In this lively and engaging book, Norberto Bobbio, the distinguished contemporary Italian philosopher, and the political theorist Maurizio Viroli, explore a range of themes relating to the idea of the Republic and some of the major political and ethical issues of the day. A lively discussion of politics and political theory by one of the world's most distinguished political theorists and philosophers. Provides an excellent introduction to the work of Bobbio for the newcomer. Explains the idea of the Republic and some of the major political and ethical themes of the

day. Demonstrates philosophy in action, with a breadth of reference including Machiavelli, Hobbes, Locke, Kant, Rousseau, Pettit and Skinner.

The Uncontrollability of the World
Routledge

This book offers the first systematic investigation of soft law within the framework of the EC and its use by the European Commission and Council of Ministers.

The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. *Believe, Obey, Fight* discusses the various tools used by the Fascist regime from 1922 to 1943 to shape the political values and environment of the young. Tracy Koon focuses on the secondary agents of socialization, including the party, the educational establishment, youth groups, and the media of political communication. She shows that the response to this socialization ranged from apparent consent to dissent and finally to open opposition. The regime employed several methods to produce consensus among the young. Koon's analysis begins with a discussion of the rhetorical style of Mussolini's message and the key political myths manipulated by his propaganda machine: fascism as continuing revolution and social justice, the glories of ancient Rome, the hygienic function of war and violence, the religious spirit of the new creed, and the omniscience of the leader.

She then describes the pre-Fascist educational system, the "most Fascist" Gentile reforms of 1923, and the later revision of those reforms by zealous party men engaged in the Fascist regimentation of teachers and students and the militarization and politicization of curricula and textbooks. Equally important agents of socialization were the Fascist groups organized for young people from their earliest years through the university level, including the annual national competitions and forums in which members could express their ideas on a range of issues. The regime provided physical, military, sports, and political training to strengthen the new Fascist society. Fascist socialization did for a time create a superficial consensus by appealing to both the love of conformity that marks the very young and the economic fears that caused students to conform in the hope of jobs. But Koon argues that the regime's attempt to exert totalitarian control over the young deprived them of personal identity. As time passed, the contradictions of the regime became clearer, the chasm between Fascist rhetoric and reality more obvious. In the end, the majority of young

people came to believe that the regime had given them nothing to believe in, no one to obey, and nothing for which to fight. Originally published in 1985. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

Le cronache scolastiche rassegna quindicinale dell'istruzione media

Routledge

Step back in time to the reign of Otto III with this fascinating collection of documents and other historical materials. Edited and annotated by esteemed historian Paul Fridolin Kehr, this book presents a detailed and nuanced view of a pivotal moment in medieval European history, shedding new light on the politics, culture, and society of the era. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the

United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Believe, Obey, Fight Hart Publishing

This volume analyses how effectively criminal law operates as a forum for resolving ethical conflict in the delivery of health care.

La Riforma medica Springer

This publication examines the contribution of universities to the cultural, material and intellectual heritage of Europe. It contains a range of papers authors representing 15 institutions, who work both on the heritage of universities from an academic perspective, as well as the management and preservation of university heritage. Four case studies are presented on the role of particular universities in Italy, Portugal, France and Spain. The book also

seeks to promote co-operation between universities at European level to define a common approach to important issues and problems.

The Idea of the Republic Mack

The new edition of this important, wide-ranging and extremely useful textbook has been extensively re-written and expanded. Rab Houston explores the importance of education, literacy and popular culture in Europe during the period of transition from mass illiteracy to mass literacy. He draws his examples for all over the continent; and concentrates on the experience of ordinary men and women, rather than just privileged and exceptional elites.

"Scholarly, sympathetic, lucid--and filled with fascinating detail--The Avant-Garde in Exhibition is as valuable as a reference as it is exciting as a narrative."--Arthur Danto
Soft Law in European Community Law UNC Press Books

This book introduces the reader to the relationship between the Italian national movement, achieved by the Risorgimento, and the Italian unification in 1860. These themes are discussed in detail and related

to the broader European theatre. Covering the literary, cultural, religious and political history of the period, Beales and Biagini show Italy struggled towards nation state status on all fronts. The new edition has been thoroughly rewritten. It also contains a number of new documents. In addition, all the most up to date research of the last 20 years has been incorporated. The Risorgimento and the Unification of Italy remains the major text on nineteenth century Italy. The long introduction and useful footnotes will be of real assistance to those interested in Italian unification.

The Legacies of Literacy Cambridge University Press

Judge Falcone, who led the war against the Mafia in Italy, was assassinated with his wife and three bodyguards in a car-bomb explosion in May 1992 - just as he was to be given powers to investigate the organization nationally. Written the previous year, this is his account of the Mafia.

Between History and Histories

This catalogue accompanies a touring exhibition held at Museum Folkwang, Essen, Germany on March 4-May 29, 2016,

at Martin-Gropius Bau, Berlin, Germany on June 11-September 18, 2016, at High Museum, Atlanta, Georgia on October 16, 2016-January 8, 2017, and at St Louis Art Museum, St Louis, Missouri in Fall 2017.

Gazzetta piemontese John Wiley & Sons
This collection of case studies from around the world uses a new approach in historical anthropology, one that focuses on heterogeneity within cultures rather than coherence to explain how we commemorate certain events, while silencing others.

The Rise of Universities Houghton Mifflin Harcourt P

This book describes the basic physics of semiconductors, including the hierarchy of transport models, and connects the theory with the functioning of actual semiconductor devices. Details are worked out carefully and derived from the basic physics, while keeping the internal coherence of the concepts and explaining various levels of approximation. Examples are based on silicon due to its industrial importance. Several chapters are included that provide the reader with the quantum-mechanical concepts necessary for understanding the transport properties of

crystals. The behavior of crystals incorporating a position-dependent impurity distribution is described, and the different hierarchical transport models for semiconductor devices are derived (from the Boltzmann transport equation to the hydrodynamic and drift-diffusion models). The transport models are then applied to a detailed description of the main semiconductor-device architectures (bipolar, MOS). The final chapters are devoted to the description of some basic fabrication steps, and to measuring methods for the semiconductor-device parameters.

Gazzetta Ufficiale Routledge

The driving cultural force of that form of life we call 'modern' is the desire to make the world controllable. Yet it is only in encountering the uncontrollable that we really experience the world – only then do we feel touched, moved and alive. A world that is fully known, in which everything has been planned and mastered, would be a dead world. Our lives are played out on the border between what we can control and that which lies outside our control. But because we late-modern human beings seek to make the world controllable, we

tend to encounter the world as a series of objects that we have to conquer, master or exploit. And precisely because of this, 'life,' the experience of feeling alive and truly encountering the world, always seems to elude us. This in turn leads to frustration, anger and even despair, which then manifest themselves in, among other things, acts of impotent political aggression. For Rosa, to encounter the world and achieve resonance with it requires us to be open to that which extends beyond our control. The outcome of this process cannot be predicted, and this is why moments of resonance are always concomitant with moments of uncontrollability. This short book – the sequel to Rosa's path-breaking work on social acceleration and resonance – will be of great interest students and scholars in sociology and the social sciences and to anyone concerned with the nature of modern social life.

The Italian Risorgimento Polity

The Unification of Italy in the nineteenth century was the unlikely result of a lengthy and complex process of Italian 'revival' ('Risorgimento'). Few Italians supported Unification and the new rulers

of Italy were unable to resolve their disputes with the Catholic Church, the local power-holders in the South and the peasantry. In this fascinating account, Martin Clark examines these problems and considers: · The economic, social and religious contexts of Unification, as well as the diplomatic and military aspects · The roles of Cavour and Garibaldi and also the wider European influences, particularly those of Britain and France · The recent historiographical shift away from uncritical celebration of the achievement of Italian unity. Did 'Italian Unification' mean anything more than traditional Piedmontese expansionism? Was it simply an aspect of European 'secularisation'? Did it involve 'state-building', or just repression? In exploring these questions and more, Martin Clark offers the ideal

introductory account for anyone wishing to understand how modern Italy was born. This new edition has been revised in the light of recent research and now has a greater emphasis on the 'losers' of the conflict, the impact of Unification on the South, and the complexity of the political realities of the times. It has also been updated with useful additional material such as a Who's Who and a plate section to go alongside its carefully chosen selection of original documents.

The Forests of Norbio Sphere
Fascism and the racial laws of 1938 dramatically changed the scientific research and the academic community. Guarnieri focuses on psychology, from its promising origins to the end of the WWII. Psychology was marginalized in Italy both

by the neo-idealistic reaction against science, and fascism (unlike Nazism) with long-lasting consequences. Academics and young scholars were persecuted because they were antifascist or Jews and the story of Italian displaced scholars is still an embarrassing one. The book follows scholars who emigrated to the United States, such as psychologist Renata Calabresi, and to Palestine, such as Enzo Bonaventura. Guarnieri traces their journey and the help they received from antifascist and Zionist networks and by international organizations. Some succeeded, some did not, and very few went back.
