The Man of Jasmine Walter de Gruyter GmbH & Co KG

This book studies the relationship between institutionalism and schizophrenia in the lives of mental patients. The authors observed schizophrenic patients in three different mental hospitals over a period of eight years. Their conclusions are important for the better management of institutions and for the future of extra-mural mental health services. The lives of long-term schizophrenic patients are strictly limited by their institutionalised environments, which often produce negative effects. For example, patients are especially vulnerable to social understimulation, reacting with apathy and withdrawal. On the positive side, symptoms such as delusions and hallucinations may actually decrease during institutionalisation. The interesting approach to the positive and negative effects of institutionalisation on schizophrenics will give this book a wide readership in psychiatry, social psychology and the social sciences as well as among social workers, nurses and occupational therapists.

Dieser Ratgeber richtet sich an Angestellte, Beamte, Arbeiter, Rentner, Studenten und Familien, die sich zum ersten Mal mit der Erstellung einer Einkommensteuererklärung beschäftigen oder das Einkommensteuerrecht und dessen steuerliches Einsparpotential besser verstehen wollen. Neben

Dieser Ratgeber soll Ihnen dabei helfen, den Überblick über das Einkommensteuerrecht 2023 zu erlangen. Im ersten Teil des Ratgebers werden die Grundzüge des Einkommensteuerrechts erläutert. Der zweite Teil beschäftigt sich detailliert Schritt für Schritt mit dem Ausfüllen der steuerlichen Papierformulare. Das Ziel dieses Praxisratgebers bildet der Spagat zwischen verständlicher Ratgeberliteratur für den jährlichen Gebrauch durch Steuerpflichtige einerseits und der vertieften Darstellung steuerrechtlicher Probleme mit der dazugehörigen Rechtsprechung andererseits.

This book mounts a critique of current health economics, arguing it has been too dominated by the economics of health care and has largely ignored the impact of poverty, inequality, and lack of education on health. The author proposes a form of collective decision making through communitarianism as a basis for a new paradigm.

Who shapes our cities? In an age of increasing urban pluralism, globalization and immigration, decreasing public budgets, and an ongoing crisis of authority among designers and planners, the urban environment is shaped by a number of non-traditional stakeholders. The book surveys the kaleidoscope of views on the agency of urbanism, providing an overview of the various scholarly debates and territories that pertain to bottom-up efforts such as everyday urbanism, DIY urbanism, guerilla urbanism, tactical urbanism, and lean urbanism. Uniquely, this books seeks connections between the various movements by curating a range of views on the past, present, and future of bottom-up urbanism. The contributors also connect the recent trend of bottom-up efforts in the West with urban informality in the Global South, drawing parallels and finding contrast between social and institutional structures across the globe. The book appeals to urbanists in the widest sense of the word: those who shape, study, and improve our urban spaces.

Zurn's mental collapse was initiated when she encountered in the real world her childhood fantasy figure "the man of jasmine": he was the writer Henri Michaux, and her meeting him plunged her into a world of hallucination in which visions of her desires, anxieties and events from her unresolved past overwhelmed her present life. Her return to "reality" was constantly interrupted by alternate visionary and depressive periods.

Barbara Gordon's groundbreaking memoir tells the extraordinary story of a woman who has it all, or thinks she does—a career as an Emmy-award-winning documentary producer, a man she loves, a world of friends, and a beautiful apartment in Manhattan. But beneath the façade, Barbara's life is spinning out of control. In spite of the pills prescribed by her doctor, a nameless terror disrupting her daily life intensifies until she is besieged by crippling anxiety attacks. A formerly strong, independent, successful woman, Barbara's life becomes a nightmare of paralysis and fear. When Barbara finds herself unable to leave her apartment or walk the streets of New York alone, she decides to take charge of her life. She doesn't want pills, she wants answers. Instead of ending her fears, quitting the medicine leads to the unraveling of what she thought was her perfect life, and Barbara becomes a casualty of a flawed and inept mental health system. Barbara had often spoken for the voiceless in her films, but she suddenly finds herself powerless, without a voice of her own. Though she feels frightened and misunderstood, the tenderness and love of another young patient, Jim, helps Barbara rediscover her voice and her identity. In the years since her memoir was first published, thousands of readers all over the world have read her book, followed her descent into hell, traveled with her along the bumpy road to recovery, and celebrated as she creates a new life. *I'm Dancing As Fast As I Can* is a strikingly honest look at a life gone off the rails. Throughout her journey, Gordon's hope and strength make her an incredible heroine worth rooting for.

A curious ambiguity surrounds errors in professional working contexts: they must be avoided in case they lead to adverse (and potentially disastrous) results, yet they also hold the key to improving our knowledge and procedures. In a further irony, it seems that a prerequisite for circumventing errors

is our remaining open to their potential occurrence and learning from them when they do happen. This volume, the first to integrate interdisciplinary perspectives on learning from errors at work, presents theoretical concepts and empirical evidence in an attempt to establish under what conditions professionals deal with errors at work productively—in other words, learn the lessons they contain. By drawing upon and combining cognitive and action-oriented approaches to human error with theories of adult, professional, and workplace learning this book provides valuable insights which can be applied by workers and professionals. It includes systematic theoretical frameworks for explaining learning from errors in daily working life, methodologies and research instruments that facilitate the measurement of that learning, and empirical studies that investigate relevant determinants of learning from errors in different professions. Written by an international group of distinguished researchers from various disciplines, the chapters paint a comprehensive picture of the current state of the art in research on human fallibility and (learning from) errors at work.

Francisco Suárez is arguably the most important Neo-Scholastic philosopher and a vital link in the chain leading from medieval philosophy to that of the Renaissance and the Enlightenment. Long neglected by the Anglo-Saxon philosophical community, this sixteenth-century Jesuit theologian is now an object of intense scholarly attention. In this volume, Daniel Schwartz brings together essays by leading specialists which provide detailed treatment of some key themes of Francisco Suárez's philosophical work: God, metaphysics, meta-ethics, the human soul, action, ethics and law, justice and war. The authors assess the force of Suárez's arguments, set them within their wider argumentative context and single out influences and appraise competing interpretations. The book is a useful resource for scholars and students of philosophy, theology, philosophy of religion and history of political thought and provides a rich bibliography of secondary literature.

This WHO report co-funded by the European Commission gives an overview of policies and practices for mental health in 42 Member States of the European Region. A large majority of countries have made significant progress over the past few years, and several are world leaders in mental health promotion, mental disorder prevention activities, service reform and human rights. Nevertheless, this report also identifies weaknesses in Europe, some systematic, such as a lack of consensus on definitions, and of compatible data collection, and others such as the need for development and investment across several areas. It identifies gaps in information where further work must be done, and is a baseline against which progress can be measured towards the vision and the milestones of the Mental Health Declaration for Europe. The data were obtained from the ministries of health of 42 European Member States. Over 150 figures and tables in the report demonstrate the diversity across the European Region, and allow country to country comparisons of indicators such as numbers of psychiatrists, financing, community services, training of the workforce, the prescription of anti-depressants and representation of users and carers.
