... Customs and Customary Law in

British India Frontiers Media SA

This book constitutes the refereed proceedings of the 4th International COST 237 Workshop, held in Lisboa, Portugal, in December 1997 of the European COST Programme on Multimedia Telecommunication Services. The 12 revised full papers presented were selected from 24 submissions. The topics covered include multimedia presentation, QoS Control, electronic commerce, CORBA and DCE, real-time multimedia, multimedia conferencing, multicast networking, heterogeneous communications environments, and

others.

Nuclear Science Abstracts Frontiers Media SA

This book constitutes the thoroughly refereed proceedings of the 7th International Conference on Mathematics and Computation in Music, MCM 2019, held in Madrid, Spain, in June 2019. The 22 full papers and 10 short papers presented were carefully reviewed and selected from 48 submissions. The papers feature research that combines mathematics or computation with music theory, music analysis, composition, and performance. They are organized in topical sections on algebraic and other abstract mathematical approaches to understanding musical objects; re-managing Riemann: mathematical music theory as “experimental philosophy”?; octave

division; computer-based approaches to composition and score structuring; models for music cognition and beat tracking; pedagogy of mathematical music theory. The chapter “Distant Neighbors and Interscalar Contiguities” is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The Law Reports of Palestine Frontiers Media SA

This Research Topic is the second volume of the “Community Series in Novel Biomarkers for Predicting Response to Cancer Immunotherapy”. Please see Volume I here. Immunotherapy has revolutionized the treatment of malignancies. Targeting of immune checkpoints cytotoxic T-lymphocyte-associated protein 4, programmed cell

death protein 1 (PD-1) and its ligand (PD-L1) has led to improving survival in a subset of patients. Despite their remarkable success, clinical benefit remains limited to only a subset of patients. A significant limitation behind these current treatment modalities is an irregularity in clinical response, which is especially pronounced among checkpoint inhibition. Currently, relevant predictors of cancer immunotherapy response include microsatellite instability-high/deficient mismatch repair (MSI-H/dMMR), expression of PD-L1, tumor mutation burden (TMB), immune genomic characteristics, and tumor infiltrating lymphocytes (TILs). However, none of them have sufficient evidence to be a stratification factor. Moreover, as the combined strategies for effective cancer immunotherapy had been developed in multiple tumors, such as Immunotherapy combined with chemotherapy, radiotherapy, targeted therapy and anti-angiogenesis therapy. Therefore, the development of novel biomarkers endowed with high sensitivity, specificity and accuracy able to identify which patients may truly benefit from the treatment with cancer immunotherapy would allow to refine the therapeutic selection and to better tailor the treatment strategy. This research topic aims to focus on the advances in the discoveries of novel biomarkers for predicting response to cancer immunotherapy in various tumors. We welcome the submission of original research and review articles that include biomarkers in clinical study and applications, as well as technologies or discoveries in experimental approaches.

Methods in thoracic oncology Springer Science & Business Media

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Scientific and Technical Aerospace Reports Frontiers Media SA

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious

INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

The Monthly Army List Frontiers Media SA

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1976.

Indian Cases Springer Science & Business Media

Vols. 1-36, 1914-1949, 1999- issued in separate parts, called sections, e.g. Journal section, Federal Court section, Privy Council section, Allahabad section, Bombay section, etc.

Bloomsbury's eBooks are protected using Digital Rights Management (DRM). As such, it is not possible to copy or print this eBook, nor will it be accessible with an Adobe ID other than your own. "...an institution for those who practise public law...it has the authority that comes from being compiled by an author of singular distinction". (Lord Woolf, from the Foreword to the Fifth Edition) The new edition of this Handbook remains an indispensable source of reference and a guide to the case-law in judicial review. Established as an essential part of the library of any practitioner engaged in public law cases, it offers unrivalled coverage of administrative law, including, but not confined to, the work of the Administrative Court and its procedures. Once again completely revised and updated, the seventh edition approximates to a restatement of the law of judicial

review, organised around 63 legal principles, each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations. It also includes essential procedural rules, forms and guidance issued by the Administrative Court. As in the previous edition, both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case-law. Attention is also given to impact of the Supreme Court. Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review, and assesses the signs from a Court that will be one of the key influences in the development of judicial review in the modern era. The author, a leading member of the English public law bar, and now has been involved in many of the leading judicial review cases in recent years and is the founding editor of the *Judicial Review* journal.

Final New Course Frontiers Media SA

The two previous editions of *Applied Physiology in Intensive Care Medicine* proved extremely successful, and the book has now been revised and split into two volumes to enhance ease of use. This first volume comprises three elements -- "physiological notes," "technical notes," and seminal studies. The physiological notes concisely and clearly capture the essence of the physiological perspectives underpinning our understanding of disease and response to therapy. The technical notes then succinctly explain some of the basics of "how to" in this technology-centered field of critical care medicine. Finally, a number of seminal studies are provided on diverse topics in intensive care. *Applied Physiology in Intensive Care*, written by some of the most renowned experts in the field, is an up-to-date compendium of practical bedside knowledge that will serve the clinician as an invaluable reference source on key issues regularly confronted in everyday practice.

Published monthly, this journal monitors developments in planning law, environmental law, compulsory purchase and related issues. The journal is a forum for debate in planning and associated areas. It includes current topics, articles, Parliamentary and Departmental news and case law reports

The Tax Reform Act of 1984 Frontiers Media SA

The brand new title that sets out the law and practice of planning applications, appeals and challenges, particularly focussing on: -The need for planning permission and the concept of development -Permitted development rights -Applying for planning permission and the consideration of applications by local authorities -Planning appeals -The role of the Secretary of State and the Welsh Ministers -Planning permission granted by development orders Dealing with why planning permission is needed, how it is obtained by permitted development, planning applications and orders, this essential new title begins with the concept of development, the need for planning permission and permitted development rights. Planning applications are then considered at the local authority, appeal and call-in stages, with advice provided for developers, local authorities, interest groups and residents, setting out clearly how each can be involved in the process. High Court challenges are considered thoroughly. Finally, complex questions regarding the interpretation and implementation of each area of this process are discussed. What does it include? Planning Permission analyses the legal rules and caselaw, including the 2015 orders. Practical advice is given on making and responding to applications, dealing with planning committees, Ministerial interventions, appeals and call-ins. The operation of the Planning Court is also addressed from the practitioner's perspective. Helpful appendices include the relevant parts of the Town and Country Planning Act 1990, the Development Management Procedure Order 2015, the General Permitted

Development Order 2015, the Use Classes Order and the appeal rules and regulations. Contents: 1 Outline of the planning system and underlying principles; 2 The meaning of development; 3 The Use Classes Order; 4 The need for planning permission; 5 Permitted development rights; 6 Planning applications; 7 Environmental Impact Assessment; 8 Determining planning applications; 9 Material Considerations 10 London; 11 Planning conditions; 12 Planning Obligations; 13 The issue of planning permission; 14 Planning permission for variations and retrospective consents: Section 73 and 73A; 15 Non-material variations; 16 Reserved matters and approval of details under conditions; 17 Call-ins and the role of Ministers; 18 Planning applications made to Ministers; 19 Planning Appeals – preliminaries and tactics; 20 Householder and minor commercial appeals; 21 Written representations; 22 Hearings; 23 Inquiries; 24 The appeal decision and costs; 25 High Court challenges; 26 Other means of obtaining planning permission – development orders, deemed planning permission and Simplified Planning Zones; 27 Community Infrastructure Levy; 28 Interpretation of planning permission; 29 Implementation

Innovations in Surgical Oncology

Cambridge University Press

This book constitutes the refereed proceedings of the Workshops and Symposiums of the 15th International Conference on Algorithms and Architectures for Parallel Processing, ICA3PP 2015, held in Zhangjiajie, China, in November 2015. The program of this year consists of 6 symposiums/workshops that cover a wide range of research topics on parallel processing technology: the Sixth International Workshop on Trust, Security

and Privacy for Big Data, TrustData 2015; the Fifth International Symposium on Trust, Security and Privacy for Emerging Applications, TSP 2015; the Third International Workshop on Network Optimization and Performance Evaluation, NOPE 2015; the Second International Symposium on Sensor-Cloud Systems, SCS 2015; the Second International Workshop on Security and Privacy Protection in Computer and Network Systems, SPPCN 2015; and the First International Symposium on Dependability in Sensor, Cloud, and Big Data Systems and Applications, DependSys 2015. The aim of these symposiums/workshops is to provide a forum to bring together practitioners and researchers from academia and industry for discussion and presentations on the current research and future directions related to parallel processing technology. The themes and topics of these symposiums/workshops are a valuable complement to the overall scope of ICA3PP 2015 and give additional values and interests.
