The Neanderthal is
among the most
mysterious relatives of

Homo sapiens: Was he
a dull, club-swinging
muscleman, or a being
with developed social
behaviour and the
ability to speak, to plan
precisely, and even to
develop views on the
afterlife? For many, the
Neanderthals are an
example of primitive
humans, but new

discoveries suggest that this image needs to be revised. Half a million years ago in Ice Age Europe, there emerged people who managed to cope well with the difficult climate – Neanderthal Man. They formed an organized society, hunted Mammoths, and could make fire. They were able to pass on knowledge; they cared for the old and the handicapped, burying their dead, and placing gifts on their graves. Yet, they became extinct, despite their cultural abilities. This richly illustrated book, written for general audiences, provides a competent look at the history, living conditions, and culture of the Neanderthal. *The Impossible City* Lights Books

There have been many interpretations and predictions about the year 2012, known as the Mayan End Time--touted in everything from books to television commercials. But what do the Mayans themselves have to say about these prophecies? In *The Mayan Ouroboros*, the muchanticipated followup to his bestselling *Serpent of Light*, spiritual researcher Drunvalo Melchizdek reveals for the first time what Mayan elders have told him about this period. In this book he explains how to prepare for this transition to a new 13,000year cycle by

learning how to move out of our brain and into our hearts. He shares the Mayan insight of the importance of our heart connection to our survival and ability to thrive during these times. Plus *The Mayan Ouroboros* reveals: The untold positive side of the Mayan prophecies The Mayan End Timea sevenyear period of transition which began in 2007 The magnetic pole shift that is currently affecting humans around the world The new ways in which humans will begin to perceive and communicate in the world. Philosophie der Wildnis oder Die Kunst, vom Weg abzukommen

Schwartz & Wade

Für moderne Menschen ist die Natur etwas, das man ausbeutet oder das Erholung bietet, aber kein Ort, an dem man wohnt und sich selbstverständlich bewegt. Baptiste Morizot lädt dazu ein, sich in die Perspektive wilder Tiere hineinzudenken und sensibler zu werden für die Welt, die uns umgibt. Seine Streifzüge führen ihn durch die Heimat der Wölfe, der Leoparden und der Bären, doch auch den Stadtvögeln lassen sich Geheimnisse entlocken. Die Wildnis

ist überall. Wer ausgetretene Pfade verlässt und in die Natur eintaucht, wird verändert von seinem Abenteuer zurückkehren – als Grenzgänger zwischen zwei Welten.

In this revolutionary new study, G.R. Ledger applies the statistical methods of stylometry to a number of ancient authors. By taking as the set of variables the occurrence of particular letters of the

alphabet, Ledger comes far closer to being able to identify the works of particular authors than previous stylometric studies based on individual word counts. A preliminary analysis examines the work of several Greek authors of the fifth and fourth centuries B.C., and is followed by an extensive, detailed examination of the Platonic corpus. From this, Ledger draws new conclusions about the authenticity of the dubious dialogues and the chronology of the entire corpus.

The Mind and its Stories BookRix

"The emotionally charged debate pitting creationism against evolution has been swirling since the publication of Charles Darwin's *Origins of*

Species in 1859. The primary locus of controversy in the United States has been the courts, which have stepped in repeatedly to rule on the constitutionality of laws and policies regarding how each may be taught in the public schools. This fully updated anthology will inform readers about the history of the debate and bring philosophical clarity to the complex arguments on both sides."--BOOK JACKET.

Doctor Felix Hoffmann's life is textbook success: it's a life filled with medical work, televised soccer games, and the chill of German beer. Yet, when a former patient shows up dead by causes unknown, Hoffmann signs a death certificate that may be his own.

Curiosity and sheer medical devotion propel him to investigate. However, his autopsy order goes unfulfilled as the body is cremated and hospital records vanish. Soon, Hoffmann discovers a diagnosis of conspiratorial proportions.

Hal Bithes, Computer-Genie lehnt Philosophie vom Altertum bis in die Neuzeit ab. Er hält sie im Computer-Zeitalter für völlig überflüssig, hat aber noch Zweifel. Um seine Meinung zu bestätigen und die Zweifel auszuräumen lädt er Philosophie-Spezialisten mit ihren Partnern zu einem Seminar ein. Das Seminar findet im

Luxushotel einer Wüstenoase statt, von der niemand weiß, wo sie liegt. Bei der Ankunft werden die Gäste von einem arabisch gekleideten stattlichen Herrn empfangen, den alle für den Gastgeber halten. Er wird auch die Diskussionen leiten, bei denen es um Leben, Religionen, Sterben, Tod, Reinkarnation, Moral, Glück, Wissen, Liebe, Staat, Energie, Ernährung, Katastrophen und die Zukunft geht. Doch nichts läuft so ab wie es geplant war. Auch die Gäste sind mit Absichten angereist, die nicht das Philosophen Seminar betreffen. Dr. Klaus Böhnig, genannt Dr. Sokrat will Waffen an Regierungen und Rebellen verkaufen.

Antonio Versus, genannt Permeni ist an Erdölvorkommen interessiert. Pierre Seinét, genannt Layé sucht nach Endlagern für Atommüll. Terroristen, auf der Suche nach sicheren Verstecken, werden vom Geheimdienst aufgespürt. Noch hat Hal Bithes alles im Griff. Niemand kennt seine Kommandozentrale unter der Oase - kennt seine weltweite Macht. Und nur er weiß, was unter der Wüste verborgen liegt. Doch die Bedrohung naht. Man will Wasser in die Wüste leiten. Andere wollen riesige Solar-Anlagen bauen. Wie kann er solche Vorhaben verhindern? Er war doch auf alle möglichen Ereignisse vorbereitet, sogar auf eine nukleare

Katastrophe. - Oder geht alles zugrunde, was er erschaffen hat? - Was wird aus seiner Familie, seiner Pferdezucht, seinem Wirtschafts-Imperium? Die totale Überwachung des Hotels und der gesamten Oase hat ihm bisher die Sicherheit geboten, unerkannt seine Ziele zu verfolgen.

We humans have always possessed a deep curiosity about our origins and past. Indeed, as far back as 600 B.C. a Babylonian king excavated a temple floor laid 3,200 years before his time. Archaeology, to paraphrase Colin Renfrew, is a history of self-discovery, and for that reason it holds

attraction for all peoples and all cultures. The Cambridge Illustrated History of Archaeology exploits our fascination with our past. It tells the story of those explorations that have helped shape our knowledge of history-- from early digging in Greece and the Near East through the unearthing of sites in Europe to the archaeological finds of the Americas, Africa, and Australasia. It chronicles the development of archaeology from the crude fumbblings of early antiquaries to the sophisticated digs of the present day. The team of experts under the guidance of Paul Bahn attempts to strike a balance between spectacular discoveries, such as

the tomb of Tutankhamen, and the equally important progress of ideas. At the same time, they describe the often colorful roles of leading characters and set them against the social background of their times. It is hoped that many present and future general readers and amateur archaeologists will uncover much of interest in this book.

Paul Bahn is the author of many books about archaeology, including *The Bluffer's Guide to Archaeology* (1989) and *Archaeology: Theories, Methods and Practice* (with Colin Renfrew, 1991).

In a philosophical erotic narrative, an essay on poetry, and in poems Georges

Bataille pursues his guiding concept, the impossible. The narrator engages in a journey, one reminiscent of the Grail quest; failing, he experiences truth. He

describes a movement toward a disappearing object, the same elusive object that moved Theresa of Avila and Catherine of Siena to ecstasy.
