This book tells the story of six secondary schools that have succeeded in eliminating or dramatically shrinking the achievement gap between whites and disadvantaged black and Hispanic students. It recounts the stories of the University Park Campus School (UPCS) in Worcester, the American Indian Public Charter School in Oakland, Amistad Academy in New Haven, the Cristo Rey Jesuit High School in Chicago, the KIPP Academy in the Bronx, and the SEED school in Washington, D.C.

When, in 1960, France granted independence to its colonies in West and Central Africa-an empire covering an

area the size of the contiguous United States-the French still intended to retain influence in Africa. Through a system of accords with these newly independent African nations, based upon ties naturally formed over the colonial years, France has succeeded for three decades in preserving its position in African affairs. The course of Franco-African relations in the near future, though, is less than certain. In this book, Ambassador Francis Terry McNamara outlines France's acquisition and administration of its Black African empire and traces the former colonies' paths to independence. Drawing upon that background, the ambassador examines the structure of post-independence Franco-African relations and recent strains on those relations, especially African economic crises and the French tendency to focus on Europe. Because of those strains, he suggests, France alone

may be unable to support its former dependencies much longer. He believes that long-term solutions to African problems will have to involve international organizations like the World Bank and International Monetary Fund as well as other nations such as the United States and France's European partners. - From Foreword.

The ASI was designed to study the broad range of ice science and technology, and it brought together an appropriately interdisciplinary group of lecturers and students to study the many facets of the subject. The talks and poster presentations explored how basic molecular physics of ice have important environmental consequences, and, conversely, how natural phenomena present new questions for fundamental study. The of lectures discusses these linkages, in order that overall unity of following summary the subject and this volume can be perceived. Not all of the lecturers and participants were able to contribute a written piece, but their active involvement was crucial to the success of the Institute and thereby influenced the content of the volume. We began the Institute by retracing the history of the search for a microscopic understanding of melting. Our motivation was straightforward. Nearly every phenome

non involving ice in the environment is influenced by the change of phase from solid to liquid or vice-versa. Hence, a sufficiently deep physical picture of the melting transition enriches our appreciation of a vast array of geophysical and technical problems.

This classic volume presents the core vocabulary of everyday life in Morocco--from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions. Understandable throughout the nation, it is based primarily on the standard dialect of Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription, making it invaluable to English-speaking non-Arabists, travelers, and tourists--as well as being an important resource tool for students and scholars in the Arabic language-learning field.

The story of freedom pivots on the choices black women made to retain control over their bodies and selves, their loved ones, and their futures. The story of freedom and all of its ambiguities begins with intimate acts steeped in power. It is shaped by the

peculiar oppressions faced by African women and women of African descent. And it pivots on the self-conscious choices black women made to retain control over their bodies and selves, their loved ones, and their futures. Slavery's rise in the Americas was institutional, carnal, and reproductive. The intimacy of bondage whet the appetites of slaveowners, traders, and colonial officials with fantasies of domination that trickled into every social relationship—husband and wife, sovereign and subject, master and laborer. Intimacy—corporeal, carnal, quotidian—tied slaves to slaveowners, women of African descent and their children to European and African men. In *Wicked Flesh*, Jessica Marie Johnson explores the nature of these complicated intimate and kinship ties and how they were used by black women to construct freedom in the Atlantic world. Johnson draws on archival documents scattered in institutions across three continents, written in multiple languages and largely from the perspective of colonial officials and slave-owning men, to recreate black women's experiences from coastal Senegal to French Saint-Domingue to Spanish Cuba to the swampy outposts of the Gulf Coast. Centering New Orleans as the quintessential site for investigating black women's practices of freedom in the Atlantic world, *Wicked Flesh* argues that African women and women of African descent endowed free status with meaning through active, aggressive, and sometimes unsuccessful intimate and kinship practices. Their stories, in both their successes and their failures, outline a practice of freedom that laid the groundwork for the emancipation struggles of the nineteenth century and reshaped the New World.

"The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ... Despite its occasional ugliness, the

reputation of the 11th persists today because of the staggering depth of knowledge contained with its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars"-- The Guardian, <https://www.theguardian.com/books/booksblog/2012/apr/10/encyclopedia-britannica-11th-edition>.
