A unique exploration of the history of the bicycle in cinema, from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films. *Cycling and Cinema* explores the history of the bicycle in cinema from the late nineteenth century through to the present day. In this new book from Goldsmiths Press, Bruce Bennett examines a wide variety of films from around the world, ranging from Hollywood blockbusters and slapstick comedies to

documentaries, realist dramas, and experimental films, to consider the complex, shifting cultural significance of the bicycle. The bicycle is an everyday technology, but in examining the ways in which bicycles are used in films, Bennett reveals the rich social and cultural importance of this apparently unremarkable machine. The cinematic bicycles discussed in this book have various functions. They are the source of absurd comedy in silent films, and the vehicles that allow their

owners to work in sports films and social realist cinema. They are a means of independence and escape for children in melodramas and kids' films, and the tools that offer political agency and freedom to women, as depicted in films from around the world. In recounting the cinematic history of the bicycle, Bennett reminds us that this machine is not just a practical means of transport or a child's toy, but the vehicle for a wide range of meanings concerning individual

identity, social class, nationhood and belonging, family, gender, and sexuality and pleasure. As this book shows, two hundred years on from its invention, the bicycle is a revolutionary technology that retains the power to transform the world.

Blindfolded. Alone. No idea where you are or what will happen next. The only thing you know is that you've been kidnapped. And it's up to

you to escape. Are you brave enough?
Varjak Paw HarperCollins Children's Books
The author recounts his experiences on the lucrative Wall Street bond market of the 1980s, where young traders made millions in a very short time, in a humorous account of greed and epic folly.

Alarms and Discursions
John Benjamins Publishing
It began with a key. One afternoon in 1956, in the home of the Hitchings family in Battersea, south London, a small silver key

appeared on Shirley Hitchings' bed. This seemingly insignificant event heralded the beginning of one of the most terrifying, incredible and mysterious hauntings in British history. The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to

make simply incredible claims about his identity, insisting that he was one of the most famous figures in world history – but what was the truth? Here, for the first time, is the full story, told by the woman right at the heart of it all – Shirley herself.

Spaced Out Capstone Classroom

Grammar is seen as a complex sign system, and, as a consequence, grammatical change always comprises semantic change. The book introduces the concept of connecting

grammaticalisation to describe the formation, restructuring and dismantling of such complex paradigms. It offers a broad general discussion of theoretical issues and three case studies

"Tafari's work is probably the most innovative and exciting new form of European theory since French poststructuralism and this book is probably the best introduction to it for the newcomer. ..."

The Poltergeist Prince of London Routledge

This is a bank of ideas designed to help teachers to develop the writing of primary-school pupils. It is concerned mainly with the

compositional aspects of writing, rather than spelling, handwriting and punctuation, and consists of five main sections, dealing with writing stories and poems, writing for information, writing from reading, writing from personal experience, and redrafting and proof-reading.

The Dandelion Celebration
The History Press

A collection of witty, irreverent essays on subjects running the gamut from the space program to airport bans on smoking are included

in this anthology. Written by Spider Robinson, *The Crazy Years* takes its name from Robert A. Heinlein's designation of the last years of the 20th century and contains essays from Robinson's tenure as op-ed columnist for *The Globe and Mail* and from *Galaxy Online*. Environmentalists that place the survival of earth before the survival of humanity, the idiocy of computer designs, and the downsides of the Internet are among the subjects Robinson uses to take the world to task.

Critical Expressivism

Nelson Thornes

"First published in 1993 by Nethuen Children's Books, London, United Kingdom."--Colophon.

The Bean Machine Zed Books

A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the

world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at

Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

The Foolish Fox

Bloomsbury Publishing

For years, serious researchers have known that triangular-shaped UFOs are one of the most common types observed. The phenomenon has sparked intense debate

among many and excited the imagination of many others. But until now, there has never been a book-length treatment of this fascinating subject. Finally, we have one. David Marler has provided a comprehensive analysis of "the triangles." He has collected, collated, and analyzed hundreds of reports. In the process, he has created a detailed profile of these objects and written a rich narrative of their history. Marler is well-suited to the task, having at his disposal an

enormous collection of newspaper archives, declassified military reports, UFO books and journals, and the transcripts of many first-hand interviews he has conducted. He has also received input from many prominent individuals from within the military, FAA, Aerospace, and UFO research field. He tackles the arguments made by skeptics that dismiss these triangular UFO reports outright. He also address the claims of so-called insiders who claim these objects are a

creation of the U.S. military. The results of his years of research are documented in his book, *Triangular UFOs: An Estimate of the Situation*. It is a book that has long been needed, not only by the UFO research community, but the general public, as it opens up an entirely new discussion that has long been ignored: who is making the triangles? *Incredible Wild Edibles* Createspace Independent Publishing Platform Each chapter focuses on a geological formation the

group descends through, but plant and animal life, ecology, human impacts, and the students' experience and learning are all tightly woven into Gordon's reflections and storytelling, which create a powerful documentation and celebration of place and the evolutions that occur when human beings connect intimately to their surroundings."--BOOK JACKET.
