Ever wondered what goes on inside the cockpit of a passenger plane? Ever wanted to know how a jet engine works or what happens if a plane is struck by lightning? Behind the Flight Deck Door provides insider knowledge about everything you have ever wanted to ask a pilot! Since 9/11, flight decks of modern airliners have become off-limits to the flying public. This is despite the fact every year more people take to the skies than ever before. Pilot Brett Manders wants to help you become a savvy traveller by providing insider tips, expert knowledge, and an understanding of what goes on behind the scenes to get you up in the air. All told with a dash of humor, this book will demystify the art of airline travel, address those urban legends, and settle the nerves of any anxious flyers. Simple, concise explanations cover a multitude of things passengers have asked Brett and his colleagues over the years. What is a small technical delay? Can the cabin door be opened mid-flight? How much do pilots really earn and do they

get free flights? Can you get stuck to the toilet? Is it still possible to view the flight deck? Brett Manders is a pilot with an Australian Airline. He has over 10,000 hours flying experience on Airbus A320, A321, A330 and Boeing B787 Dreamliner aircraft. Praise for Behind the Flight Deck Door "Brett's uncomplicated, honest, and easy to understand book is a welcome addition on any flight. It offers an enlightening point of view of the all-important necessity of air travel with rare glimpses of the secret world airline pilots inhabit." JULIE POSTANCE, AUTHOR, BREAKING THE SOUND BARRIERS "I really enjoyed reading this as it is an easy read, and really relatable and quite entertaining. As a nervous flyer myself it was quite interesting and reassuring to read all the different things that go on behind the scenes and learn about the ins and outs of flying." SARAH EMERSON, NERVOUS FLYER "This book has so much valuable knowledge that every passenger wants to know and ask. So many things about aircraft, airlines and airports are such a mystery to many people, it is nice to have it explained in simple terms. After reading, I feel lots of little things that bothered me have been put in perspective and it has helped my fear of flying significantly. Behind the Flight Deck Door is a must have book for anyone who travels on airlines!" NISHA SHARMA, NERVOUS FLYER

"William Henry Tunner (July 14, 1906 - April 6, 1983) was a general officer in the United States Air Force and its predecessor, the United States Army Air Forces. Tunner was known for his expertise in the command of large-scale military airlift operations, first in Air Transport Command (ATC) during World War II, commanding The Hump operation, and later in Military Air Transport Service (MATC) during the Berlin Airlift in 1949-1951. He eventually rose to the rank of Lieutenant general and commanded MATC itself."--Wikipedia, 10 November 2020, [https://en.wikipedia.org/wiki/William\\_H.\\_Tunner](https://en.wikipedia.org/wiki/William_H._Tunner)

"Like the A-10 aircraft she flew in combat, retired colonel and fighter pilot Martha McSally is a gritty individual who loves our Air Force and personified its core values of excellence, integrity, and service before self, while standing up to make it a better institution for everyone who serves. How to be resolute, do the right thing, persevere, find gratitude, and learn compassion are just some of the lessons in her inspirational life story." —Ron FOGLEMAN, General (ret.), U.S. Air Force; former Air Force Chief of Staff Combining the soulful honesty of *Make Your Bed* with the inspiring power of *You Are a Badass*, America's first female combat jet pilot and Arizona Senator Martha McSally shows you how to clear the runway of your life: embrace fear, transform doubt, succeed when you are expected to fail, and soar to great heights in this motivational life guide. Martha McSally is an extraordinary achiever whose inner strength and personal principles have helped her overcome adversity throughout her life. Initially rejected from Air Force flight school because she was

too short, she refused to give up, becoming the first female fighter pilot to fly in combat and the first to command a combat fighter squadron in United States history. During her twenty-six-year military career, she fought to free American servicewomen stationed in the Middle East from restrictions requiring them to don full-body, black abayas and ride in the backs of cars – and won. McSally has continued to serve America, first in the House of Representatives, and now as a U.S. Senator from Arizona. McSally is also a survivor. She shares how her experiences propelled her to become a fighter for justice in and out of the cockpit. In this powerful, uplifting book, McSally reflects on her successes and failures, shares key principles that have guided her, and reveals invaluable lessons to break barriers, thrive through darkness, and make someone proud in your life.

"Courage isn't magic or genetics. It is a choice. By choosing to do things afraid, you discover your own power to overcome." Filled with fresh stories and insights, *Dare to Fly* will help each of us find the courage inside to break our barriers, endure turbulence, and keep flying high.

This book is a memoir of 50 years flying helicopters in a variety of situations. Included are rescues, combat operations, mountain and off-shore flying, medical evacuations, flight instruction and numerous flight missions that require pushing the flight envelope to the maximum. Highlighted are Ben Van Etten's five years as a flight captain with Air America, Inc. in Thailand and the unpublicized war in Laos. During that period the author describes in detail his interaction with other pilots and his "customers," primarily the CIA. The book also includes geographical and historical observations from a first person perspective. And a vivid description from inside the cockpit during many lifesaving missions. This book should tweak the interest of aviators and non-aviators alike.
