### Leveled Books (K-8) Firsthand Books

Encouragement, support, and specifics on putting whole language theory into practice--things that today's educators need. *Invitations* offers all of them, and Routman invites all teachers to reflect upon their teaching. She provides specific strategies for the daily management and educational issues that teachers struggle with in their efforts to make teaching more relevant for their students and themselves.

**The Reflective Educator's Guide to Professional Development** Heinemann Educational Books  
What happens when a bestselling nonfiction children's book author pairs up with a nationally known writing teacher to discuss revision strategies? Magic. Sneed B. Collard III and Vicki Spandel blow the roof off everything you thought you knew about teaching nonfiction writing and the purposes for revision. Dozens of strategy lessons pulled from Sneed's professional writing experience followed by Vicki's classroom-savvy tips and exercises give you the nuts and bolts of teaching revision to make nonfiction writing more meaningful, useful, and enjoyable for the reader. Using a "big-to-small" process of revision, from Big Picture ideas down to individual words, Sneed and Vicki demystify revision and help students become clear, persuasive, compelling-even entertaining-writers. "With your encouragement and guidance," they write, "students will discover the joy of turning their first rough ideas into something readers cannot put down."

### Elevating Equity and Justice ASCD

What if... Every year, beloved teacher and author Debbie Miller commits to trying something new. She asks a "beautiful question" that pushes her to see new possibilities and put children at the center of her teaching. She asks, "What if we did it this way?" "When we do, we're present in our teaching," she says. "We're strong enough to set aside judgment and discomfort and choose to focus on how to make things better." In *What's the Best That Could Happen?*, Debbie confronts a challenge all teachers face: the feeling of being stuck and the fear of trying something new. She explores how questions help us look beyond the limitations of what we've done and discover powerful new opportunities for teaching and learning. Each chapter digs into a question about teaching from Debbie's work with teachers and children across the country: What if each day's teaching focused on children's agency? What if we made what children make and do our priority? What if our classroom environment and routines offered choice? What if we owned the units we're asked to teach? What if read aloud sustained children's independent thinking? You'll find practical insights and critical understandings that will benefit you and your children. More importantly, you'll learn to ask your own beautiful questions, grapple with the messiness that surfaces, and find answers that inspire something new and worthy in your teaching.

"Writing allows each of us to live with that special wide-awakeness that comes from knowing that our lives and our ideas are worth writing about." -Lucy Calkins  
*Teaching Writing* is Lucy Calkins at her best--a distillation of the work that's placed Lucy and her colleagues at the forefront of the teaching of writing for over thirty years. This book promises to inspire teachers to teach with renewed passion and power and to invigorate the entire school day. This is a book for readers who want an introduction to the writing workshop, and for those who've lived and breathed this work for decades. Although Lucy addresses the familiar topics--the writing process, conferring, kinds of writing, and writing assessment--she helps us see those topics with new eyes. She clears away the debris to show us the teeny details, and she shows us the majesty and meaning, too, in these simple yet powerful teaching acts. Download a sample chapter for more information.

### The Heinemann Science Scheme Heinemann Educational Books

"Textured Teaching is a framework for teaching and learning about texts, centered in love and social justice. The term social justice refers to a redistribution of resources, opportunities, wealth, and power that promotes equity. A teaching approach that strives for social justice, then, is one that openly addresses social injustices and functions in a way that leads students to reimagine an equitable redistribution. Our framework is built upon the values that a Textured Teacher must hold. The strategies we use to bring those values to life are the traits of Textured Teaching. Therefore, a thoughtful and intentional implementation of Textured Teaching leads to social justice work"--

### Invitations Heinemann Educational Books

"This book, and the accompanying videos, provides teachers with both the why and the how-to information so that they are able to support vocabulary development, across the school day, in their K-3 classrooms"--

The "Heinemann Science Scheme" offers an approach to the QCA's Scheme of Work. Teacher's resource packs provide support with lesson planning, with each chapter matching the Scheme of Work, and in-built assessment. The scheme aims to improve on the Scheme of Work by building in progression and a comprehensive revision programme to help prepare pupils for their National Tests. It also aims to make the Scheme of Work accessible to all pupils. The scheme builds on what students already know, following on from the Scheme of Work at Key Stages 1 and 2. It takes into account what pupils already know at the start of Key Stage 3 and builds from there. The "Heinemann Science Scheme" is also designed to build on the literacy and numeracy work pupils have done in primary schools.

Beat burnout with time-saving best practices for feedback For ELA teachers, the danger of burnout is all too real. Inundated with seemingly insurmountable piles of papers to read, respond to, and grade, many teachers often find themselves struggling to balance differentiated, individualized feedback with the one resource they are already overextended on—time. Matthew Johnson offers classroom-tested solutions that not only alleviate the feedback-burnout cycle, but also lead to significant growth for students. These time-saving strategies built on best practices for feedback help to

improve relationships, ignite motivation, and increase student ownership of learning. Flash Feedback also takes teachers to the next level of strategic feedback by sharing: How to craft effective, efficient, and more memorable feedback Strategies for scaffolding students through the meta-cognitive work necessary for real revision A plan for how to create a culture of feedback, including lessons for how to train students in meaningful peer response Downloadable online tools for teacher and student use Moving beyond the theory of working smarter, not harder, Flash Feedback works deeper by developing practices for teacher efficiency that also boost effectiveness by increasing students' self-efficacy, improving the clarity of our messages, and ultimately creating a classroom centered around meaningful feedback.

#### *Teaching Writing in Small Groups* Heinemann Educational Books

Teaching our children to think and reason mathematically is a challenge, not because students can't learn to think mathematically, but because we must change our own often deeply-rooted teaching habits. This is where instructional routines come in. Their predictable design and repeatable nature support both teachers and students to develop new habits. In *Teaching for Thinking*, Grace Kelemanik and Amy Lucenta pick up where their first book, *Routines for Reasoning*, left off. They draw on their years of experience in the classroom and as instructional coaches to examine how educators can make use of routines to make three fundamental shifts in teaching practice: Focus on thinking: Shift attention away from students' answers and toward their thinking and reasoning Step out of the middle: Shift the balance from teacher-student interactions toward student-student interactions Support productive struggle: Help students do the hard thinking work that leads to real learning With three complete new routines, support for designing your own routine, and ideas for using routines in your professional learning as well as in your classroom teaching, *Teaching for Thinking* will help you build new teaching habits that will support all your students to become and see themselves as capable mathematicians.
