Experience, Meaning, and Identity in Sexuality Cambridge University Press

"Michael J. Chan argues, on a methodological level, for the deeper integration of iconographic materials into the task of tradition history—a method that has tended to focus on textual evidence alone. Following the work of O.H. Steck, however, 'tradition' is understood in more flexible terms, to refer to inherited concepts and constellations, which can exist across multiple media. The author undertakes a tradition-historical study of the 'Wealth of Nations Tradition' - a series of texts in which the foreign nations of the earth bring their wealth to Zion (1 Kgs 10:1-10, 13, 15//2 Chr 9:1-9, 12, 14; 1 Kgs 10:23-25//2 Chr 9:22-24; Pss 68:19, 29-32; 72:10-11; 76:12; 96:7-8//1 Chr 16:28-29; Isa 18:7; 45:14; 60:4-17; 61:5-6; 66:12; Zeph 3:10; 2 Chr 32:23). The Wealth of Nations tradition is found throughout the ancient Near East. Michael J. Chan shows that in some cases, the biblical texts reflect this tradition with little to no modification while in others the tradition is recast in creative and disruptive ways"--

Strange how many déjà vus you have here. How might we conceive of comradeship with a present that is increasingly predetermined by algorithms and governed by techno-politics? Armen Avanesian chronicles his stay in Miami as an experiment in writing about our times of individual optimization and digitization. An inventory of the self in the second person—and a philosopher's reflections in the infinity pool of the art world—this book reckons with a new time complex as well as the aesthetics and infrastructures of the contemporary. Can we advance from conditions of financial feudalism and climate change to a progressive poetics of the digital? The city of tropical noir becomes a case study for a geopolitics and economics of the future—Miami vision, Miami vacation, Miami fiction, Miamification.

Enlarged print edition now available! Writing in an approachable and anecdotal style, Tom Wright helps us see the great sweep of this letter. Romans has long been viewed as the book above all in which Paul puts forth the basic doctrines of the faith, and the picture of God's life for us. It is the classic setting-out of the Gospel. Tom Wright has undertaken a tremendous task: to provide guides to all the books of the New Testament, and to include in them his own translation of the entire text. Each short passage is followed by a highly readable discussion with background information, useful explanations and suggestions, and thoughts as to how the text can be relevant to our lives today. A glossary is included at the back of the book. The series is suitable for group study, personal study, or daily devotions.

When Cleopatra expresses a desire to die 'after the high Roman fashion', acting in accordance with 'what's brave, what's noble', Shakespeare is suggesting that there are certain values that are characteristically Roman. The use of the terms 'Rome' and 'Roman' in Julius Caesar, Antony and Cleopatra or Jonson's Sejanus often carry the implication that most people fail to live up to this ideal of conduct, that very few Romans are worthy of the name. In this book Chernaik demonstrates how, in these plays, Roman values are held up to critical scrutiny. The plays of Shakespeare, Jonson, Massinger and Chapman often present a much darker image of Rome, as exemplifying barbarism rather than civility. Through a comparative analysis of the Roman plays of Shakespeare and his contemporaries, and including detailed discussion of the classical historians Livy, Tacitus and Plutarch, this study examines the uses of Roman history - 'the myth of Rome' - in Shakespeare's age.

Revisiting Max Weber's Ethic of Responsibility Springer-Verlag

The complexity of Information Technology (IT) systems has been steadily increasing in the past decades. In October 2001, IBM released the "Autonomic Computing Manifesto" observing that current applications have reached the size of millions of lines of code, while physical infrastructures include thousands of heterogeneous servers requiring skilled IT professionals to install, configure, tune, and maintain. System complexity has been recognized as the main obstacle to the further advancement of IT technology. The basic idea of Autonomic Computing is to develop IT systems that are able to manage themselves, as the human autonomic nervous system governs basic body functions such as heart rate or body temperature, thus freeing the conscious brain—IT administrators—from the burden of dealing with low-level vital functions. Autonomic Computing systems can be implemented by introducing autonomic controllers which continuously monitor, analyze, plan, and execute (the famous MAPE cycle) reconfiguration actions on the system components. Monitoring activities are deployed to measure the workload and performance metrics of each running component so as to identify system faults. The goal of the analysis activities is to determine the status of components from the monitoring data, and to forecast future conditions based on historical observations. Finally, plan and execute activities aim at deciding and actuating the next system configuration, for example, deciding whether to accept or reject new requests, determining the best application to servers assignment, in order to achieve the self-optimization goals.

Recrutainment Cambridge University Press

Through a close reading of two presocratic philosophers, Heidegger demonstrates that all of Western philosophy is rooted in the question of Being. This volume comprises a lecture course given at the University of Freiburg in 1932, five years after the publication of Being and Time. During this period, Heidegger was at the height of his creative powers, which are on full display in this clear and imaginative text. Heidegger analyses two of the earliest philosophical source documents, fragments by Greek thinkers Anaximander and Parmenides. Heidegger develops their common theme of Being and non-being and shows that the question of Being is indeed the origin of Western philosophy. His engagement with these Greek texts is as much of a return to beginnings as it is a potential reawakening of philosophical wonder and inquiry in the present.

Paul for Everyone: Romans, Part One Cambridge University Press

There are few areas of public policy in the Western world where there is as much turbulence as in family law. Often the disputes are seen in terms of an endless war between the genders. Reviewing developments over the last 30 years in North America, Europe and Australasia, Patrick Parkinson argues that, rather than just being about gender, the conflicts in family law derive from the breakdown of the model on which divorce reform was predicated in the late 1960s and early 1970s. Experience has shown that although marriage may be freely dissoluble, parenthood is not. Dealing with the most difficult issues in family law, this book charts a path for law reform that recognizes that the family endures despite the separation of parents, while allowing room for people to make a fresh start and prioritizing the safety of all concerned when making decisions about parenting after separation.

Fermentation Microbiology and Biotechnology, 4th Edition explores and illustrates the broad array of metabolic pathways employed for the production of primary and secondary metabolites, as well as biopharmaceuticals. This updated and expanded edition addresses the whole spectrum of fermentation biotechnology, from fermentation kinetics and dynamics to protein and co-factor engineering. It also sheds light on the new strategies employed by industrialist for increasing tolerance and endurance of microorganisms to the accumulation of toxic wastes in microbial-cell factories. The new edition builds upon the fine pedigree of its earlier predecessors and extends the spectrum of the book to reflect the multidisciplinary and buoyant nature of this subject area. Key Features Covers the whole spectrum of the field from fermentation kinetics to control of

fermentation and protein engineering. Includes case studies specifically designed to illustrate industrial applications and current state-of-the-art technologies. Presents the contributions of eminent international academics and industrial experts. Offers new chapters addressing: The prospects and the role of bio-fuels refineries, Control of metabolic efflux to product formation in microbial-cell factories and Improving tolerance of microorganisms to toxic byproduct accumulation in the fermentation vessel.

The political rhetoric of ancient Israel took several literary, architectural, and graphic forms. Much of the relevant material concerns kingship, but other loci of authority and submission also drew significant attention. Mark W. Hamilton illustrates how these "texts" interacted with other political rhetorics, especially those of the great Mesopotamian empires. By paying close attention to the argumentation of the Israelite literature as well as their function as epideictic oratory building solidarity with hearers he reveals the complexity of Israelite intellectual activity both during and after the period of the monarchy. By doing this he shows that this body of thought lies at the heart of Western political thought even today.

Modern religious identities are rooted in collective memories that are constantly made and remade across generations. How do these mutations of memory distort our picture of historical change and the ways that historical actors perceive it? Can one give voice to those whom history has forgotten? The essays collected here examine the formation of religious identities during the Reformation in Germany through case studies of remembering and forgetting—instances in which patterns and practices of religious plurality were excised from historical memory. By tracing their ramifications through the centuries, Archeologies of Confession carefully reconstructs the often surprising histories of plurality that have otherwise been lost or obscured.

To what extent could Max Weber's ethic of responsibility serve as a model for us today? An adequate answer to this question could only be given on the basis of a satisfactory interpretation and thorough assessment of his ethic of responsibility. In this monograph Etienne de Villiers sets himself the task of doing just that. He establishes that, in spite of serious shortcomings, Weber's ethic points to the contemporary need for an ethic of responsibility as a second-level normative ethical approach that would address the undermining effect of modernisation on ethical living. Such a contemporary ethic of responsibility would provide guidelines on how ethical living could be responsibly enhanced in our time. The author also presents a brief proposal on how a contemporary ethic of responsibility might be designed.

This volume presents a historical-sociolinguistic description and analysis of Maritime Polynesian Pidgin. It offers linguistic and sociohistorical substantiation for a regional Eastern Polynesian-based pidgin, and challenges conventional Eurocentric assumptions about early colonial contact in the eastern Pacific by arguing that Maritime Polynesian Pidgin preceded the introduction of Pidgin English by as much as a century. Emanuel J. Drechsel not only opens up new methodological avenues for historical-sociolinguistic research in Oceania by a combination of philology and ethnohistory, but also gives greater recognition to Pacific Islanders in early contact between cultures. Students and researchers working on language contact, language typology, historical linguistics and sociolinguistics will want to read this book. It redefines our understanding of how Europeans and Americans interacted with Pacific Islanders in Eastern Polynesia during early encounters and offers an alternative model of language contact.

successfully. Walk through the IDoc anatomy and different kinds of segments. Dive into inbound and outbound IDoc interfaces and learn how to create a port and logical system. Walk step by step through how to configure IDoc interfaces for various business scenarios including sending an invoice to an EDI partner, receiving a sales order from an EDI partner, and receiving material master data from an external system. Learn how to use output and change pointer techniques. Examine how to monitor and troubleshoot post-IDoc interface implementation activities and get a handle on archiving best practices. Navigate IDoc interface enhancement options including adding segments and user exits. By using detailed examples, tips, and screenshots, the author brings readers up to speed on the fundamentals of SAP IDocs. - Fundamentals of inbound and outbound IDoc interfaces and configuration - Learn how to implement interfaces with ALE and EDI - Troubleshoot common post-implementation challenges - Quick reference guide to common IDoc transaction codes and reports

The Intellectual Toolkit of Geniuses Birkhäuser

This book takes the head-scratching out of human sexuality. Personal construct theory provides the foundation for a psychosocial explanation of sexuality that views everyday social interaction as key to the development of sexual identity and desires. The theory developed here accounts for stability and change in sexual identity through an understanding of the importance of experience and the importance of meaning in everyday life. The potential impact of erotica and pornography on sexual desire is discussed, as is the role of social power on sexual behaviour. The variation of sexual expression among individuals—everything from asexuality and sado-masochism to sexual assault—is examined and explained. Formal techniques for changing sexual desires are also presented.
