This book is an attempt to present the inside story of the Telangana movement that developed due to historical reasons. The movement, in this work, has brought forward the Telangana lower class's response to the established cultural hegemony of the Andhra linguistic elite and affluent agrarian communities who, in their perception, monopolized the political power and economic resources. The movement voices the democratic yearnings of service castes, artisans, Dalits and nomads who through their instant association with the movement expressed

aspirations for their due share in political power and administrative structure. The leadership that has come from the regional elite has, however, articulated only the reasons of 'self-respect and regional autonomy'. This work brings out the two-fold character in the movement. It also gives insights into the possible need of remaking states in India in the interest of the inclusion of these social groups in political structures so that democracy might further percolate downwards. This book is co-published with Aakar Books. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan)

No panorama complexo da sociedade indiana, esta pesquisa abrangente examina a interseção crucial entre a política pública de educação superior e o sistema de reservas (cotas) na Índia, partindo da perspectiva de o país ser emoldurado por vários elementos identitários e marcadores de diferenças, dentre os quais se destacam a cultura, a religiosidade, as tradições e, em especial, o regime de castas. Nesse vasto ambiente de experiências sociais, políticas e religiosas, a política educacional e a política de reservas de vagas voltadas para o ingresso no ensino superior e para acesso ao mercado de trabalho são dois importantes vetores, que se entrelaçam de tal modo, em dependência, intensidade e influência, que é praticamente

impossível estudá-los isoladamente. A investigação quanto à relação que se formou entre essas políticas públicas tem o objetivo de estabelecer se elas favoreceram o desenvolvimento social e econômico do país e se contribuíram para a elevação e o aperfeiçoamento do nível existencial das pessoas, com a qualificação do desenvolvimento humano no contexto do cenário internacional atual.

Rarely do Indian environmental discourses examine nature through the lens of caste. Whereas nature is considered as universal and inherent, caste is understood as a constructed historical and social entity. Mukul Sharma shows how caste and nature are intimately connected. He compares Dalit meanings of environment to ideas and practices of neo-Brahmanism and certain mainstreams of environmental thought. Showing how Dalit experiences of environment are ridden with metaphors of pollution, impurity, and dirt, the author is able to bring forth new dimensions on both environment and Dalits, without valourizing the latter's standpoint. Rather than looking for a coherent understanding of their ecology, the book explores the diverse and rich intellectual resources of Dalits, such as movements, songs, myths, memories, and metaphors around nature. These reveal their quest to define themselves in caste-ridden nature and building a form of environmentalism free from the burdens of caste. The Dalits also pose a critical challenge to Indian environmentalism, which has, until now, marginalized such linkages between caste and nature.

The International Conference on Emerging Trends in Engineering,

Science and Technology (ICETEST) was held at the Government Engineering College, Thrissur, Kerala, India, from 18th to 20th January 2018, with the theme, “Society, Energy and Environment”, covering related topics in the areas of Civil Engineering, Mechanical Engineering, Electrical Engineering, Chemical Engineering, Electronics & Communication Engineering, Computer Science and Architecture. Conflict between energy and environment has been of global significance in recent years. Academic research needs to support the industry and society through socially and environmentally sustainable outcomes. ICETEST 2018 was organized with this specific objective. The conference provided a platform for researchers from different domains, to discuss and disseminate their findings. Outstanding speakers, faculties, and scholars from different parts of the world presented their research outcomes in modern technologies using sustainable technologies.

The *Sociology of Greed* examines crises in financial institutions such as banks from the vantage point of the greed of the people at their helm. It offers an intensive analysis of the banking crises under the conditions of colonial capitalism in early twentieth-century Bengal that led to institutional and social collapse. Breaking new ground, the book looks at the moral economy of capitalism and money culture by focusing on the victims of banking crises, hitherto unexplored in Western empirical research. Through sociological analyses of political economy, it seamlessly combines archival records, survey and statistical data with literary narratives, realist fiction and performing arts to recount how the greed of bank owners and managers ruined their

institutions as well as common people. It argues that greed turns perilous when the state and the market facilitate its agency, and it examines the contexts and histories, the indifference of the fledgling colonial state, feeble political response, and the consequences for those who were impacted and the losses, especially the refugees, the lower-middle class and women. The volume also re-composes relevant elements of Western sociological scholarship from classical theories to early twenty-first-century financial sociology. An insightful account of the social history of banking in India, this book will greatly interest researchers and scholars in sociology, economics, history and cultural studies.

Chrystia Freeland kennt die Welt der Globalmilliardäre: Zwei Jahrzehnte lang hat sie die neuen Supereliten begleitet und erforscht. Dadurch kann sie einzigartige Einblicke in die Welt der Superreichen liefern, die sich ansonsten lieber abschotten und unerkannt bleiben wollen. Vor allem aber macht sie die gesellschaftlichen Konsequenzen dieses Superreichtums deutlich:

Banken, die ihre Angebote an den internationalen Milliardären ausrichten und nicht mehr am nationalen "Rest"; Oligarchen, die die Schaltstellen der Macht für den eigenen Profit manipulieren; Banker, die sich ihre Geburtstagsfeiern 2,5 Millionen Euro kosten lassen. Dass sich die Plutokraten aller Kontrolle entziehen, ist zum einen eine folgenschwere Konsequenz des Kapitalismus, zum anderen wird diese Entwicklung die Zukunft prägen. Chrystia Freeland betritt mit ihrem Buch Neuland und zeigt uns die bislang geheime Welt der globalen superreichen Geldelite.
