. Piece of poetry is an honest attempt to format these feelings into a song, hoping that it would stick with everyone who decided to read it.
