This is the story of the Selous Scouts Regiment of Rhodesia, which was formed in 1973 and abolished without benefit of formal disbandment, when Robert Mugabe's ZANU-PF took power after the British supervised elections in 1980. Its purpose on formation was the clandestine elimination of ZANLA and ZIPRA guerrillas, both within and outside Rhodesia. Their success in this field can be gauged by the fact that Combined Operations Rhodesia, officially credited them with either directly or indirectly being responsible for the deaths of 68% of all guerrillas killed within Rhodesia during the war - losing less than 40 Selous Scouts in the process.

 This third edition, like the first and second, strikes a balance between the theory of the law of evidence and its practical application in a constitutional issues, the impact of these sections on the Anglo-South African law of evidence, and the extent to which some of them may be subject to constitutional challenges.

Stock is also taken of the provisions of the Electronic Communications and Transactions Act 25 of 2002 and the consequences of the repeal of s 66 of the Internal Security Act 74 of 1982.

 The second edition of this successful and widely recognized textbook again focuses on discrete topics. The author recognizes two distinct paths of study and careers of actuarial science and financial engineering. This text can be very useful as a common core for both. Therefore, there is substantial material on the theory of interest (the first half of the book), as well as the probabilistic background necessary for the study of portfolio optimization and derivative valuation (the second half). The

material in the first two chapters should go a long way toward helping students prepare for the Financial Mathematics (FM) actuarial exam. Also, the discrete material will reveal how beneficial it is to know more about loans in student's personal financial lives. The notable changes and updates to this edition are itemized in the Preface, however, overall, the presentation has been made more efficient. One example is the chapter on discrete probability, rather unique in its emphasis on giving the deterministic problems studied earlier a probabilistic context. Probably is now a subsection on Markov chains. Sample spaces and probability measures, random variables and distributions, expectation, conditional probability, independence, and estimation all follow. Optimal portfolio selection coverage is reorganized and the section on the practicalities of stock transactions has been revised. Market portfolio, and Capital Market Theory coverage is expanded. This book, like the first edition, was written so that the print edition could stand alone. At times we simplify complicated algebraic expressions, or solve systems of linear equations, or numerically solve non-linear equations. Also, some attention is given to the use of computer simulation to approximate solutions to problems. A course in multivariable calculus is not required. The entire text is available digitally from the publisher in the form of a series of Mathematica notebooks, which can be loaded into Mathematica, and which include complete executable commands and programs, and some additional material.

Ways of Dying tells the story of the eccentric but dignified professional mourner, Toloki. His odyssey takes him from a rural village community to the shabby, vibrant outskirts of a contemporary South African city, where the tenderness that springs up between him and the beautiful and tragic Noria helps them to heal the past. By turns magical, brutal, and funny, this compelling work is a major new contribution to South African writing.

In both paid and unpaid work contexts adults learn powerfully from their experiences. In this book, the authors argue that this

should be the basis for a new perception of what is truly educational in life. Drawing on the works of Aristotle, Wittgenstein and Russell, along with contemporary conceptual work, they use both philosophical argument and empirical example to establish their view. This work will be of essential interest to philosophers of education and educational theorists worldwide. It will also interest teachers, trainers, facilitators, and all those with an interest in adult and vocational education.

"1968. Riga. News of the Prague Spring washes across Europe, causing ripples on either side of the Iron Curtain. A young Estonian woman has agreed to pose as a model for a famous, sculptor, who is trying to evade military service and escape to the West. Although the model has only a vague awareness of politics -- her interest in life is primarily poetic -- the consequences of the politics of both past and present repeatedly make themselves felt. Chance remarks overheard prompt memories of people and places, language itself becomes fluid, by turns deceptive and reassuring. The Beauty of History is a novel of poetic intensity, of

fleeting moods and captured moments. It is powerfully evocative of life within the Baltic States during the Soviet occupation, and of the challenge to artists to express their individuality whilst maintaining at least an outward show of loyalty to the dominant ideology. Written on the cusp of independence, as Estonia and Latvia sought to regain their sovereignty in 1991, this is a novel that can be seen as an historic document -- wistful, unsettling, and beautiful"--Back cover.
